## INTRODUCTION

This book is about veganism for animals, its difference with strict vegetarianism and about vegan nutrition where it is explained how to have a vegan diet without suffering from deficiencies. It explains why veganism is not a fad, or a religion, or a cult, and refutes those who consider it a cult.

In this book you will find the philosophical background of veganism. The fallacies used by speciesists to justify the consumption of animal carcasses, hunting for pleasure or bullfighting, such as the Naturalistic Fallacy, the Fallacy of Appealing to the Majority, the Fallacy of Appealing to Traditions or the Fallacy of Appealing to Ancestors, and the belief that harming animals that have done them no harm according to them makes them "strong", "brave" or "men" is refuted.

It is explained why respecting the life of animals and their rights is NOT the same as humanizing them, the alternatives that exist so that animals are not used in experimentation are presented. In addition, the concept of sensocentrism is developed, which consists of the ethical part of valuing and respecting all life with the capacity to feel physical pain, emotional suffering or both by having a nervous system.

The importance of caring for the Environment is explained, because it is so important for our lives as humans as well as for the lives of animals of other species, which can be done both individually and on a global scale.

It is important that this book is downloaded and shared by all possible means to reach more people.

## VEGANISM

In the livestock industry, animals suffer throughout their lives and are treated as things, never as beings that feel because they have a nervous system, in addition, the livestock industry generates large amounts of pollution with the methane that these animals expel through their gases and waste.

In 1944, Donald Watson created the concept of veganism to differentiate himself from vegetarians, even from strict vegetarians, this definition was created with the meaning of opposing all exploitation of animals, unfortunately in the present, many people believe that strict vegetarian and vegan are the same, and that you can be vegan, even if it's not for the animals.

Veganism is giving up our privileges as a species and understanding that due to the fact that animals of other species feel physical pain and suffer emotionally because they have a central nervous system (brain) with nociceptors (nerve endings for pain) and a limbic system which is the part of the brain that is responsible for generating emotions, they deserve the same respect for their lives and the same right to well-being.

Veganism is NOT a fashion, because fashions are intended to serve the human being, while veganism is for animals of other species. According to Pablo Salum, who is an Argentine researcher against sects, veganism is a sect and affirms that it has a dangerous Coercive doctrinal content, and that according to him it has doctrines.

Pablo G. Salum  
@LEYANTISECTAS

...

El veganismo al contrario que el vegetarianismo posee contenido doctrinal Coercitivo peligroso. Son anti ciencias, anti derechos y totalmente IRRACIONALES. Ponen en peligro su vida y la de terceros. Muchos dicen ser [#veganos](#) sin serlo, por desconocimiento...

Veganism is the value of respecting the life of animals and their right to well-being, saying that veganism is a sect is as absurd and ridiculous as someone saying that having the courage to respect the lives of children and their well-being is a sect, which makes no sense.

On the other hand, all laws are coercive because they prevent people from committing crimes, for example, laws in favor of minors are coercive because they prevent minors from being mistreated or abused, laws against discrimination are coercive because they prevent discrimination from being exercised, and that does not mean that the laws and regulations are sects, the same thing happens with veganism, it is a value that must be based on laws and that does not mean that it is a sect.

As for veganism being a doctrine, it is also false, veganism is not based on beliefs, it is based on true facts such as that scientifically animals feel because they have a nervous system and that is why their lives must be respected, that animals feel is NOT a metaphysical or supernatural belief, it is a scientific fact.

The fact that there are vegans who believe in conspiracy theories, are New Age or belong to sects does NOT make veganism a sect, one thing is vegans who are very diverse people and another thing is veganism as such, you should not confuse things.

On the other hand, Pablo Salum attacks sects, but defends religions, when religions often cause the same damage as sects.

It is also not necessary for the person to love animals to be vegan, just as the rights of a human being are respected without necessarily feeling appreciation for him, the right of animals to have their lives and their lives respected can also be respected. well-being without necessarily feeling appreciation for them.

It is known that cows have family ties with their young, that dolphins are able to recognize themselves in a mirror, that the consumption of honey causes the death of bees and their larvae, and that smoke is used in hives to drive away the bees.

Regarding animal experimentation, it is known that toxicity tests consist of immobilizing an animal and forcing it to ingest or inhale products that are potentially dangerous, this causes a lot of pain and makes the animals suffer.

The AND, which is the Academy of Nutrition and Dietetics, guarantees that a good vegan diet can be obtained at all stages of life as long as it is well planned and based on scientific sources, the fact that there are vegan parents who are irresponsible and base their children's diet on pseudoscientific and New Age sources causing their children to suffer deficiencies, get sick and even die, it is NOT the fault of veganism, nor is it a reason for all vegans to be put in the same bag.

Unfortunately, New Age vegans do a lot of damage to veganism, they are anti-science and give recommendations regarding food based on the Naturalistic Fallacy, in pseudoscientific and New Age sources, which causes people to suffer from nutritional deficiencies, get sick and then abandon veganism.

At the time of the ancient Greeks the word "vegan" did not exist, that is why those who did not eat or use animals out of respect for their lives were called vegetarians, there were Greek philosophers who were vegetarians, Greek schools such as Orphism and Pythagoreanism that promoted vegetarianism out of respect for the life of animals.

Herodotus was a Greek historian who related how in the Orphic practices it was forbidden to eat meat and it was also forbidden to introduce wool into the temples or to be buried with it. For Plato and Empedocles there was an age of innocence where humans never consumed animal carcasses.

The Greek philosopher Porphyry in his book "Life of Pythagoras" mentions that Pythagoras taught not to destroy or harm animals that are never harmful to the human species, nor to crop plants. In the introduction of the "Orphic Hymns" written by Porphyry, which are hymns dedicated to the Greek gods, it is also mentioned that in Orphism they refrained from sacrificing animals and consuming animal carcasses.

"As long as men continue to slaughter and devour their animal brothers, war and suffering will reign on earth and they will kill each other, because he who sows pain and death will not be able to reap joy, peace or happiness. love".  
(Golden Verses, Pythagoras)

"Even if all the wolves and vultures on earth joined together to convince me of the advantages of meat, I would still see it as a crime." (Porphyry).

For Pythagoras, the animals of other species were his younger brothers in evolution.

"Those who kill animals to eat their meat tend to slaughter themselves." (Pythagoras).

Also the Greek philosopher Porphyry in his work called "On Abstinence" promoted respect for the life of animals of other species and never use them as food.

"The earth gives riches profusely and peaceful food. And he gives you food that is free from death and blood." (Pythagoras)

"The soul is the same in all creatures, although the body of each one is different." (Hippocrates)

The Greek poet Plutarch in his book called "Moralia" also recommends respect for the life of animals of other species.

"Prodigal, of your riches and tender foods the earth provides you, and delicacies without slaughter and without blood it offers you". (Excerpt from the book "Metamorphosis" written by the Roman poet Publio Ovidio Nasón).

For Plutarch, animals of other species also reason, although not in the same way as humans.

In the Cambridge Declaration on Consciousness in July 2012, where science experts met, the following was stated: "From the absence of the neocortex it does not seem to be concluded that an organism does not experience affective states. Converging evidence indicates that nonhuman animals have the neuroanatomical, neurochemical, and neurophysiological substrates of states of consciousness along with the capacity to exhibit intentional behaviors. Consequently, the bulk of the evidence indicates that humans are not the only ones to possess the neurological basis that gives rise to consciousness. Nonhuman animals, including all mammals and birds, and many other creatures, including octopuses, also possess these neurological substrates."

As for insects and mollusks, many doubt that they can feel, but octopuses are mollusks and the Cambridge Declaration states that they also have neurological substrates for what they can feel, however, many appeal to insects and Mollusks like clams have a very primitive nervous system, but this never means that they don't feel anything, so when in doubt as to whether they feel or not, it is best not to harm them.

Religions that believe in the god of the bible and in the devil have always made people believe that the word animal means immoral or unworthy, however, unlike men who cheat on their wives and abandon their children, there are animals that are monogamous, that is, they have a single partner throughout their lives, and where both the male and the female care for their young.

The Californian Jay is a monogamous bird, the prairie voles are monogamous, in the emperor tamarin the males take care of their young, the owl monkeys are monogamous and both the male and the female take care of their young, and in the barking frog the male also cares for his young.

With this I am not judging those who decide to be polygamous, it is one thing for a person to deceive their partner into believing that they are monogamous when in fact they are polygamous, and another thing is for a person to be honest with their partner and let them know that they are polygamous, and both agree to that.

What I do want to say is that there are animals that are faithful to their partner, unlike humans, and animals where both parents are responsible for raising their young, which is something that does not always happen in humans.

The California Jay is a monogamous bird, and the prairie voles are monogamous, with both the male and female caring for their young. Photographs retrieved from: <https://birdschile.blogspot.com/2015/12/> and <https://www.elmundo.es/ciencia-y-salud/2017/05/31/592dc2d6468aeb460d8b463c.html>

In emperor tamarins males care for their young, owl monkeys are monogamous and both females and males care for their young. Photographs retrieved from: <https://es-la.facebook.com/LaVozDelDEspertarOficial/posts/1131806737175561/> and <https://www.muyinteresante.es/ciencia/articulo/ser-monogamo-y-fiel-tiene-ventajas-biologicas>

If animals were not intelligent, or reasoned, that should NEVER matter in the slightest, the only thing that should matter to value and respect their lives is that they feel for having a nervous system.

But, intelligence is defined as the ability to solve a problem and many species of animals have shown intelligence when using tools such as chimpanzees, orangutans, octopuses, woodpecker finches, crows, gray parrots, raccoons, bears, the puffin, the elephant and even the fish.

Both chimpanzees and elephants use tools. Photographs retrieved from: <https://pangeanimales.com/mamiferos/chimpance/> and <https://rolloid.net/7-tipicas-cosas-que-hacen-los-elefantes-que-demuestran-por-que-son-tan-inteligentes/>

Orangutans use leaves and tree branches as umbrellas to protect themselves from rain, and sticks as spears for fishing. Photographs retrieved from: [https://www.lareserva.com/orangutan\\_paraguas\\_hoja](https://www.lareserva.com/orangutan_paraguas_hoja) and <https://larepublica.pe/mundo/2019/07/09/captan-a-orangutan-salvaje-pescando-con-una-lanza-en-indonesia/>

Octopuses use coconut shells as shields to ward off predators, and ravens use sticks to catch caterpillars hiding in tree holes. Photographs retrieved from: <https://www.rtve.es/noticias/20091214/descubren-pulpos-usan-cocos-como-escudos-contradepredadores/305856.shtml> and <https://www.diarioanimales.com/animales-y-el-uso-de-herramientas-los-cuervos/>

And many people will say: but humans are superior in intelligence to animals of other species, and it is true, but that does not justify that humans use animals of other species as things and exploit them, the only thing that should matter is what they feel.

There are humans with a much higher IQ (intelligence) than others and humans with a much lower IQ than others, and we never see these people justifying humans with a higher IQ than others from torturing, abusing, mistreating or kill humans with lower IQs, and we also don't see them claim that the lives of humans with lower IQs are of less value than the life of a human with higher IQs, as they do with the animals of other species.

Scientifically, animals of other species feel emotional suffering because they have a limbic system in their brain that allows them to experience emotions,

but there is also other evidence that animals suffer emotionally and that they can experience emotions such as fear, sadness, happiness and fun, among others.

The otters have fun playing with small stones and a photo of a crying bull. Photo source: <https://es.gizmodo.com/las-nutrias-hacen-malabarismos-con-piedras-antes-de-com-1843324030> and <https://www.medicinaintegralnatural.com/2014/01/razon-n-2-el-toro-que-lloraba-porque-no-queria-morir/>

Bullfighter wipes the tears of the bull that cries when being tortured before killing it. Font: <https://colombian.com.co/mundo/con-un-panuelo-torero-le-limpia-las-lagrimas-al-toro-antes-de-matarlo/>

All these monsters that mistreat, abuse, torture and kill animals of other species are the same ones who believe that harming the weakest and beings

who feel that no harm has been done to them nor can they defend themselves, according to them makes them "strong", "men", "powerful" or "brave", and for that reason they enjoy hurting animals of other species that cannot defend themselves.

We live in a sick society where many men and women believe that harming the weakest and beings who feel that they have done us no harm and cannot defend themselves is to be "strong", "man", "powerful" or "strong", but that in reality it is being a coward, a piece of trash and a criminal.

Strong, brave and powerful is the one who protects and defends the weakest such as animals of other species and the most vulnerable humans such as those belonging to indigenous peoples, and who protects and defends beings who feel that they have never harmed us or they can defend themselves as are the animals of other species.

Also, on the website of the "ODINIST COMMUNITY OF SPAIN-ASATRU" in a writing entitled "Odinism in feminine" the following is stated: "- Likewise, I reject radical animalist theories, veganism taken to the extreme of considering murderers to those of us who eat meat and many other stupid things that they usually say. Considering animals equal, in a total sense, and, therefore, holders of the same rights as human beings, does not make any sense, but even less so does comparing what they call "speciesism" with racism. It would lead us to the absurd, if we acted in this way, to legalize bestiality (if there is no discrimination between species, no one would have the right to deny a man the right to love a doe and want to make love to her, as long as the doe does not deny consent, which would then be a violation, of course), grant political rights to dogs, although perhaps we would be better off with a President of the Government who was a cat or a horse... and of course, condemn every lion that hunts a gazelle for murder."

To begin with, if there are people who consider that killing an animal of another species is the same as killing a human, that, by the way, biologically humans are also animals, and therefore we consider the consumption of animal corpses animals as murder.

Who is this person to try to impose on us his concept of murder where he only considers killing humans as murder? to animals of other species?

In my concept of murder: murderer is someone who mistreats, tortures or kills any being with the ability to feel physical pain, emotional suffering or both by having a nervous system (regardless of whether it is human or of another species), and without being of accidentally, without it being to defend himself against an attack or to defend a loved one against an attack and without it being a case of survival, and whoever is indifferent or never cares that this happens is because he is an accomplice and therefore just as guilty.

The fact of respecting and valuing the life of animals of other species NEVER means that they are considered to be equal to humans in everything or that they are considered to have an intelligence equal to humans, it is about

respecting and valuing their life equal to the human because they have a nervous system that allows them to feel physical pain and suffer emotionally, it never matters in the least that they are less intelligent than humans or that they do not build things like humans, although there are animals of other species that also use tools.

Respecting and valuing the life of animals of other species NEVER means being in favor of legalizing zoophilia, and in fact this writing on this Odinist page can be considered a defamation equal to the writings made by Catholic fanatics, Christian fanatics and those who invent theories of conspiracy against veganism where they also generalize and defame putting in the same bag those of us who are vegan.

It is very clear that love and sexual relations never mean the same thing, and that bestiality and pederasty are unacceptable aberrations for many of us who are vegans, although there may be a few who defend these aberrations, just as there may also be some people who consume animal carcasses and use skins that also defend these aberrations, and for that reason we are not going to say that all those who consume animal carcasses and use animal skins are zoophiles, nor that they are all pederasts.

When we vegans talk about there being no discrimination between species, we are referring to respecting the life of all beings with the ability to feel for the fact of feeling, we are talking about there being no discrimination in terms of the right to life and welfare, we are NEVER referring to accepting aberrations such as bestiality, or something as stupid as an animal of another species being able to vote or be president.

A Zoophile is someone who feels sexual attraction to animals of other species or has sex with animals of other species, regardless of whether it is with the consent or without the consent of the animals. And one thing is to feel appreciation for an animal of another species and respect the life of beings who feel, and another thing is the depravity of zoophilia.

The fault that there are people who defend pedophilia and zoophilia stating that they are manifestations of love and that love never understands age or species lies with the sick society in which we live, which always confuses sexual relations with love.

But, that there are cases of criminals who rape and kill their victims is proof that love NEVER means the same as sexual relations, just as love does not mean the same as the unhealthy attachment to seeing someone or someone as "property". to bully.

## Viola y mata hijastra de 3 años "por celos"

## Hombre viola y mata niña de 8 años y luego se suicida en Baní

Screenshot of a news story about a man who raped and murdered an 8-year-old girl, recovered from: <http://hoy.com.do/hombre-viola-y-mata-nina-de-8-anos-y-luego-se-suicida-en-bani/>

With this I am not saying that sexual relations are bad, I make the clarification so that I am not misunderstood. Adult humans regardless of their sexual preferences (heterosexual, bisexual or homosexual) can enjoy sexual relations in a healthy way and it is healthy for them to do so, as long as minors or animals of other species are not involved.

With or without consent, a pederast or a zoophile are criminals, since they take advantage of innocent beings, whether they are children or animals of other species that lack the same maturity as an adult human and that lack the same level of reasoning possessed by an adult human.

On the other hand, we are not referring to condemning predatory animals of other species such as lions because we know that these animals, although they feel because they have a nervous system, cannot reason in the same way as a human or understand things at the same level of understanding as a human.

Animals that are predators are never to blame nor can they be condemned because, unlike human beings, they never have the same reasoning as human beings nor the same capacity to feel empathy, nor to be able to analyze before acting.

There are also animals of other species where cannibalism happens, for example, in praying mantises and in certain species of amphibians, and we never see anyone justify cannibalism in humans because it happens in these species.

Praying mantises and certain amphibian species are examples of animals where cannibalism occurs. Photographs retrieved from:

<https://www.diariorepublica.com/lo-mas-curioso/curioso-un-insecto-macho-desarrollo-una-increible-habilidad-para-evitar-ser-devorado-por-las-hembras> and  
<https://gavetasdemiescritorio.blogspot.com/2011/08/canibalismo-en-el-mundo-animal.html>

The Naturalistic Fallacy or Fallacy of Appeal to Nature consists in believing that, if a behavior is carried out by an animal of another species, that means that it is good for the human being to carry it out, and this Fallacy also consists in believing that everything natural it is good at including primitive instincts such as cruelty or sexual depravity, and at believing that everything natural is healthy.

Social Darwinism is based on this fallacy, which consists of eliminating or subjugating the weakest, Social Darwinism was what Hitler and the Nazis promoted, what destructive sects such as The Church of Satan or The Temple of Seth promote and for me the Speciesism is part of Social Darwinism since it is justified by the fact that humans are stronger and more intelligent that they use animals of other species as if they were things without value and without the ability to feel.

Infanticide also happens in many species of animals, for example, male lions kill the cubs of other lions so that the female comes back into heat and has cubs with that female, and we never see humans justify that this same behavior occur in humans.

Male lions commit infanticide. Images retrieved from:  
[https://www.youtube.com/watch?v=\\_CIRsYEAafY](https://www.youtube.com/watch?v=_CIRsYEAafY) and  
<https://www.youtube.com/watch?v=2STFiy-FZ5c>

Another Fallacy used by speciesists such as hunters, bullfighters, galleros and those who use animals as if they were things, is the Fallacy of Appealing to Tradition, they believe that if something is a tradition or custom it automatically turns it into something good and respectable, which is completely false.

A tradition is for example the "Day of Ashura" in Islam, in this tradition cuts are made on the forehead of children, which is causing harm to minors, the fact that it is a tradition never makes it a good thing .

The same thing happens with traditions and customs as with beliefs; traditions, customs and beliefs should never be above the lives they feel.

Cuts that are made on the forehead of boys and girls in the Islamic tradition known as the "Day of Ashura". Photographs retrieved from:  
<https://actualidad.rt.com/actualidad/view/145799-mundo-chii-celebrar-ashura> and  
<https://www.infobae.com/america/fotos/2016/10/12/fotos-islam-los-sangrientos-rituales-chiitas-que-recuerdan-al-nieto-de-mahoma-en-el-dia-de-ashura/>

A custom, for example, is the clitoral cutting or female genital mutilation of girls that has happened in certain areas of Africa, the fact that it is a custom does not make it a good thing or justifiable or something that should continue.

## La ablación, una violación de los derechos de las niñas

Cutting, a violation of girls' rights, retrieved from:

<https://ayudaenaccion.org/ong/blog/mujer/ablacion-derechos-ninas/>

Humanity has been completely out of its mind since the day it began to put beliefs, traditions and customs above the lives that they feel, and from the day they began to believe that the beliefs, traditions and customs that the lives they feel

Another fallacy used by speciesists is the Fallacy Of Appealing To Ancestors as if everything our ancestors did was a good and justifiable thing, for example, cavemen are known to have practiced cannibalism.

## Los hombres de Neandertal eran caníbales

2 de enero 2017, 10:35 AM

Neanderthals were cannibals, retrieved from:

<https://www.nacion.com/ciencia/aplicaciones-cientificas/los-hombres-de-neandertal-eran-canibales/HMXKBLFFRZFTLGFB LJ3N2SCHUI/story/>

Many traditions and customs are mistreatment and child abuse, but people have been brainwashed into thinking that every tradition and custom is a good thing, justifiable and should be preserved, as in the case of bullfighting, cockfighting and hunting for pleasure, which is absurd, for example, a custom was to bind the feet of Chinese girls to keep them a certain size when they reached adulthood, which caused their smallest toes to break.

Another custom in southern Madagascar is forcing girls aged 11, 12 or 13 to have sex, and another custom that is child abuse is the ironing of the breasts of girls and adolescents in Cameroon with a glowing stick.

Women with bound feet in China, which was a custom for a long time, fortunately in the present it is a custom that is no longer in force. Photograph retrieved from:

Some people ask us vegans what would happen if we were on a desert island where there are only animals, and the answer is that we are not on a desert island and we have an abundance of plant-based foods to live without consuming animal carcasses.

Eskimos, for example, are forced to consume animal carcasses and wear skins because they live in places where there is only snow, ice, and animals, and many isolated indigenous tribes are forced to hunt and fish to survive when there is a shortage of plant foods. and also people who live in extreme poverty are forced to eat and use whatever, but, most of us do not live in those situations and we have access to plant-based foods every day of the year, so we do not have justification.

Others affirm that, if we improve the treatment of these animals before eating them, but it is not about improving the treatment, it is about not eating or using them, understanding that they are beings that feel with the same desire to live as we do and with the same desire to enjoy well-being throughout his life.

Others affirm that respecting the life of animals is disrespecting human life, which is absurd, because humans are also animals, and others affirm that respecting their lives is humanizing them, which is stupid, because it is not about respecting their life because they think that they are equal to humans in everything, it is about respecting their life because they can feel, they value their life just like us and they don't want to be harmed just as we don't want to be harmed either.

It is one thing to humanize animals of other species and another thing is to respect their lives for the fact of feeling, there may be people who humanize animals and respect their lives at the same time, but there are also many people

who never respect their life, who see them as objects or things and humanize them at the same time. Nothing has to do one thing with the other.

When someone uses the Naturalistic Fallacy to affirm that if there are animals that eat others it is okay for human beings to also eat other animals, it is as if someone were to affirm that it is okay for humans to defecate and have sex in the street because dogs defecate and mate in the street, it just doesn't make sense.

As for the book "The Secret Life of Plants" which claimed that plants also feel, this book was refuted by many scientists such as botanist Arthur Galston, physiologist Clifford L Slayman, and botanist Leslie Audus.

Plant neurobiology is considered a pseudoscience, that is, a false science that passes itself off as science, and is rejected by biology since it makes such absurd claims as that plants have something similar to a brain in their roots, which has been ruled out by science and it is fully proven that plants do not have a brain.

When someone justifies speciesism and harming animals of other species just because they are not of the human species, it is the same as if someone justified racism and harming a person of another skin color just because they are not the same skin color, the same as someone justifying xenophobia and harming a person from another country just for not being from the same country, the same as someone justifying harming someone because they are not of the same height and the same as someone justifying harm someone who does not speak your language for not speaking your language.

Some environmentalists justify the killing of animals considered invasive species, however, Ken Thompson who is an expert in science related to animals and plants, and an environmentalist, in his book "Where are the camels from?: Beliefs and truths about invasive species" explains the following: "- Some of these species that today we believe to be autochthonous were once "invasive" and evicted other "natives". These contradictions force us to reconsider the very present question of the danger and the disorders that the so-called "invasive species" suppose as another face of biodiversity. In this fascinating book Ken Thompson examines through a multitude of cases the question of fact that these species ask and also leaves open the question of whether our current fears about it may not, in the long run, be counterproductive."

Many people also justify speciesism and eating animal carcasses because the majority do it, but if the majority were cannibals and sacrificed their first child that would not make it good, nor justifiable, that something is done by the majority does not mean that it is something Well, not even justifying it.

Humans are biologically animals, we are primates and we are mammals, so justifying the consumption of animal carcasses is practically the same as justifying cannibalism.

Others claim that since animals have no obligations then they have no rights or that since they are not moral agents by not understanding what is good

or what is bad, then they lack rights, however, human babies and people with mental disabilities Graves also have no obligations and they are also not moral agents since they do not know what is good and what is bad, and we never see other humans justify being mistreated, tortured, abused or killed for that.

Those who kill animals for pleasure are also often capable of attacking or killing other humans, Mike Hill was a vegan activist who was murdered by a hunter named Allan Summerhill in February 1991, Tom Worby was another activist against hunting who was killed by hunter Alan Ball in 1993 and Jill Phipps was another activist killed by Stephen Yates with a truck carrying calves.

All these murders of vegan activists at the hands of speciesists went unpunished, and both the media and the speciesist society we live in are complicit and guilty of these murders.

Mike Hill, Tom Worby and Jill Phipps, vegan activists killed by speciesists, photos retrieved from:

The government of Spain, which has a lot of influence from the Catholic Church, is violating the right to opinion and freedom of expression, since those of us who think differently from the majority have the right to never have the same concept of murder as the majority, and we have the right to express an opinion and to express that anyone who kills a being with the capacity to feel (regardless of whether it is human or of another species), without being necessary to survive and without being necessary to defend themselves, is a murderer.

RESOLUCIÓN

## Primera condena por llamar "asesino" a un torero en Facebook

Many religions and sects disrespect human life, or disrespect the life of other sentient species, or disrespect the environment, or disrespect progress, and disrespect intelligence by promoting the ignorance.

When many religions or sects ask for respect, that respect implies disrespecting the right to opinion and the freedom of expression of those who are against them among one of the many reasons for being speciesists and causing harm to animals.

Illustrations of the nervous system of a rabbit, a fish and a chicken, retrieved from: <https://www.pinterest.com/pin/164944405075034782/?lp=true> ,

And I do NOT care about those evil beliefs that: killing other sentient beings of another species is not murder, or that, if they lack intelligence, lack reasoning, lack a moral conscience, or lack a soul or spirit, It is not murder to torture, mistreat or kill them.

The only thing that should matter is whether a being feels physical pain, emotional suffering or both, NEVER that evil that they teach us about being intelligent, reasoning or having a soul, and respecting the life of every being with the ability to feel as it is done in the veganism is a value, never a belief.

Currently vegan foods for dogs and cats have been developed, which I think is excellent. And many oppose using the Naturalistic Fallacy (the absurd belief that what is natural is always good, correct or justifiable), according to them it is wrong to feed animals that eat meat in a vegan way because it goes against the nature of those animals, that It is pure naturalistic fallacy.

They also state that according to them this is animal abuse, but if these foods contain all the nutrients that cats and dogs need, it can NEVER be abuse, because by containing all the nutrients in a synthetic form they will NEVER get sick and, by the way, believe that everything synthetic is bad or harmful is also Naturalistic Fallacy.

As I am opposed to the Naturalistic Fallacy used by the majority, I consider that a part of nature or a part of the natural is bad, therefore, there is NOT something wrong with modifying nature to improve it and eliminate its bad part, which You don't have to be pessimistic either, it also has its good side.

Speciesists always imply that we have to choose between humans or animals of other species, that according to them either we favor humans over animals of other species or we favor animals of other species above humans, and that we have to choose between one of the two options, but that thought seems too stupid and even criminal.

Because it has never been about choosing between humans or animals of other species, it is about respecting the life of every being with the capacity to feel physical pain, emotional suffering or both, whenever possible.

It is that the criterion for respecting the well-being and life of a being is that they feel physical pain, emotional suffering or both, never if they are human or of another species, never if they are intelligent or lack intelligence, never if they reason or lack capacity to reason, and never if it has a soul or lacks a soul.

And contrary to what certain people who seem to lack good reasoning have led us to believe: this is NEVER about a religion OR a sect, because respect for life and the well-being of all beings capable of feeling physical pain, emotional suffering or both is about ethics, morality or a value, it is NEVER a belief, or a way of thinking, or a personal decision.

Although a person has never directly murdered a sentient being, if he pays others to murder him, it is indirect murder, as is the case with the consumption of "meat".

The consumption of animal milk, if it implies rape and murder of beings with the capacity to feel, because females are artificially inseminated, which implies rape by never having the capacity to give their consent, the offspring are often taken to the slaughterhouse and when the females stop producing milk they are killed.

The majority will never be able to force me to have the same concept of murder, because for me murder never means only when a human kills another human, for me murder is when a human kills any sentient being without it being accidental, nor to defend themselves, nor a need to survive, and the majority will never take away my right to give an opinion or the freedom of expression to say and comment on this, much less would a government, or a television channel, or a school, or youtube, or facebook, much less a religion.

To respect the well-being and life of every sentient being as much as possible, it is NEVER necessary to love all sentient beings.

And one thing is respect for the well-being and life of every being with the capacity to feel, and another thing is to want to conserve all species; If a being is only going to come to have a life of pain, mistreatment, torture and to be killed, the best thing is that it is not born and that it never exists, regardless of whether it is human or of another species.

Many times the speciesists justify themselves with the fact that if they did not mistreat, torture, use or kill these animals they would become extinct because no one would reproduce them, the truth is that it is better that they become extinct than to reproduce them only to mistreat them, torture them, use

them as things and then kill them, likewise, that it is better that the children who are born only to come to die of hunger or to suffer had never been born.

What the speciesists say is the same as the people on the Right who hate indigenous peoples so much, as demonstrated in my book "In defense of indigenous peoples and paganism" and I will also demonstrate it in my next free book called "Rights of minors and equal rights", will enslave the indigenous peoples, torture, mistreat and abuse them in the present as their conquering ancestors did in the past, and say that if they stop enslaving them, they stop torturing them, they stop mistreating them and they stop abusing them then they become extinct.

Having a life only to come to experience pain and to come to suffer, IS NOT LIFE, IS TO IMPOSE AN EXISTENCE that that life did not ask for.

And, on the other hand, those animals that speciesists such as those in the meat industry and bullfighters do not want to see become extinct in order to continue mistreating, torturing and killing, are animals that, because they have a digestive system larger than that of humans and others Animals generate large emissions of methane and carbon dioxide, much more than a human, much more than other animals and much more than any crop, which generates a lot of pollution.

The consumption of meat and milk always implies the reproduction of those animals and that there are more of those animals, and those animals pollute the environment with large amounts of carbon dioxide and methane, and implies the deforestation of forests and wilderness areas to create grasslands .

As for the consumption of eggs, birds are often kept in a very small space, their beaks are cut to where they have nerve endings and they bleed so that they do not eat the eggs, male chicks are killed and they are also killed to the birds when they stop laying.

In addition, to respect the life of all sentient beings, it is also important to never use leather, wool, fur, silk, or any material that comes from the murder of other sentient beings. To make girdles and shoes there is rubber and synthetic leather, and to make clothes there is cotton that is of vegetable origin and other fabrics that are obtained from vegetable fibers such as linen.

There are certain people who comment and say that hunting, fishing, bullfighting, cockfighting, dogfighting, the use of skins or leather, the consumption of meat or any other product that involves killing should be respected to animals of other species.

Respecting any of those things is respecting murder and it is the same as someone saying that someone should respect someone who tortures and murders a child, it is simply absurd.

It should NEVER matter if a being is human or of another species, if he is intelligent or lacks intelligence, if he reasons or lacks the ability to reason, if he has a soul or lacks a soul. The only thing that should matter is whether a being feels physical pain, emotional suffering, or both by having a nervous system.

There are also people who justify harming other sentient species because they lack the ability to ask for their rights. But human babies, humans who are mute, and humans with severe mental disabilities also do not have the ability to demand or ask for their rights, and no other humans have ever justified being mistreated, tortured, or killed for it.

Other people claim that since beings of other species lack the capacity to be moral agents, then they lack rights. But, human babies and severely mentally handicapped humans are also not moral agents, since no one is born with morals, morals are learned, and mistreating, torturing, or killing those humans for it has never been justified.

In addition, that humans are moral agents and other species lack that capacity, rather what it does is give us a moral obligation both with our species and with other species that feel. To respect mistreatment, torture and murder is to be an accomplice and just as guilty.

Murders and killers should NEVER be respected, NOR tolerated. And respecting the welfare and life of every being with the capacity to feel as far as possible, is NEVER a religion, NOR a sect, NOR a belief; IT IS A VALUE, IT IS MORAL, IT IS ETHICAL.

It is true that human beings have many differences at a biological, cognitive and emotional level with other species, that they have a greater ability to reason, analyze, imagine and invent, however, this will never be a justification for causing harm to other beings with to feel physical pain or emotional suffering as can be the animals of other species.

It is never about choosing between humans or between animals of other species, nor about respecting humans for being human, nor about respecting animals of other species for being animals of other species, it is about respecting the life and well-being of every being with the capacity to feel for the sake of feeling, as far as possible and with certain exceptions.

Although plants and trees are living beings, they completely lack nociceptors and a central nervous system, so they never experience physical pain or emotional suffering, just like bacteria and embryos before the nervous system is formed, which, although they are Living beings also lack the ability to feel physical pain or emotional suffering.

The word life should never be confused with the ability to feel pain or suffering (sentience), since they are totally separate concepts. Many have claimed that plants feel, even people who claim to be scientists, but until now there has never been any evidence to prove it, and we know from biology and neurology what are the biological mechanisms that cause pain and suffering.

It is unfortunate that people believe everything they read in a book, in a documentary, on the internet or in a video, without taking into account the number of montages, frauds and tricks that exist, and that even scientists fall for this . It is also true that there are different degrees in the ability to feel since, depending on the organism, there are more primitive nervous systems such as

those of insects and more developed nervous systems such as that of a mammal.

There are beings with the ability to feel that have a more rudimentary central nervous system and others that have a more developed central nervous system, just as there are sentient beings that have a greater number of nociceptors and sentient beings that have a smaller number of nociceptors.

Knowing and recognizing that there are sentient beings that feel more pain than others, sentient beings that feel less pain than others, beings that can suffer more than others, and beings that can suffer less than others, is never a justification for harming others. who feel less pain, nor those who suffer less.

Respect for the life and well-being of every being with the ability to feel arises from having empathy for the pain and suffering of any being with the ability to feel for the fact of feeling, regardless of whether it is of the same species or of other species, while to humanize other sentient beings is to give them human qualities and characteristics.

In the speciesist society in which we live, when many people say that they defend animals, they only refer to dogs and cats, when all sentient beings should be defended and never just certain species, it seems hypocritical to me that people defend dogs and cats while they eat and use parts of other animals that also feel and also fight to live.

There are people who mention or publish alleged "studies" that prove that according to them plants feel, but it is known that these studies are frauds, plants and trees lack a central nervous system and lack nerve endings to feel, in addition to the lie detector o polygraph is never reliable and has flaws.

In the book "The universe of Carl Sagan", edition of Yerbant Terzian and Elizabeth Bilson, in chapter 13, entitled "science and pseudoscience" by James Randi, we can read: "- A few years ago the work "The Secret Life of Plants " reported millions of dollars to a certain Cleve Backster. It states that by connecting a plant to a polygraph, incorporating several electrodes and threatening to burn it, the detector goes off the scale. Isn't it magnificent? I never thought that plants will have a central nervous system, apparently I was wrong about that; me and all the botanists; however, that got a lot of publicity. To tell the truth, this gentleman did not fail in public opinion until he carried out his latest experiments. And I insist that they do not blame me; the experiment is yours, not mine. The man discovered that by connecting two yogurts together with a wire (please don't laugh, this is science) and inserting a lighted cigarette into one of the containers, the other yogurt would show a reaction on the polygraph; but it is only fulfilled if both containers come from the same culture. This is very important. Believe it or not, that was his conclusion and, of course, at this point he lost some followers within the scientific community."

Many say that plants feel because Daniel Chamovitz, who is a biologist, affirms that plants have senses such as sight, smell, feel and have memory, however, although it is true that plants react to stimuli how do even inert beings

react like a plastic bag, it is impossible for a plant to feel because it lacks a nervous system, plants never have something that can allow them to smell, unlike most animals that do have a nose that allows them to have a sense of smell, plants never have eyes that allow them to see and they never have a brain that allows them to have memories or thoughts.

Daniel Chamovitz is an example of how scientists and science do not always mean the same thing, and how a scientist can be unethical by combining science and pseudoscience, or his subjective and personal beliefs with science, as happens with scientists who believe in the soul, which clarified that we can believe in the soul, but without mixing our belief in the soul with science and making it clear that it is only our belief equal to other beliefs we may have.

Also, it is an example of how what appears in the media such as the newspaper, the internet, the radio or television is not always true, since Daniel Chamovitz, like others who affirm that plants feel, have had much propaganda in the media, and like others it has been an example for more scientists who, without having any scientific evidence that plants feel, affirm that they feel, although they can never prove it.

That plants react to chemical and physical stimuli never means that they can feel, because all objects can react to physical and chemical stimuli, even if we mix two chemical compounds we can obtain reactions.

Other "scientists" like Monica Gagliano, and Stefano Mancuso who has even participated in TED and in the program that pretends to be a scientist called Punset Networks, affirm that plants can communicate, remember and learn, without having any evidence of it and when until now we all know that plants lack a brain (central nervous system) and neurons.

Regarding animal testing, we have been led to believe that it is necessary to save human lives and to know the effects of certain substances on humans, however, there are other scientific methods to evaluate new medicines and products without using animals, such as the following:

1. "In silico" techniques or models developed by computer provide information on the structure, toxicity and effect of substances such as new chemicals or drugs.

2. Biochips are used for the analysis of active substances, using human cells for this purpose.

3. And the In Vitro techniques that using cell culture in the laboratory can carry out analyzes by reproducing complex structures of the human body in test tubes, such as tissue and organ culture, and cell cultures.

If there really is an overpopulation of a species that puts other species and ecosystems at risk, the solution is never murder, the solution is sterilization, there are weapons that are used to shoot darts with a substance that is used to put to sleep and that never kills the animal, while the animal is sleeping it can be sterilized and then released back into its habitat.

It is like giving an example: whites and mestizos are the majority of the world's population, while indigenous peoples are only 5% of the world's population, and there are whites and mestizos, and he clarified that we are not all like that I am only referring to those who are like that, who hate indigenous peoples and want them to be exterminated.

And we have never heard someone say that whites and mestizos must be killed to save the indigenous people, unfortunately many times the indigenous people are not given weapons so that they can defend themselves when they suffer invasions and injustices, unfortunately many times they live in extreme poverty, they have more difficulty finding work, more difficulty receiving help and medical attention, and they are not offered money so that they have many children, stop being the 5% and increase their population in the world.

When there are overpopulations of pigeons, food with substances that sterilize them can be used, murder should never be allowed. And when there are invasive species that put wild species and ecosystems at risk, the solution is to capture those invasive species and return them to the place where they belong, and if it is impossible to move them to the place where they belong; they can be sterilized and taken to shelters, they should never be killed.

The same happens with the overpopulation of domesticated animals that cause problems, the solution should never be to think about killing them, the solution should be sterilization and adoption.

Many of those who propose that animals of other species be killed with the excuse that there is overpopulation, that they put other species at risk and that they cause environmental damage, are the same ones who would consider it a crime that someone proposes to kill many humans for being the most overpopulated species and the one that causes the most damage to the environment.

What happens is that in the sick society in which humans live, it has never mattered whether a being feels physical pain, emotional suffering or both; what matters are other things like being human, or being intelligent, or talking, or being a moral agent, or reasoning, or physical appearance, or beliefs like soul or spirit.

In addition, humans justify the damage they do to other species with the Naturalistic Fallacy (the stupid belief that everything natural is good and should continue), when it suits them they compare themselves with other species of animals to justify being just as natural. predators to those species, having the ability to reflect and feel empathy unlike those species.

Many also justify the consumption of meat by stating that our brain evolved by eating meat for vitamin B 12, but even if that were true, that would never justify the consumption of meat because today we have synthetic vitamin B 12 so if we stop eating meat we will never It would mean that we would stop evolving, and if it were true that meat consumption was what caused the human brain to evolve, today all predatory animals would be just as intelligent as humans.

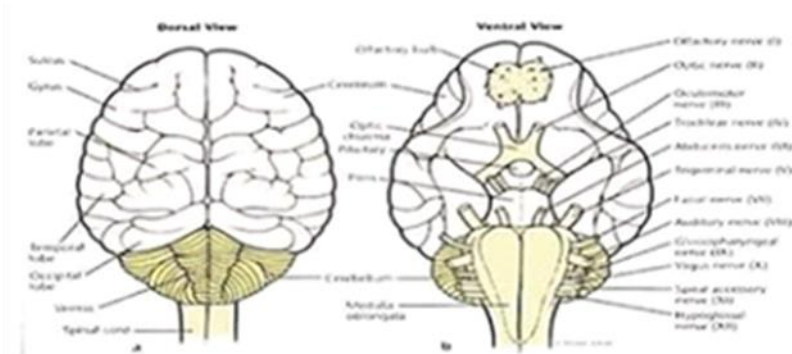

As for the people who believe that the fact that meat tastes good to them and they like it justifies eating meat, this is my answer: if human flesh tasted good or tasty that would NEVER justify cannibalism, the same goes for meat of other animals of other species.

It has never been about liking or disliking the taste of meat, it is about never consuming meat out of respect for life and the well-being of all sentient beings.

In addition, there are options of vegetable meats with a taste very similar to animal meats. Being vegan or simply avoiding consuming products of animal origin NEVER means eating only salads, nor eating grasses, there are many things that can be eaten: fruits, vegetables, grains, vegan desserts, different types of vegan bread.

Avoiding "products" of animal origin in this book is about respect for life and the well-being of all sentient beings, never a matter of health, or dieting, anyone can live without eating sentient beings and eat as many times as you want.

And with respect to all those people who in their fanaticism affirm that their god created animals for us to eat, the following image is what the brain of a pig looks like.

Central nervous system (brain) of a pig, image retrieved from a friend who shared this illustration obtained from scientific sources.

What kind of callous, cruel, and sadistic god would intentionally create "food" in order to be conscious, sentient, and capable of experiencing pain and emotion?

Also, there are the atheists who are speciesists and the skeptics who are speciesists who, according to them, try to refute veganism with which it is to use the Fallacy of Appealing to Emotions, but, this fallacy does not apply to values such as the value of respecting life of animals of other species that is veganism, because if so, it would also have to apply to the value of respecting human life.

These fanatical atheists and fanatical skeptics who are the same as religious fanatics believe that values and ethics mean the same thing as religious and magical beliefs, which is absurd.

The Fallacy Of Appealing To Emotions only occurs when someone affirms that a supernatural being such as a god or spirit exists scientifically because he feels that it does, but animals are not supernatural beings, animals are real beings, for example, in the case of the pagan gods and spirits of nature, I never affirmed that they exist scientifically because I feel that way, I am aware that they are only a belief and I believe in them without affirming that they are the same as science, and I would never mix my beliefs with the science, since they are separate things.

The problem with fanatic atheists and fanatic skeptics is that the same thing happens with fanatic believers in that they think the world is only divided into religion and science.

In the world there is not only religion and science, there is also art and there is also ethics or values that NEVER mean the same as religion nor the same as science, veganism is within ethics or values, and the values or ethics are NEVER less valuable than science.

The same is a speciesist atheist and a speciesist skeptic to a speciesist religious, there is no difference. Science and technology are never good or bad, they can be used for good, but they can also be used for bad, and, in fact, they have been used for bad, as in the case of the Nazi doctors who experimented on children like Josef Mengele, in the case of animal experimentation or in the case of the oil industry.

And also, in many cases, science and technology have been used for good, as in the case of the creation of transgenic bacteria that produce insulin thanks to which many animals were no longer killed to obtain insulin from their liver, as in the case of prostheses, electric cars and green technologies.

What I want to say is that science and technology NEVER mean the same thing as ethics or values, and that ethics or values NEVER mean the same thing as religions and beliefs, although there are some fanatical atheists and fanatical skeptics who confuse the things thinking that one thing is the same as the other.

Be very careful with this: loving animals is not the same as respecting their lives, many people love animals, but see them as simple objects, it is like the father who says he loves his children and mistreats them or like the macho who He says he loves his wife and hits her.

The truth is that I don't care if there are New Ages who are vegans or vegetarians because there are also New Ages and who invent conspiracy theories that attack veganism like Rafa Pal, or with narcissistic and psychopathic traits who enjoy seeing the photo of someone who killed an animal, who affirm that there are animals that are bad because they are ugly and advise killing them, just as I don't care if there are vegan Catholics and vegan evangelicals because they belong to religions that harm animals .

In these times, people believe that being radical and extreme is always a bad thing, but whoever is not radical and extreme in terms of being against child abuse is an accomplice of child abuse, the same is true with the issue of animals that we never they have not harmed nor can they defend themselves, and we are also in times where it is affirmed that all beliefs must be respected, but beliefs that harm should not be respected.

Where are the New Agers "vegans" (in quotes) when the equally narcissistic New Agers who are not vegans justify and defend people who kill animals for pleasure?

What is "bravery", "cowardice", "masculinity" and "femininity" for the "vegans" of the Right?

In sick society, "bravery" and "masculinity" are defined as subduing and harming the weakest, which includes both humans and animals of other species, which is why hunters and bullfighters believe that teaching their children to hunt and fight it is to teach them to be "masculine" and "men", and for this reason minors who mistreat other weaker minors at school and at school feel very "manly"; "Cowardice" and "weakness" are defined as showing compassion and being sensitive to the pain of others, that is why hunters and bullfighters believe that whoever shows compassion and is sensitive to the pain of animals is "weak", "feminine" or "coward."

The problem with the "vegans" (in quotes) of the Right is that they do not understand that for many "courage" is to be cruel and insensitive to the weakest as with animals of other species, for example, with a lamb or with a rabbit that they are defenseless animals that cannot defend themselves, in fact, that is why hunters and bullfighters believe they are "brave", and that for many "cowardice" is showing compassion, that is why for a hunter or bullfighter to have compassion for the pain of animals It is "cowardice".

Therefore, I do not understand why the "vegans" of the Right believe they are "vegans" if they are not really, they are also based on Social Darwinism and on Fallacies such as the Naturalistic Fallacy or Fallacy of Appeal to Nature, which is exactly the fallacy that Specists use that since there is predation in nature, it is good for man to be a predator to demonstrate "manliness" (in quotes), in fact, the men who are an ideal for them, that is, the rude and cruel, are the ones who they hunt and are bullfighters, and they consider as "weak" those who do not kill or torture animals.

The Naturalist Fallacy is the same Social Darwinism on which Nazism, neo-Nazis, The Church of Satan, certain forms of paganism such as Norse or Viking, machismo and The Temple of Seth are based. An example of Social Darwinism is taught in a disgusting book entitled "POWER IS REASON" by RAGNAR REDBEARD on which Anton Szandor LaVey based his writing on "The Satanic Bible", some excerpts from the repulsive book called "POWER IS REASON" are:

- - "He who is to govern the coming century must be harsh, cruel"

- - "The mission of power is to control and exploit the weak, because they are incapable"

- - "Cursed are the weak because they will inherit the yoke."

- - "Cursed are the weak, because they will be exterminated"

- - "How women admire men of leonine resolutions and principles of the eagle. How they detest the cowardly, the kind, the weak, the effeminate, and the unsuccessful. There is no character in history who has been so universally applauded as the bold man, the bad guy, the rebel and the mighty conqueror."

Unfortunately it is true that many women fall in love with men who are insensitive and cruel, and worse still, have children with these men, which is unfortunate because both these men and the women who fall in love with them should be sterilized, and those women who fall in love with those men are NOT innocent victims of machismo, in reality, they are just as accomplices and just as guilty.

But, although it is true that many women fall in love with these types of men, it is a lie that they all fall in love with these types of men, it is not possible to generalize or put all women in the same bag, just as we cannot generalize nor put all men in the same bag because we are not all macho, nor are we all rapists, nor are we all aggressors, and he clarified that both the fact that a woman and a man defend themselves does NOT make them macho.

Not all men are the same, nor are all women the same, there is everything, and there will also be women who hate those men who believe that being cruel both to animals of other species and to humans they consider weaker as indigenous and other, that being insensitive, harming the weakest, lacking compassion and lacking empathy, according to them makes them "strong", "brave", "powerful", "masculine" or "men" to how we men exist that we hate so much men and women who think that way, without distinction of sex.

Who is cruel to animals of other species or to humans who have never hurt him or can defend themselves, who is insensitive, who harms the weakest, who lacks empathy and compassion, is NOT strong, NOR is he brave, NOR is he powerful, he is NOT male, he is NOT male, he is just a coward and a piece of trash who should have been aborted and should not have been born regardless of his sex and regardless of his sexual orientation.

In any case, a person who hunts for pleasure and without being a necessity to survive, is a male chauvinist who believes that harming a defenseless being and that he cannot defend himself makes him "powerful", "strong" or "brave" when he is just a coward who should have been aborted for harming both animals of other species and humans who did no harm to him and who cannot defend themselves.

It is always the Right-wing parties like VOX or Donald Trump that support hunting and bullfighting the most, and also those that support religion and conspiracy theories the most, and those who most defend hunting and bullfighting.

There are ecologists who are also speciesists and have proposed killing animal species considered invasive to protect ecosystems, forgetting that humans are the most invasive and destructive species of ecosystems that exists.

Environmentalists justify why they kill cats in bloody ways. Recovered from: <https://www.infobae.com/america/vice/2017/09/22/ecologistas-explican-como-y-por-que-matan-a-los-gatos/>

It seems to me a crime that these fanatical environmentalists justify killing cats because they extinct other species, but none of these would kill or justify killing humans because they are the species that most extincts species, the most overpopulated, the one that most destroys forests, the one that throws poop and garbage in the rivers and in the sea, the one that throws poisons into the rivers and the sea, the one that destroys wild areas to make pastures and the one that pollutes the most, the one that invades indigenous territories, being the indigenous people the original inhabitants of the continent of America, they torture them, kill them, promote hatred towards the indigenous people and want to exterminate them, but of course since it is human life they cannot propose to kill it, but since they are cats it seems perfect to them.

Racism is also something that affects animals of other species, speciesist people believe that black animals are bad luck and many times black animals are the least adopted just because of their color, and there are people who even he justifies harming some animals because they seem ugly to him.

Regardless of the color and physical appearance of an animal, regardless of whether they appear cute or ugly to us, animals of other species deserve the same respect for their lives, regardless of their color, regardless of their appearance and regardless of whether they appear cute to us or ugly; and animals of all colors should be adopted equally.

Black animals such as black cats and others are the most used in sacrifices, and the belief that black animals attract bad luck makes them the least adopted, which is why Right-wing neo-Nazis who believe they are "vegans " that abounds so much in Facebook groups as a disgusting group called "Vegans / Politically Incorrect Vegetarians (uncensored debate)" where there is a neo-Nazi who calls herself UmyRoxy RM and who has two channels on YouTube with the names "El Feminismo Actual no is Equality" and "A Patriarchal Girl" do not realize that the racism they promote is something that also harms animals of

other species and therefore, by promoting something that also harms animals of other species, In NO way can they be considered "vegans" or "animalists".

That UmyRoxy RM is a neo-Nazi can be verified because in many publications she defends Hitler, for her Hitler never did anything wrong and everything Hitler did was for the good of humanity, we can always see this in the Right that appears to be very good, currently attacks feminism stating that all feminists are misandrical and hate men, and that they attack the Left with the purpose of defending the Right and where evil purposes are hidden that lead to the defense of harmful ideologies such as Nazism or Christianity that is speciesist from its roots since it is based on the bible where it is written that this god preferred the animal sacrifices of Abel and rejected the vegetable offerings of Cain, and that he told Noah that they could eat all animals and that they cause fear, these false "vegans" simply do NOT reason, but they think they are very "intelligent".

Screenshot where UmyRoxy RM states the following: Due to the death of his mother from cancer, Adolf Hitler developed a deep interest in health issues, especially cancer treatment. Recovered from:

## Prejuicios contra los perros negros: ¿existen realmente?

PARA LOS AMANTES DE PERROS

Prejudice against black dogs: do they really exist? Recovered from: <https://www.rover.com/blog/es/prejuicios-perros-negros/>

A nonsense that many people believe is that being vegan is eating only lettuce or salads, something that shows ignorance, there are imitations of meat that are vegan with a very similar flavor, vegan cheeses, vegan desserts, vegan pizzas, vegan ice creams, vegan burgers, vegan ceviches, vegans can eat French fries with vegan mayonnaise and tomato sauce, a wide variety of sweet and savory vegan breads, vegan cakes, a wide variety of fruits, a wide variety of vegetables, and a wide variety of seeds, being vegan has NEVER meant eating only lettuce, nor eating only salads.

Other people in their ignorance say that it seems hypocritical for a vegan to consume vegan meat imitations with a taste very similar to animal carcasses, which is also ignorance, because it is not about being vegan because we do not like the taste of carcasses of animals, it is about being vegan out of respect for the life of animals of other species, therefore, it is not hypocritical to consume

vegan products that imitate the taste of animal carcasses, that imitate the taste of dairy products or that imitate the taste of the egg.

Mithraism and Zoroastrianism, were religions of Persian origin, the Persian god Mithra was presented killing a bull and also a ritual for Mithra was the sacrifice of a bull, with which the relationship with bullfighting is clearer. In the cult of Mithra, a ritual banquet similar to the Christian Eucharist was held.

Statue of the Persian god Mithra slaying a bull and relief of Mithra slaying a bull. Images retrieved from: [https://es.wikipedia.org/wiki/Mitra\\_\(dios\\_persa\)](https://es.wikipedia.org/wiki/Mitra_(dios_persa)) and [https://es.m.wikipedia.org/wiki/Archivo:Mithras\\_tauroctony\\_Louvre\\_Ma3441b.jpg](https://es.m.wikipedia.org/wiki/Archivo:Mithras_tauroctony_Louvre_Ma3441b.jpg)

The cult of Mithra was macho, only men could belong to the cult of Mithra and it was a very popular cult among Roman soldiers.

The only thing that should matter to value and respect a life is that it can feel physical pain, that it can suffer emotionally or both by having a nervous system, never that evil that monotheistic religions and their books teach that it be human, intelligent, reason or have a soul.

At present, thanks to science we know that having a central nervous system (brain) and nociceptors (nerve endings of pain) is what makes it possible for a being to feel physical pain, and that having a brain (system central nervous) with a limbic system is what makes a being able to suffer emotionally.

Science has also proven that most animals of other species feel physical pain as they have a central nervous system (brain) and nociceptors (nerve endings of pain), and also that they suffer emotionally as they have a limbic system in their brain. It has even been proven that fish feel stress, since like humans, fish have the pituitary gland in the brain, which is the gland where stress is produced.

Speciesism consists in believing that only human life has value and deserves respect, and that the life of other sentient beings lacks value and does

not deserve respect, but it is also believing that only the life of dogs and animals cats have value and deserve respect, while the life of animals of other species than cats and dogs lacks value and does not deserve respect.

In the bible it is written that only the human being was created in the image and likeness of this god that is the same as the Jews, the Christians and the Islamic, this, the believers interpret it in two ways, one is that only the human beings have a soul because they are created in the image and likeness of that god, and therefore, only humans have dignity and deserve respect for their lives, and another that animals of other species have a soul, but only the human soul it

is created in the image and likeness of that god, and therefore according to these religions only human life has value, dignity and deserves respect.

In addition, from the Old Testament of the Bible, this god tells the human being to dominate the animals of other species, with which this god gives authority to humans to mistreat, torture and kill animals of other species, because it is understood that this god created the animals of other species to be used as if they were objects by the human being.

Genesis chapter 1, verse 26: "And God said, Let us make man in our image, after our likeness; and exercise dominion over the fish of the sea, over the birds of the sky, over the cattle, over all the Earth, and over every creeping thing that creeps on the Earth."

Only the religions that believe in this god such as the Jewish, Christian and Islam are the ones that say that animals do not have souls, therefore, most people assume that we all believe that animals of other species do not have souls, and if one believes that they have a soul for the majority it means that one is crazy, what they do not realize is that they are quite out of their minds for believing in a god as bad as this one.

In other cultures, it is believed that animals do have a soul, there are even cultures that believe that everything that exists has a soul, these cultures also had a meaning for the soul and the spirit different from that given by Christianity, it is necessary to clarify, that the soul and the spirit are religious or magical beliefs, and not a scientific fact, although there are scientists who lack ethics by mixing their religious beliefs with science, there are even Right-wing doctors like the Argentine Chinda Brandolino who promote conspiracy theories against vaccines and are a danger to public health.

But let's suppose for a moment that soul and spirit existed as a scientific fact, and not as a personal belief one might have, and that only humans had soul and spirit, and not animals of other species, still, It is irrelevant if the animals of other species have a soul or not, the only thing that should matter to value and respect a life is that it can feel by having a nervous system.

These people say that this god is good and compassionate, but their god says in his word, which is the bible, that he created animals of other species for us to eat and use.

What kind of "good" and "compassionate" god creates sentient beings for humans to eat and use? If he is good and compassionate, why didn't he create them without the ability to feel and without a nervous system? that we eat and use them?

Genesis chapter 9, verses 2 and 3: "The fear and fear of you will be on every animal of the earth, and on every bird of the heavens, on everything that moves on the earth, and on all the fish of the sea ; they are delivered into your hand. Everything that moves and lives will be for your maintenance."

I am a vegan, and for the same reason, I would never believe in this god, nor in Jesus Christ, but there are "vegans" who, if they believe in this god and in

Jesus Christ because they are Jewish, Christian or Islamic, and justify that part of the bible affirming that after the flood there were no seeds, fruits and vegetables to eat, and that is why their god allowed the human being to eat animals of other species.

But, if we know how to read well and we read this part of the bible well, it is not simply that this god allowed humans to eat animal carcasses (meat) to survive, it is that this god explicitly asks humans to cause them fear and terror of animals of other species before eating them, at no time does he tell them to kill them quickly and with as little pain as possible, on the contrary, by asking them to cause them fear and terror he is asking them to mistreat and torture them, demonstrating again how evil this god and his believers are.

Also, these same "vegans" who in their ignorance and perhaps in their wickedness think that Abel was a good person and that Cain was a bad person, forgetting that the conflict between these two brothers was caused by this same god, preferring precisely the sacrifices of defenseless lambs that Abel offered him and reject the vegetable offerings that Cain offered him.

What kind of "vegans" (in quotes) if they can be called "vegans" believe in a god who prefers animal sacrifices and rejects vegetable offerings?

It must also be understood that at present many call themselves "vegans" for a diet, for a spiritual belief inspired by Buddhism or the New Age, for health or for the environment, and not for the animals of other species, when that is called strict vegetarianism and not veganism, veganism is only out of respect for the life of animals of other species.

Genesis chapter 4, verses 3, 4 and 5: "Time passed, and one day Cain presented to God an offering of the fruits that he cultivated. For his part, Abel chose the fattest first offspring of his sheep, and took them to God as an offering. God received Abel's offering with great pleasure, but he did not receive Cain's offering with the same pleasure. This upset Cain very much, and you could see how angry he was on his face."

When Adam and Eve ate the fruit of the forbidden tree and discovered that they were naked, this god made clothes for them with animal skins, being an almighty god who could make clothes for them with matter of vegetable origin such as cotton or linen, that is why, that even the belief in this god and in the stories of the bible serves as a justification for those who make coats and other clothing with animal skins, and for the famous insensitive to the pain of animals of other species who use animal skins as Spanish singer Rosalia.

Genesis chapter 3, verse 21: "And God made coats of skins for a man and for his wife, and clothed them."

Spanish singer Rosalía wearing coats made from animal skins. Images retrieved from: <http://www.lasrosas.com.ar/portal/rosalia-usa-pieles-de-animales/> and <https://www.eleconomistaamerica.com/ocio/noticias/9986798/07/19/Rosalia-desata-la-ira-de-sus-fans-por-lucir-abrigos-de-piel.html>

But, regardless of all this evidence that shows that this god is speciesist, as the bible contradicts itself, there will continue to be "vegans" believers in this god who show parts of the bible that seem to "defend" animals, forgetting that there are more parts of the bible that harm animals than those parts that they show, forgetting that many people justify their speciesism with the bible and that as long as people believe in this god as the majority is speciesist, they will continue to justify their speciesism with the bible.

And also making vegans laugh a lot that we are consistent and do not believe in that god or in Jesus Christ by affirming that a speciesist and cruel god with animals according to them will punish people who mistreat, torture and kill animals of other species, when that god approves of all the harm that these people do to animals and those people who harm animals are believers in that god.

In addition, there are many parts of the bible where that god asks for sacrifices of animals that, being herbivores, are defenseless and affirms that the aroma of the meat of those sacrificed animals is very pleasant when it is burning, really these people who believe defending the life of animals with the bible does not realize that the bible is actually the cause of speciesism.

Genesis chapter 8, verses 20 and 21: "Then Noah built an altar to the Lord, and on that altar he offered clean animals and clean birds as burnt offerings. When the Lord perceived the pleasant aroma."

There is even a part where the god of the bible says that he admires one of his prophets for being a great hunter.

Genesis chapter 10, verse 9: "He was a mighty hunter before the Lord; therefore it is said: Like Nimrod, a mighty hunter before the Lord."

Genesis chapter 15, verses 9 and 10: "And he said to him, Bring me a three-year-old heifer, and a three-year-old goat, and a three-year-old ram, a turtledove also, and a pigeon. And he took all these, and divided them in the middle, and put each half one opposite the other; but he did not split the birds."

Exodus chapter 16, verses 12 and 13: "I have heard the murmurings of the children of Israel; speak to them, saying, At evening you shall eat meat, and in the morning you shall be satisfied with bread, and you shall know that I am the Lord your God. And when evening came, quails came up and covered the camp; and in the morning the dew fell all around the camp."

Exodus chapter 24, verses 5 and 6: "And he sent young men of the children of Israel, and they offered burnt offerings and calves as peace offerings to the Lord. And Moses took half of the blood, and put it in bowls, and sprinkled the other half of the blood on the altar."

Exodus chapter 29, verses 11, 12 and 13: "And you shall kill the calf before the Lord, at the door of the tent of meeting. And of the blood of the calf you shall take and put on the horns of the altar with your finger, and you shall pour out all the other blood at the foot of the altar. You shall also take all the fat that covers the intestines, the fat that is on the liver, the two kidneys, and the fat that is on them, and burn it on the altar."

Exodus chapter 29, verses 16, 17 and 18: "And you shall kill the ram, and sprinkle its blood on the surrounding altar. You shall cut the ram into pieces, and wash its intestines and its legs, and put them on its pieces and on its head. And you shall burn the whole ram on the altar; It is a burnt offering of a pleasing aroma to the Lord, it is a burnt offering to the Lord."

Leviticus chapter 11, verses 1, 2 and 3: "The Lord spoke to Moses and Aaron, saying: Speak to the children of Israel and tell them: These are the animals that you will eat from among all the animals that are on the earth. Of all the animals, everyone that has a cloven hoof and chews the cud, this one you will eat."

Leviticus chapter 22, verses 26 and 27: "And the LORD spoke to Moses, saying, Whenever a calf, a lamb, or a kid is born, it shall remain seven days with its mother, and from the eighth day onward it shall be acceptable as a sacrifice offering on fire to the LORD."

Deuteronomy chapter 12, verse 15: "However, you may kill and eat meat within all your gates, according to your desire, according to the blessing that the LORD your God has given you; the unclean and the clean may eat it, as if it were gazelle or deer."

Deuteronomy chapter 14, verses 4 and 5: "This is the list of animals that you may eat: bulls, lambs, kids, deer, gazelles, fallow deer, mountain goats and all kinds of antelopes."

Isaiah chapter 34, verses 6 and 7: "The sword of the Lord is full of blood, It is full of fat, with the blood of lambs and goats, With fat from the kidneys of rams. For the Lord has a sacrifice in Bozrah, And a great slaughter in the land of Edom. With them will fall buffalo AND steers along with bulls. So their land will be drunk with blood, And their dust will be greased with tallow."

Jeremiah chapter 7, verse 21: "Thus says the Lord of hosts, the God of Israel: "Add your burnt offerings to your sacrifices and eat the meat."

There are vegans, especially New Age vegans, who claim that there are apocryphal gospels such as "The Gospel of the Twelve Saints" or "The Essene Gospel of Peace" where Jesus Christ, according to them, defends animals from other species.

However, regarding "The Gospel of the Twelve Saints" apparently this gospel was never an authentic gospel and was a gospel invented by an occult priest named Gideon Jasper Richard Ouseley, but even if this gospel was authentic, in this Gospel Jesus Christ makes it very clear that his father is the same god of Abraham and Moses, that is, the same god of the Old Testament, if Jesus Christ really defended animals of other species:

What is he doing claiming that his father and god is the same speciesist god of the Old Testament?

Excerpt from "The Gospel of the Twelve Saints": "God said to him: I am the god of Abraham, Isaac and Jacob."

As for "The Essene Gospel of Peace" in this gospel it is written that Jesus Christ endorses the consumption of milk and honey, for a cow to produce milk first it becomes pregnant and when the calf is born, if it is male, most of the time it becomes pregnant. It is taken to the slaughterhouse because it is not profitable, and as for honey, in the process of extracting the honey, bees and bee larvae are crushed to death.

Excerpts from "The Essene Gospel of Peace": "And Jesus milked a sheep that was feeding among the grasses. And I pour the milk on the sand." "The milk of animals is good for food and honey for bees."

As for the canonical gospels, in them, Jesus Christ and his disciples were speciesists, Jesus Christ said that human life was worth more than the life of birds, he multiplied fish for humans to eat, he helped his disciples to fish, he expelled some demons of a man, allowed them to enter some pigs and then caused them to drown in the water, and in addition, both Jesus Christ and his disciples participated in the Passover where a lamb is sacrificed, and in the New Testament consumption is also supported of animal carcasses (meat).

Matthew chapter 6, verse 26: "Look at the birds of the air, they do not sow or reap or gather into barns; and your heavenly Father feeds them. Aren't you worth much more than they?"

Matthew chapter 14, verse 19 and 20: "Then he commanded the people to lie down on the grass; and taking the five loaves and the two fish, and raising his eyes to heaven, he blessed, and broke and gave the loaves to the disciples, and

the disciples to the multitude. And they all ate, and were satisfied; and they picked up what was left of the broken pieces, twelve baskets full."

Mark chapter 5, verse 2: "And when he got out of the boat, immediately a man with an unclean spirit met him from the tombs. And he begged him very much not to send them out of that region. A large herd of pigs was grazing there near the mountain. And all the demons begged him, saying: Send us the pigs so that we can enter them. And then Jesus gave them permission. And those unclean spirits came out and entered the pigs, which were about two thousand; and the herd rushed down a steep bank into the sea, and were drowned in the sea."

Mark chapter 6, verses 41, 42 and 43: "Then He took the five loaves and the two fish, and looking up to heaven, blessed them; He broke the loaves and gave them to the disciples to serve them; he also divided the two fish among all. They all ate and were satisfied. They collected twelve baskets full of the pieces, and also of the fish."

Mark chapter 8, verses 7, 8 and 9: "They also had a few little fish; and he blessed them, and commanded that they also set them before. And they did eat, and were satisfied; and they gathered from the pieces that were left over, seven baskets. They were the ones who ate, about four thousand; and sent them away."

Luke chapter 8, verses 27, 28, 30, 31, 32 and 33: "When he came ashore, a man from the city met him who had been demon-possessed for a long time; and he did not wear clothes, nor did he dwell in houses, but in the tombs. When he saw Jesus, he let out a great cry, and prostrating himself at his feet exclaimed with a loud voice: What do you have with me, Jesus, Son of the Most High God? I beg you not to torment me. And Jesus asked him, saying, What is your name? And he said: Legion. Because a lot of demons have entered him. And they begged him not to send them to the abyss. There was a herd of many pigs that grazed on the mountain; and they begged him to let them enter them; and gave them permission. And the demons, coming out of man, entered the pigs; and the herd rushed down a steep bank into the lake, and was drowned."

Luke chapter 9, verses 16 and 17: "And taking the five loaves and the two fish, looking up to heaven, he blessed them, and broke them, and gave his disciples to set them before the people. And they all ate, and were satisfied; and they picked up what was left over, twelve baskets of broken pieces."

Luke chapter 12, verse 24: "Consider the ravens, which neither sow nor reap; They don't have a pantry or a barn, and God feeds them. Are you not worth much more than birds?"

Luke chapter 22, verses 7 and 8: The day of unleavened bread arrived, in which it was necessary to sacrifice the Passover lamb. And Jesus sent Peter and John, saying, Go, prepare the Passover for us to eat."

John chapter 21, verses 3, 4, 5, 6, 9, 10, 11 and 12: "Simon Peter said to them: I am going to fish. They told him: Let's go with you too. They went, and got

into a boat; and that night they caught nothing. When it was already dawn, Jesus appeared on the beach; but the disciples did not know that it was Jesus. And he said to them: Little children, do you have anything to eat? They answered him: No. He said to them: Cast the net to the right of the boat, and you will find some. So they threw it out, and they couldn't get it out anymore, because of the large number of fish. Going down to land, they saw coals laid, and a fish on top of them, and bread. Jesus said to them: Bring some of the fish you have just caught. Simon Peter went up and pulled the net to land, full of large fish, a hundred and fifty-three; and even though there were so many, the network was not broken. Jesus said to them: Come, eat. And none of the disciples dared to ask him: You, who are you? knowing that it was the Lord."

1 Corinthians, chapter 10, verse 25: "Of all that is sold in the butcher's shop, eat, without asking anything for reasons of conscience."

As long as people continue to believe in the god of the Bible and in Jesus Christ, speciesism will continue to exist, but here it is also important to clarify that if someone becomes a vegan without reading scientific sources on vegan nutrition and without taking vitamin B 12, they can get sick. by having nutritional deficiencies and therefore abandoning veganism, and worse yet, making minors ill if they are not properly advised, as happens with many New Age vegans who mix veganism with Naturalistic Fallacy, with naturalism and with pseudoscience.

Both in the Old Testament and in the New Testament of the Bible there are parts in favor of human slavery, so I do not understand why many people consider the Bible a book of values, morals or ethics, it is absurd and illogical.

Exodus chapter 21, verse 7: "If anyone sells his daughter into slavery, she cannot go free like the male slaves."

Exodus chapter 21, verses 20 and 21: "If someone strikes his male or female slave with a stick, and as a result of the blow he or she dies, his crime will be punished. But, if after one or two days the slave recovers, the aggressor will not be punished because the slave was his property."

Leviticus chapter 25, verse 44: "As for the male and female slaves that you may have from the heathen nations around you, from them you may purchase male and female slaves."

And many people believe because of the brainwashing that they do, they believe that human slavery is something that is only supported in the Old Testament, but as we will see, human slavery is also supported in the New Testament, and for proof of this we can read the following parts of the bible.

Colossians, chapter 3, verse 22: "You male and female slaves must obey your masters here on earth in everything. Do not do it to look good with them, and only when they are looking at you. Rather, do it sincerely and out of respect for the Lord."

1 Timothy chapter 1, verse 6: "Let all who are under the yoke of slavery consider their masters worthy of all honor, lest the name of God and the doctrine be blasphemed."

Both Colossians and 1 Timothy are New Testament gospels, not Old Testament gospels.

If a pagan culture had written a book with parts in favor of human slavery, the majority would find it immoral, unacceptable and totally reprehensible for being pagan gods and a pagan culture, and since the ignorant believe that the pagan gods are the devil, they would say which is a book of the devil.

But, since he is the god of the bible and it is the bible, they think it is good that it contains parts in favor of human slavery and they justify it, and they always come up with the same story: what suits them like the story of Adam and Eve, the story of Noah's boat, the story of hell and the devil, and the story of the life and miracles of Jesus Christ, they always say that it is as it is written, and what does not suit them as the parts in favor of slavery human say they are metaphors or symbolic.

And for those who do not believe that all these atrocities are written in the bible, you can look for these chapters and verses of the bible to verify for yourself that these atrocities are written in the bible, and that the bible is evil at its best. .

In some bibles, the word slave is translated as servant, but in any case, they mean the same thing, at the time when the bible was written slaves were also called servants.

In many parts of both the Old Testament and the New Testament, the Bible is a macho book that denigrates women, places women as a symbol of sin and inferior to men.

Genesis chapter 3, verse 16: "To the woman he said: I will greatly multiply your pain in childbirth, with pain you will give birth to children; and yet your desire will be for your husband, and he will have dominion over you."

Although, both Adam and Eve disobeyed that god by eating the forbidden fruit and obeying a talking snake, which is absurd, it looks like that god whom they curse with pain in childbirth, pain in giving birth to the children and to submit to the husband, which is clearly machismo, it is to the woman and never to the man, since Genesis the machismo of this god is seen.

In another part of Genesis, when some angels visit Lot, the men of Sodom approach Lot's house with the intention of raping those angels, but Lot decides that it is best to give the population of Sodom his two daughters. so that they do with them what they want, that is, so that they rape them instead of the angels, which makes it very clear how little value women had for the prophets of that god and how this god approved what Lot did by never punishing him for giving up his daughters to be sexually abused.

Genesis chapter 19, verses 6, 7 and 8: "Then Lot went out to them at the door, and shut the door behind him, and said, I beseech you, my brothers, do not do such wickedness. Behold now I have two daughters who have not known a man; I will take them out for you, and do with them as you see fit; only that you do nothing to these men, for they came under the shadow of my roof."

In another part of the bible, that god says that if a woman gives birth to a son she will be impure for seven days, but if a woman gives birth to a daughter she will be impure for two weeks, this makes it clear that for him god of the bible having a daughter is more impure than having a son, which makes it clear that for him the life of women is inferior to the life of men.

Leviticus chapter 12, verses 2 and 5: "When a woman conceives and gives birth to a child, she will be unclean for seven days, as she is at the time of her menstruation. If she gives birth to a girl, the mother will be unclean for two weeks."

Even this god in one part orders the women of a people who disobeyed him to be raped. What kind of "good" god orders women to be raped to punish a people? Only a male chauvinist, perverse and immoral god orders such a thing.

Isaiah 13, verses 16 and 17: "Their children will be dashed to pieces before them; their houses will be looted, and their women raped. Behold, I stir up the Medes against them."

And many people in their ignorance will say that these macho parts only exist in the Old Testament, but the reality is that the New Testament is also macho, denigrates women, considers them a symbol of sin and inferior to men.

1 Corinthians, chapter 11, verses 6, 7 and 8: "For if a woman does not cover herself, let her also cut her hair; and if it is embarrassing for a woman to cut her hair or shave it off, let her cover herself. Because the man should not cover his head, because he is the image and glory of God; but the woman is the glory of the man. For the man does not come from the woman, but the woman from the man."

As we can see in the previous passage of the New Testament, because Corinthians is a gospel of the New Testament, it is affirmed that only man is the image and glory of God, while woman is the glory of man and that woman comes from man equal to as in the Old Testament it is written that Eve was created from Adam's rib, this clearly implies that the woman is inferior to the man and that the man is superior to the woman, and not equal in value, again this proves that on the one hand the god of the Old Testament is the same as that of the New Testament and that this god is clearly male chauvinist.

1 Corinthians, chapter 14, verses 34 and 35: "Let your women be silent in the congregations; because they are not allowed to speak, but they must be subject, as the law also says. And if you want to learn something, ask your husbands at home; because it is unseemly for a woman to speak in the congregation."

1 Timothy chapter 2, verses 11, 12 and 13: "Let the woman learn quietly, with all obedience. I do not allow women to teach or exercise authority over men, but to remain silent. Because Adam was created first, then Eve."

The bible is the origin of machismo in this Judeo-Christian culture.

It is true that machismo also existed in the ancient Romans and in the Vikings it existed, but, not in the sense of discriminating against women, in the

Vikings machismo existed in the sense of thinking that being cruel and insensitive with other humans or with animals of other species according to them was "bravery", "power" or "strength", the Vikings were a culture based on Social Darwinism that consists of subduing or eliminating the weakest as sacrificing the weakest children to their gods, for That is why people on the Right, even if they are Catholics or Evangelicals, are attracted to Vikings and that is why the Nazi occultism was based on the Vikings.

This has nothing to do with forgiving everything, or turning the other cheek. In order not to forgive everything, not to be able to turn the other cheek and defend oneself, we must NOT harm the weakest, nor those who have never harmed us, nor must we harm those who cannot defend themselves, I clarify this, because, although I am a pagan, there are pagans who also say or write stupid things.

I am a pagan and there are good pagans, but there are also bad paganisms like the Viking that go hand in hand with the Right. People are brainwashed into thinking that the Right is all about trade and economic freedom.

If the Right was only trade and economic freedom, it wouldn't seem bad to me. But, the Right is not just about trade, it is not just about economic freedom.

The Right is the conservative and the conservative is machismo, racism, nationalism that divides human beings with countries and causes conflicts between people unborn in one country or another, it is hatred of indigenous peoples as I verified in my book "In Defense of Indigenous Peoples and Paganism" is homophobia, it is speciesism and it is Christianity, therefore, the Right is evil at its best.

To be against the Right it is not necessary to be a communist, I clarify this, because they also brainwash people into thinking that all of us who are against the Right are communists. You can be against the Right without being a communist, and you can be against the Right and be a communist, one thing has nothing to do with the other.

Returning to the theme of bad pagans, these pagans believe that defending oneself, not turning the other cheek and not forgiving everything is the same as harming the weakest, the same as harming those who cannot defend themselves and the same as harming those who do not. They have done harm, whether these are humans or animals of other species, this is stupid, they think that way because they are sexist and bad people.

Not turning the other cheek, not forgiving everything and defending yourself, NEVER means the same as harming the weakest, NEVER means the same as harming those who cannot defend themselves and NEVER means the same as harming those who have never harmed us.

Who harms the weakest, who harms those who cannot defend themselves and who harms those who never hurt him, is not brave, is not powerful and is not strong. Who harms the weakest, who harms those who cannot defend themselves and who harms those who have never hurt them, is just a coward, a

criminal, garbage, someone who should not exist and someone who should never have been born.

However, in this Judeo-Christian culture, machismo and misogyny are justified by the Bible. To end machismo and misogyny, you must first end its root, which is the Bible.

The devil does not exist. The belief in the devil is a Judeo-Christian invention to defame, torture, murder and destroy pagan cultures.

The belief in the devil was used by evil Christian people in the inquisition and in the conquests to defame, torture and murder other people who had other beliefs, and who thought differently from Christianity, it is a belief stained with blood and therefore, the Belief in the devil is evil at its finest.

Also, the belief in the devil has caused the torture and murder of people from indigenous cultures in the present due to the Right-wing parties such as the Bolsonaro of Brazil and the previous perverse government that was in Bolivia of Jeanine Añez, as I checked in my book "In Defense of Indigenous Peoples and Paganism".

The belief in the devil and the antichrist has caused the murder of children, therefore, the belief in the devil and the antichrist should be considered a crime in all countries of the world, and whoever promotes the belief in the devil and in the the antichrist should have harsh sanctions throughout the world, also, laws should be passed throughout the world to prohibit promoting belief in the devil, in demonic possession and in the antichrist in movies, television programs and series .

The belief in Jesus Christ and the Antichrist are beliefs invented by Christianity, silly beliefs that cause madness and on many occasions cause fanatical people to commit crimes against minors, and I hold the media such as television and newspapers directly responsible. or newspapers, and the entertainment industry such as movies and series, for these crimes, since they promote these nefarious beliefs.

Some examples of crimes committed by people who have those Christian beliefs that the devil exists and that an antichrist will be born are:

- Rosa González was a girl murdered by her own mother and by another healer who tore her uterus to pieces claiming that she was pregnant by the devil.

- The UFO and New Age sect called "The Order of the Solar Temple" stabbed to death and staked a baby through the heart claiming he was the antichrist. These New Age sects like the ones that believe that UFOs are extraterrestrial ships that will come to save humanity are a form of modern Christianity since they affirm that Jesus Christ exists and that he is the greatest Ascended Master or that he is the most evolved extraterrestrial, they are racists and also believe that an antichrist will be born.

- In Chile, a Christian sect murdered a baby whom they burned alive claiming he was the antichrist. The leader of the sect called himself "Antares of light".

Rosa González, an 11-year-old girl, and Emmanuel Dutoit, a 3-month-old boy, were murdered by people who have these Judeo-Christian beliefs in the devil and in the antichrist, most believe in these nonsense of Christianity and therefore are guilty also for these murders. Photographs retrieved from:

[https://www.elconfidencial.com/espana/2019-09-20/sucesos-caso-exorcismo-almansa\\_2242715/](https://www.elconfidencial.com/espana/2019-09-20/sucesos-caso-exorcismo-almansa_2242715/) and

[https://pseudociencia.miraheze.org/wiki/Emmanuel\\_Dutoit](https://pseudociencia.miraheze.org/wiki/Emmanuel_Dutoit)

Movies like "Rosemary's Baby" and "The Exorcist", and series like "Supernatural", are proof of how the media such as television and the entertainment industry promote this nonsense that Christianity believes in as the devil and the antichrist that throughout history and up to the present have caused crimes against human lives, in many cases, against children. Images retrieved from: [https://doblaje.fandom.com/es/wiki/El\\_bebé\\_de\\_Rosemary](https://doblaje.fandom.com/es/wiki/El_bebé_de_Rosemary) , <https://www.ecartelera.com/peliculas/el-exorcista/> and <https://www.amazon.com/-/es/dp/B08LWVV6K2>

These crimes against children caused by Christianity with these nonsense of believing in the devil and the antichrist, should be remembered by all, so that the whole world knows how disastrous the Christian beliefs promoted by the Christian religions, the Right, are, and the crazy conspiracy theorists who are also Christian fanatics and part of the Right.

A lie that the New Agers sometimes tell is that Jesus Christ worshiped a different god than the one in the Old Testament, but in the New Testament, Jesus Christ says that his father is the same god as Moses, the same god as Elijah. , the same god of Abraham, the same god of Isaac, the same god of Jacob and the same god of Abel, so Jesus Christ makes it very clear that his god and father is the same god of the Old Testament, and I have also read the apocryphal gospels and practically the same thing is written in them that Jesus Christ said that his father is the same god as Moses and Abraham, that is, the same god of the Old Testament.

Who do they want to fool?

Matthew chapter 8, verse 11: "And I tell you, many will come from the east and from the west, and will sit down with Abraham and Isaac and Jacob in the kingdom of heaven."

Matthew chapter 17, verses 3 and 4: "At this, Moses and Elijah appeared to them conversing with Jesus. Peter said to Jesus, "Lord, how good it would be if we stayed here! If you want, I will build three shelters: one for you, one for Moses, and one for Elijah."

Matthew chapter 22, verses 31 and 32: "But regarding the resurrection of the dead, have you not read what was said to you by God?, when he said: "I am the God of Abraham, the God of Isaac and the God of Jacob." God is not the God of the dead, but of the living."

Matthew chapter 23, verse 35: "so that all the righteous blood that has been shed on earth may come upon you, from the blood of Abel the righteous to the blood of Zechariah son of Berechiah, whom you killed between the temple and the altar ."

Mark chapter 9, verses 4 and 5: "And Elijah appeared to them with Moses, and they were talking with Jesus. Then Peter said to Jesus: Master, it is good for us that we are here; and let us make three shelters, one for you, one for Moses, and one for Elijah."

Mark chapter 12, verse 26: "But concerning the dead being raised, have you not read in the book of Moses how God spoke to him in the bush, saying, I am the God of Abraham, the God of Isaac, and the God of of Jacob."

Luke chapter 20, verses 37 and 38: "But as for the dead to rise, even Moses taught it in the bush passage, when he calls the Lord the God of Abraham, the God of Isaac, and the God of Jacob. For God is not the God of the dead, but of the living, for all live for him."

In addition, in the bible it is stated that salvation comes from the Jews and the Jews are the authors of the Old Testament, therefore, this is another proof that the father and god of Jesus Christ is the same as in the Old Testament.

John chapter 4, verses 22: "You worship what you do not know; we worship what we know; because salvation comes from the Jews."

In ancient times, there were Gnostic religions that were practically the same as the New Age, some of them were Christian that contained Buddhist and Hindu beliefs such as reincarnation, others what they did is that they mixed the belief in Jesus Christ with pagan beliefs and pagan gods like the Greek gods, in any case, these Gnostic religions repeated the same lie that Jesus Christ worshiped a different god from the Old Testament, but if one reads both the canonical gospels that are in the bible and the apocryphal gospels that are not in the bible, in them Jesus Christ makes it very clear that his god is the same god as Moses and Abraham, and therefore the same as in the Old Testament.

The pro-lifers in their ignorance think that from conception there is a fetus formed with a nervous system that allows it to feel, and when abortion is proposed for cases of rape, they say that the child, referring to zygotes, embryos and fetuses alike, NO He is to blame for the rape, but they worship a god who in the bible commanded to kill small children and pregnant women for what their parents do.

Leviticus chapter 26, verses 22 and 29: "And I will also send wild beasts against you to take away your children. You shall eat the flesh of your sons, and the flesh of your daughters you shall eat."

This god was quite psychopathic and sick since to punish a people he stated that he would make fathers and mothers become cannibals so that they would eat their own sons and daughters, if something like that was written in a book of a culture that believes in other gods would seem nefarious, immoral and unacceptable to most people, but since he is the god of the bible it seems fine to them.

Numbers chapter 31, verses 17 and 18: "Kill therefore now all the males from among the children; also kill every woman who has known a man carnally. But all the girls among the women, who have not known a man, you will let them live."

This god orders that children and women who have had sexual relations be killed, but that virgin women be left alive, and the question is: what if those virgin women were also pagans?

It sounds like he ordered them to leave virgin women alive so that they could use them as sexual slaves, and this was precisely what the European conquerors did when they conquered America, forcing indigenous women to have sexual relations with them and that is why the miscegenation.

Deuteronomy chapter 2, verses 33 and 34: "And the LORD our God handed him over to us; and we defeated him, his sons, and all his people. At that

time we took all their cities, and exterminated the men, women and children of each city. We don't leave any survivors."

Deuteronomy chapter 3, verses 3 and 6: "So the Lord our God also delivered Og king of Bashan and all his people into our hands, and we struck them down until there were no survivors left. And we destroyed them, as we did Sihon king of Heshbon, destroying men, women, and children in every city."

It is curious that, according to the pro-lifers, children are not to blame for what their parents do when the issue of abortion for rape is brought up, but when this god ordered children to be killed for what their parents did and the prophets of this god they killed children of the towns they conquered, it seems to these sick people that the children were to blame for what their parents did.

Psalms chapter 137, verses 9: "Blessed is he who takes and dashes his little ones against the rock."

Isaiah chapter 13, verse 18: "With bows they will sweep away the young men, they will not pity the fruit of the womb, nor will their eyes pity the children."

There are rumors that the European conquerors fed their hunting dogs with indigenous children, although I do not know to what extent this is true or not, if this was true, they were simply following the orders of this evil god.

Ezekiel chapter 9, verse 6: "Kill old and young and virgins, children and women, until there are none left."

Ezekiel chapter 23, verses 46 and 47: "Therefore thus saith the Lord God: I will bring up a company against them, I will deliver them to trouble and plunder; and the company shall stone them with stones, and slash them with their swords; they will kill their sons and their daughters, and their houses will consume with fire."

Hosea chapter 13, verse 16: "Samaria shall be desolate, because she rebelled against her God; they will fall by the sword; their children will be smashed to pieces, and their pregnant women will be opened."

When this god orders the wombs of pregnant women to be opened with swords, it is not only killing women, it is also killing the fetus they carry inside, that is, this god commands to cause abortions by force and against the will to the women they also kill by piercing their wombs with swords, but the pro-lifers are hypocrites who believe that their god was against abortion when their god ordered abortions to be caused.

I have also heard sick men and women justify this god by stating that he ordered the killing of children and pregnant women because he knows the future, and he knew that these children would be evil when they grew up.

If a god knows the future, it means that free will does not exist, it would mean that we are something like puppets or characters in a cartoon with a programmed script, with everything we are going to do and say already determined, then it means that we will never we could make our own decisions because we already have a marked destiny, and then it means that someone else determines our future, our future actions and decisions.

And if they in their ignorance believe that this god is the true creator of us and of everything that exists, it means that this god would be in charge of writing the script of our life, of giving us a destiny and determining our future, therefore, if so, this god would be the real culprit of everything a person does in the future.

Conspiracy theories are invented by religious fanatics and by people from the Right, these beliefs generate hatred against minorities and religious fanaticism, therefore, whoever believes in conspiracy theories is a criminal. Conspiracy theorists and those who support them should be in jail or an insane asylum for life, and banned from the internet.

These nefarious beings who invent conspiracy theories also promote the perverse belief in the antichrist who causes murder.

### **FFF = 666 Fridays For Future: Greta Thunberg el anticristo neo marxista? #Katecon2006**

*publicado por katecon2006-katharina hassan el julio 28, 2019*

Post titled "FFF = 666 Fridays For Future: Greta Thunberg the neo-Marxist antichrist?" by Christian conspiracy theorist and clown Katecon2006 who also goes by Katharina Hassan on her other website. Screenshot retrieved from: <https://nuevoordenmundialreptiliano.blogspot.com/2019/07/fff-666-fridays-for-future-greta.html>

Social Darwinism is the belief that the strongest must subdue, mistreat, harm and eliminate the weakest, it is practically Darwin's theory applied to human society. This has to do with the machismo that promotes the idea that being cruel, insensitive and harming the weakest according to macho stupidity means being "man", "powerful", "strong" or "brave".

And it has to do with speciesism where humans believe that they can use as objects, harm, mistreat and kill animals of other species for being weaker than humans and for being less intelligent than humans.

Social Darwinism is based on the Naturalistic Fallacy that says that everything natural is "good" or an example of "moral" for human behavior, for example, that cannibalism exists in some amphibians and praying mantises, that male lions kill the cubs of other lions so that the female will be in heat again and mate with that female, and that the predatory species that are stronger hunt and eat the weaker and herbivorous species, that is, Darwinism Social says that these are examples that human beings should follow, although humans, unlike other species, know very well that they cause suffering and that they cause pain, unlike those other species.

Male lions kill the young of other lions so that the female comes back into heat and mate with that female, praying mantises practice cannibalism because they eat the male after mating, but according to the Right these cases of animals from other species that do not understand what good and evil mean are an example to be followed by humans who do understand what good and evil is, because for the Right the ideal is that human society be as nature is where the most The strong subjugate, harm and kill the weakest, and for this reason they support causing harm to weaker humans such as indigenous people and animals that cannot defend themselves against humans, as occurs in the case of hunting for pleasure or bullfighting . Images retrieved from: <https://www.quora.com/Do-lions-kill-orphan-cubs> and <https://andaresdelaciencia.com/2018/08/19/perder-la-cabeza-el-cannibalismo-sexual-de-las-mantis/>

As I have already proven in this book, the god of the Bible, being a god who preferred the sacrifice of herbivorous and defenseless animals such as the lambs that Abel made for him and rejected the vegetable offerings that Cain made him, by asking for sacrifices of animals that cannot defend themselves, by ordering children to be killed who cannot defend themselves either, they are not to blame for what adults do and are weaker than adults for being children, by supporting human slavery by giving instructions so that a father sells his daughter as a slave, and for his people to buy and sell slaves, by stating that if a father beats his children or whips them according to him it is "education" and being a macho god, he is a god to favor of Social Darwinism, and NOT against it.

For this reason, Anton LaVey writer of "The Satanic Bible" and founder of "The Church of Satan", Ragnar Redbeard writer of a book in favor of Social Darwinism called "Power is reason" on which Anton LaVey based himself to write "The satanic bible", Michael Aquino founder of "The Temple of Set", the satanic and neo-Nazi sect called ONA (Order of Nine Angles), the serial killer and satanist named Richard Ramirez, and the Viking paganisms that are also linked

with the neo-Nazis, the Right and machismo, are ignorant in believing that Social Darwinism is opposing the biblical god and according to them in their ignorance to think that this is to be against Christianity.

When in reality to be against the biblical god and Christianity is to be against Social Darwinism, the Naturalistic Fallacy, machismo, child abuse, homophobia, racism, nationalism, speciesism and is to defend the peoples natives.

Many times, the pagans and neopagans who are part of the Right believe in their ignorance that compassion and being sensitive to the pain of others and to the suffering of others of those who have never harmed us are these humans, animals of other species or others possible sentient beings that may exist in the future, is according to their ignorance the same as not defending themselves, turning the other cheek or forgiving everything, which is stupid because they have NEVER meant the same thing.

The parties of the Right are the most speciesist that exist, the ones that most support hunting and bullfighting.

A "vegan" or "animalist" who votes for Right-wing politicians and parties such as Donald Trump's or VOX, or who simply supports or justifies these parties, is like someone who claims to defend the rights of children supports, justify or vote for a party in favor of child abuse or in favor of pedophilia. For this reason, those who call themselves "vegans" or "animalists" who support Donald Trump, Jair Bolsonaro or VOX are not vegans, nor animalists, they are just

fakers who pose as "vegans" and pose as "animalists". ", and they are infiltrators of the Right.

While it is true that there may be speciesism on the left and in socialism, there is always more speciesism on the Right because the Right is conservative and speciesism is part of the conservative, furthermore, the Right is based on the speciesist book of the Bible.

For this reason, the "false" vegans and the "false" animalists who support Right-wing parties such as Donald Trump, Jair Bolsonaro or VOX, which are parties that are totally in favor of hunting for pleasure and bullfighting, are hypocrites. and double standards, it is as if someone who claims to defend the rights of children supports a party in favor of child abuse.

As long as the true vegans and true animalists do not expose and denounce these false "vegans" and false "animalists" who are in favor of the Right, speciesism will continue to exist.

It's time we expel the fake "vegans" and fake "animalists" who support these parties of veganism and animalism, and expose them on social media, in videos and everywhere.

I have seen the fake "vegans" of the Right and conservatives complain about "intersectional veganism" because it mixes veganism with human causes (feminism, LGBT, anti-racism and children's rights).

These "vegans" do exactly the same thing they complain about by mixing veganism with being right-wing and conservative (macho, Christian, pro-life and supporting child abuse claiming that it is "educating").

When racism also affects animals of other species because black animals are the least adopted and many times black animals are even killed or that people find ugly claiming that they attract bad luck or that they represent evil .

When machismo teaches that to be "man" and "strong" is to be cruel and insensitive, and that is why hunters and bullfighters feel "men" and "strong" by being cruel to animals of other species and being insensitive to their pain , so clearly machismo is related to speciesism.

When children who suffer abuse often take their suffering out on animals, it is clear that child abuse affects animals of other species.

When in the bible; Jesus Christ multiplied fish for them to eat and Christianity teaches that only human life has value and deserves respect, that only humans have a soul, that animals of other species have no soul and lack dignity, that no matter what they feel to respect his life, and that a life only deserves respect if it is human, intelligent, reasoned or has a soul, with which the Bible and Christianity clearly favor speciesism.

And when Right-wing parties like Donald Trump are the ones that pass laws in favor of hunting the most, so the Right has 100% to do with speciesism.

## El Veganismo. similitud con las Sectas y Extremismos.

The Catholic Church on its page <http://es.catholic.net/> made this publication entitled "Veganism is similar to Sects and Extremisms" where it states that veganism is a "sect" and attacks veganism. The Catholic religion, the evangelical religion, all the Christian religions, and all the monotheistic religions (Jewish and Islamic) are evil at its best, they should be banned throughout the world just like the Right and Libertarian parties. Screenshot retrieved from: <http://es.catholic.net/op/articulos/1917/el-veganismo-similitud-con-las-sectas-y-extremismos.html>

## Fiesta Brava, ¿fiesta cruel?

The Catholic Church also defends Bullfighting on its page <http://es.catholic.net/> with this publication entitled "Fiesta Brava, ¿fiesta cruel?". Screenshot retrieved from: <https://es.catholic.net/op/articulos/34426/cat/903/fiesta-brava-fiesta-cruel.html>

And the more humans are born there is more speciesism because most humans grow up in speciesist homes, and I'm not saying that it doesn't happen in the left parties, but clearly it happens much more in the Right, but of all this, the false "vegans" do not. They say absolutely nothing.

Veganism has nothing to do with conservative, violent ideologies, since it is the right-wing parties such as those of Donald Trump and VOX of Spain that most support hunting and bullfighting, also in conservative books such as the bible it is written that that god He told Noah to scare the animals and that he

could eat as many animals as he wanted, that he preferred Abel's animal sacrifices and rejected Cain's vegetable offerings, and that he asked for animal sacrifices.

In addition, they are the machistas for their concept that according to them to be "man", "strong" and "brave" is to be cruel and insensitive who hunt the most, and they practice bullfighting according to them to demonstrate "manliness", "power" or "strength" by being cruel and insensitive to the lives of animals of other species.

A "vegan" or "animal lover" who supports politicians and political parties in favor of bullfighting and hunting such as VOX and Donald Trump is the same as someone who claims to defend the rights of children who supports politicians or political parties in favor of in favor of pederasty, or in favor of a father or a mother hitting their children with the excuse of "educating" them, these are simply false "vegans" and false "animalists".

One thing that certain people on the Right say, whether they are speciesists or pretend to be "vegans", is that, according to them, if animal rights are defended human rights are attacked or that if human rights are defended They attack the rights of animals.

This is absurd, human rights are not contrary to animal rights and animal rights are not contrary to human rights. Someone who only defends human rights is unbalanced and someone who only defends animal rights is also unbalanced.

What is healthy and balanced is to defend human rights and the rights of animals of other species equally, giving them the same importance and the same validity.

It is a lie that human rights are contrary to animal rights and it is a lie that animal rights are contrary to human rights, these lies are a strategy used by the Right to divide and cause conflict, and then to say that Those who defend animals dehumanize human beings.

Veganism is an ethical value of respecting the life of animals of other species, never a religion or a sect or a belief. In any dictionary, a religion is a group of people who believe in a god or gods, and a sect is the same, while ethics has to do with empathy and compassion, and never with magical or mystical beliefs.

While ethics, although it is true that it is a human construction just like art or philosophy, in any dictionary ethics is a set of values based on empathy, solidarity and compassion, ethics is not the same to believe in a divinity or divinities, and, therefore, since it is not the same, it cannot be considered a religion.

There are fanatical atheists and skeptics who believe that religion means the same thing as ethics or morality when it is not the same, fanatic atheists and fanatic skeptics do the same damage as religious fanatics, and just as religious fanatics justify atrocities in the name of beliefs religious, fanatical atheists and fanatical skeptics also justify atrocities in the name of reason and science.

The people of the Right defend zygotes and embryos that do not feel because they do not have a nervous system, but they eat the carcasses of animals that, if they feel, many of them support bullfighting and hunting, in fact, many bullfighters and hunters are pro-life and Christians, when scientifically most animals of other species do feel because they have formed a nervous system.

The truth is that I find it sad that there are debates with murderers of animals of other species in the media all over the world, I see this the same as if in a communication medium there is a debate between someone who defends the rights of children with someone who defends pederasty.

And it is proof of how rubbish the media (television, cinema, newspapers and radio) become. It is proof of speciesism, the only thing that should matter to value and respect a life is that it can feel having a nervous system as it happens with animals of other species, and NOT that evil that the Right, conservatives and religions teach monotheists (Judaism, Christianity and Islam) that it is human, that it reasons, that it is intelligent or that it has a soul.

There is a video where Dalas places a fragment of a person saying that wearing animal costumes, synthetic fake fur and "animal print" is speciesist, I don't see it that way, because in those things they are not killing real animals or using animals real as if they were objects, the video is called "if you're Spanish, there's Tik Toker... HE HATES YOU" and it's on his channel Dalas Sin Filters, however there is something criticizable in the video as well as in Christianity and in the Right, Dalas implies that all animals regardless of species are predators, that all animals are polygamous, hypersexual, and do anything to each other.

Although it is true that there are animals of other species that are predators, cannibals, polygamous, hypersexual and do everything to each other, and these animals are not to blame for what they do because they cannot reason in the same way as a human, without However, their life is worth the same because they feel, it is a lie that all species of animals are predators, cannibals, polygamists, hypersexuals and do everything to each other, putting all species of animals in the same bag was vile lie of Christianity and the Right to say that the word animal is synonymous with immoral or unworthy, therefore, these people use the word "animal" as if it were an insult.

An example that the Right is evil at its best, are the YouTube channels called "Krometana thinks" and "Krometana - Podcast in Spanish", both channels belong to a fan of VOX, some thumbnail screenshots of their videos are the following:

Screenshots of thumbnails of videos from the “Krometana opinion” channel where he supports VOX, speaks out against abortion and makes believe that it is the same as killing a baby, and defends Bullfighting.

Krometana is the greatest example of the evil that the Right is when it deceives people into believing that all abortions are fetal and that according to her they feel, even if they do not have a formed nervous system, these people defend zygotes and embryos that do not feel, are sensitive to respecting the life of zygotes and embryos who do not feel for not having formed the nervous system, and even use corny words like "baby" to refer to zygotes and embryos.

While they are totally insensitive and cruel with lives that, if they feel for having a nervous system formed as in the case of bulls that, if they feel and they do not care, they justify bullfighting with the fact that it is a tradition when a tradition should never be above lives with the capacity to feel and tradition never means the same good, and neither does culture because there have been macho cultures.

They are also totally insensitive and cruel to human lives who do feel the unimportant that they are causing them pain and making them suffer by promoting machismo, religious fanaticism, hatred of the indigenous peoples of the present, racism, xenophobia, homophobia and nationalism.

They consider being compassionate and sensitive to pain and suffering of human lives and animals of other species that, if they feel for having a formed nervous system as a "weakness", just like the conservatives of our grandparents and people before so idealizes some ignorant people.

Video entitled "The anti-globalist alliance is winning and message to those vegans and anti-system" from the junk channel called "krometana - Podcast in Spanish". Screenshot retrieved from:  
<https://www.youtube.com/watch?v=Xb1pofHHU-o>

In her video "The anti-globalist Alliance is winning and message to those vegans and anti-system", this lady says "- Unfortunately we have many vegans who for them the life of a farm animal is worth more than human life".

This same type has said the same thing with respect to bullfighting that according to her, for anti-bullfighting, the life of the bulls is worth more than human life.

All speciesists repeat the same rubbish, in nothing does valuing and respecting the life of animals of other species take away from human life, and it is not that we think that the life of animals of other species is worth more than the It is about the fact that for us the life of animals of other species and human life are worth the same because animals of other species feel because they have a nervous system, and for us the ability to feel is the only thing that account to value and respect the life of animals of other species, and not that wickedness that monotheistic religions teach about being human, intelligent, reasoning or having a soul.

Then the girl blames those of us who are vegans for the deaths from the coronavirus, when we did not cause the coronavirus, it was caused by someone speciesist like her who ate the corpse of a bat, that is why people on the Right do not reason, it is mindless and mean.

And besides, she says that she loves animals very much, we don't care that she or someone else loves animals, what matters to us is that her life is valued and respected, loving animals of other species never means the same as respect their lives, although it is true that there are people who love animals and respect their lives at the same time, there are also many people who love animals and do not respect their lives because they see them as objects, as beings without dignity and with less right to life.

I understand that there are people who, using the Naturalistic Fallacy or Fallacy of Appeal to Nature in their ignorance, think that since we are omnivores it is that we need to eat the corpses of animals of other species (meat) to survive or to be healthy, and I understand it because people are brainwashed with this from childhood and because there are vegans who mix veganism with naturalism, with the Naturalistic Fallacy and with the New Age (New Age) giving very bad nutrition advice or vegans who are not informed with sources vegan nutrition scientists to avoid deficiencies that cause people who become vegan to get sick and therefore abandon veganism or worse still endanger the lives of children, I understand, but it does not justify it.

The problem with this girl who calls herself Krometana de Derecha, is that it is not that she only justifies using animals of other species to "survive" and to be "healthy", it is that she has also justified bullfighting and hunting for pleasure with which many people live from that, when there are also people who live from hired assassins, drug trafficking, human trafficking and illegal organ trafficking, and that never justifies any of those atrocities.

Also, the tipa justifies hunting for pleasure and bullfighting with which they are traditions or customs as if traditions and customs were the same as something "good", when there have been customs and traditions that are evil at its best such as court of clitorises to girls in certain areas of Africa, but, these Right-wing people think in their wickedness and ignorance that tradition means the same as "good" or "justifiable" and that custom means the same as "good" or "justifiable" .

There are cases of traditions and customs where injustices are committed against human beings such as the "Day of Ashura" in Islam where cuts are made on the foreheads of children, the removal of the clitoris or female genital mutilation of girls that has happened in certain parts of Africa, ironing the breasts of girls and adolescents in Cameroon with a glowing stick, and binding the feet of Chinese girls to keep them a certain size when they reach adulthood.

On the other hand, Krometana is one of those people who believes in ignorant religions such as monotheists (Judaism, Christianity and Islam) and in their books (Torah, Bible and Koran) like the majority of people on the Right, and these absurd religions make believe that humans are not animals, when biologically we belong to the animal kingdom, we are mammals and belong to the order of primates, therefore, we are animals, and valuing and respecting the life of animals includes the human being because we are animals.

On the other hand, these people in their stupidity believe that the word animal means lacking in dignity or an offense because that is what Christianity teaches them, when what really is an offense against dignity are those Christian teachings of forgiving everything and putting the other cheek, not evolution or the fact that scientifically we are animals.

These people complain about those of us who are vegans because, according to them, they want to impose that the life of animals of other species

be valued and respected because they feel they have a nervous system, but; they impose mistreatment, torture, terror and murder on animals of other species, and they want to impose on all of us that wickedness of forgiving everything or turning the other cheek as an obligation and not as a personal decision.

According to this mob, valuing and respecting the life of animals of other species is in their stupidity to devalue human life or prefer the life of animals of other species over human life.

Krometana, says that we are scoundrels because according to her stupidity, vegans are to blame for the deaths caused by COVID, but, if this girl reads me, I tell you: - you are a scoundrel because people like you It doesn't matter that the religion they defend and support so much is an accomplice of the priests who abuse or rape minors, that the popes cover up for them and that the high hierarchies of the church cover up for these pederasts.

News titled "Pope Emeritus Benedict XVI "covered up sexual abuse against minors" when he was archbishop, media say." Recovered from: <https://www.dw.com/es/el-papa-emérito-benedicto-xvi-encubrió-abusos-sexuales-contramenores-cuando-era-arzobispo-dicen-medios/a-60330730>

So much so that this clown rabble says that valuing and respecting the life of animals of other species according to their stupidity is to devalue or dehumanize human life, and that according to their stupidity it is to prefer the life of animals of other species over life and they have never cared that priests destroy the lives of minors by abusing or raping them, nor that the popes and the

high hierarchies of the church cover up these pederasts, it seems that they forget that these minors are human lives, they only care about the life of zygotes and embryos that scientifically do not feel because they lack a nervous system, but they do not care about the human lives of children who do feel that they suffer abuse and rape by priests.

And that's not all, the majority of believers are complicit in these abuses and violations, and therefore just as guilty, by wanting to be covered up, by wanting their crimes to go unpunished, by wanting not to talk about the subject and by justifying them with the fact that they are simple mistakes, when sexual abuse and rape are NEVER simple mistakes, sexual abuse and rape are crimes, not mistakes.

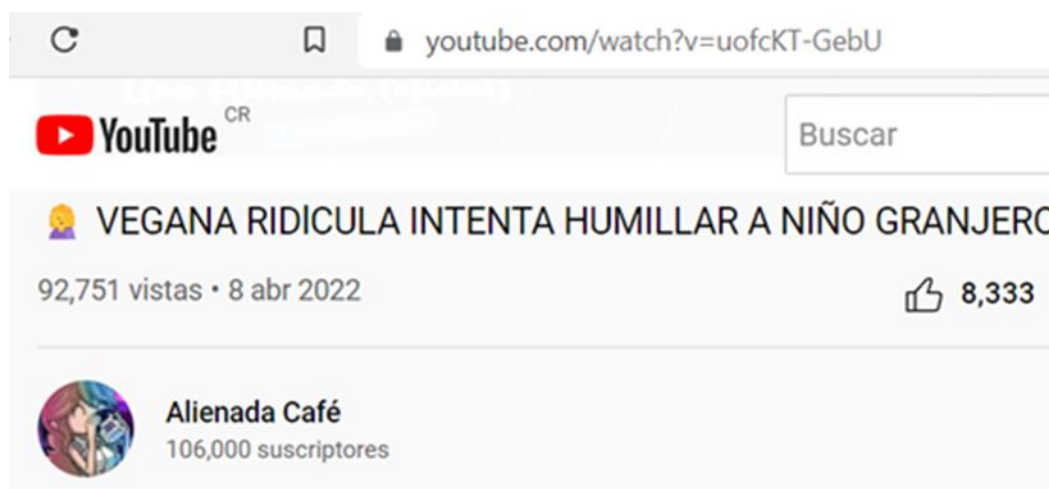

And also these people are often complicit in these crimes by saying that there is no need to judge or that you do not judge so as not to be judged, in other words, that according to them, we are accomplices of pedophiles like they are, that by the way, those teachings of not judging that only favor criminals and seek that crimes go unpunished also come from Jesus Christ, and are also used by the New Age movement with the same purpose of making criminals go unpunished for their crimes and never judge them for the damage they do.

This clown mob that says that respecting and valuing the life of animals of other species is, according to them, dehumanizing or devaluing human life, is the same one that supports a religion that is full of riches and gold, while there are children dying of hunger, it seems that they forget that the life of the children who are dying of hunger is human, they only care about human life when it comes to zygotes and embryos that scientifically do not feel because they do not have a formed nervous system, but, when it comes to children who feel that they are dying of hunger, these lives that are also human lives do not matter to them, for this reason, they are hypocrites with double standards.

Photos of the gold and riches of the Catholic Church. Other trash just like Krometana are Jordan Peterson and Ben Saphiro. Tolerance is a crime when what is tolerated is evil, freedom of expression or opinion should be considered a crime when it harms human lives, harms animals of other species and harms the environment. These right wing criminal riffraff and the Libertarians who support them should face harsh penalties, be banned from the internet forever, banned from posting on the internet, and spend the rest of their lives in prison or an insane asylum.

Video called “RIDICULOUS VEGAN TRIES TO HUMILATE A FARM CHILD”, from the “Alienada Café” channel. Screenshot retrieved from: <https://www.youtube.com/watch?v=uofcKT-GebU>

In said video, the girl on her channel “Alienada Café” says the phrase “- With the New Law of Spain, animals are already sentient beings”.

It is rare that the girl says that in Spain the life of animals is defended, when the Spanish government and its perverse laws defend hunters and bullfighters, even those who insult or call a hunter or a bullfighter a murderer are legally sanctioned, the same Facebook allows bullfighters and hunters to post photos of what they do.

It is curious that this rabble complains that we progressives try to impose, when they try to impose on us that we all think like them and have their same concept of "murder" based on Christianity where according to Christianity it is only a "crime" and "murder" the torturing and killing of a human being, but not animals of other species.

It is for these reasons that I would never visit Spain in my life, because of that government and laws that they have, and I want to make it clear that not all Spaniards are bad, there are Spaniards who are good people, and who are against bullfighting and against hunting for pleasure, when I say that I would never visit Spain I do not mean them, I mean that I would never visit Spain because of its Christian-based government and its speciesist laws.

Screenshot retrieved from:

<https://www.expansion.com/juridico/sentencias/2017/12/21/5a3c00f3268e3e427c8b4637.html>

On the other hand, when the girl says the phrase "- With the New Law of Spain, animals are already sentient beings" she does it as if implying that the fact that animals can feel according to her is a story of communism and the Other Left, which according to her is an invention of those of us who are progressive and which according to her is an invention of governments.

Do you realize why the people of the Right are the most ignorant and stupid people that exist, and therefore, they are also the ones who believe in conspiracy theories the most?

The fact that animals can feel physical pain and suffer emotionally is not something that communism invented, nor that we progressives invented, nor that governments invented, it is something confirmed by science, but we cannot wait more than people who defend and promote Right-wing parties that are anti-science because they promote hoaxes against vaccines, support anti-vaccines and other conspiracy theories such as denying that climate change exists or downplaying it.

CIENCIA

## Reconocen oficialmente a pulpos, cangrejos y langostas como seres que sienten dolor

Luego de revisar 300 artículos científicos, el Gobierno de Reino Unido ha decretado también que estos animales sienten emociones como la angustia.

News titled "Octopuses, crabs and lobsters are officially recognized as beings that feel pain. After reviewing 300 scientific articles, the UK Government has also decreed that these animals feel emotions such as anguish. Capture recovered from: <https://larepublica.pe/ciencia/2021/11/23/reconocen-oficialmente-a-pulpos-cangrejos-y-langostas-como-seres-que-sienten-dolor/>

Another phrase that the girl says in her video is: "- I want to eat roast chicken, I also felt like it."

What would happen if someone said something similar defending cannibalism or if someone in favor of abortion before the nervous system was

formed said I wanted to have an abortion after hearing the nonsense said by a pro-lifer like her?

Raw veganism and urine therapy are pseudosciences that have nothing to do with veganism out of respect for the life of animals of other species, unfortunately there are many magufos in veganism that only cause veganism to be discredited, but the reality is that the nonsense that these people say they have nothing to do with veganism.

Veganism is not eating only lettuce, nor eating only salads, nor eating grasses. Being vegan and progressive does not mean the same as supporting PETA.

Specists say that promoting veganism in children is indoctrinating the little ones. In fact, that the speciesists teach children that animals do not have souls when the belief in the soul is not scientific, that their god created animals for us to use and eat, and to deny the fact scientist that they feel, if it is to indoctrinate the little ones.

And I clarify again, that with this I am not supporting putting the health of children at risk, for a child to be vegan, you must first seek advice from scientific sources on vegan nutrition, the same when a pregnant woman is vegan, you must seek advice from scientific sources on vegan nutrition and consuming vitamin B12, not paying attention to New Age wizards who write nonsense, nor to naturalists, nor to New Age gurus, nor to homeopaths, nor to the crazy people who invent conspiracy theories, who as more later we will see they are also part of the Right, they promote the Naturalistic Fallacy or Fallacy of Appeal to Nature in matters of health and nutrition, and do a lot of damage with their stupid theories based on nature.

Another video of the girl is one called “FRANK CUESTA DENOUNCES: PROGRE ANIMALIST GOVERNMENT LET 10 ASSES DIE OF HUNGRY” also on her channel “Alienada Café” where she defends the right-wing guy called “Frank Cuesta” and where she implies that all progressives and that all animalists are like that government that let ten donkeys die, again this Right-wing riffraff generalizes and puts all of us progressives and vegans in the same bag, but they complain that people who call themselves “feminists” do the same with those of us who are men.

Another video of the girl entitled “FRANK CUESTA DENOUNCES: PROGRE ANIMALIST GOVERNMENT LET 10 ASSES DIE OF HUNGRY” on her other channel entitled “Alienada Café”. Screenshot retrieved from:  
[https://www.youtube.com/watch?v=n0jqtC\\_GZPI](https://www.youtube.com/watch?v=n0jqtC_GZPI)

In nothing does it take away humanity from a human being to value and respect the life of animals of other species, but what does take away humanity from a human being is being cruel and insensitive to the pain of others of beings with the ability to feel these humans or these animals of other species or any sentient being that may exist in the future.

This guy named Frank Cuesta is also from the Right since he supports VOX.

A mistake that vegan pages and many vegans make is to believe that if someone likes animals and studies animals, like, for example, that Spanish and Right-wing character named Frank Cuesta who has publicity in the media like Animal Planet, among others, means according to his ignorance that he values and respects the life of animals of other species, this is false.

Species also like animals and they also like to study their behavior, and many ecologists are speciesists, Frank Cuesta is the best example of this, to value and respect the life of animals it is not necessary that the person likes them, nor that she is interested in studying them.

In a video entitled "Frank Cuesta de los toros: "Bullfighters are not murderers, they are people", Frank Cuesta affirms that bullfighters are not murderers and that banning is horrible.

In the speciesist society, it is true that the concept of murder only applies when someone kills another human, we must bear in mind that concepts evolve and change over time, and there are people who do not share the definition of murder in a society sick and speciesist, it is curious that these people talk about freedom of expression and opinion, but that it is the sleazy governments like that of Spain and these same people who try to censor freedom of expression and

the right to express an opinion of those who, if we consider the bullfighting as murder.

What if someone said that banning the rape and murder of humans is horrible? And why do people like Frank Cuesta think it's good that things that harm human lives are prohibited, but they think it's horrible that atrocities that harm animals of other species are prohibited?

For those who a life has value and deserves respect for the fact of feeling having a nervous system as in the case of animals of other species, it is the same to kill a human as to kill an animal of another species because both they feel and have an interest in living, therefore, we do not define the word murder as defined by the speciesist and sick society, we define murder as the killing of any sentient being for pleasure and we have the right not to have the same definitions which has the majority.

Video entitled "Frank Cuesta de los toros: "Bullfighters are not murderers, they are people"". Screenshot of: <https://www.youtube.com/watch?v=3U5VzcDGkSs>

An "argument" of the people who support bullfighting is that if bullfighting ceases to exist then these animals will become extinct, the truth is that being vegan is not about conserving species, being vegan or animalist is about defending the lives of animals from other species, sometimes to conserve a species is to disrespect the life of that species.

Reproducing a species just to bring it to suffer and cause pain is NOT respecting the life of those animals, it is better that a species never reproduce and become extinct than that species only reproduce and impose itself to exist only to later torture , mistreat and kill these animals.

And many people would say, but if bulls and cows do not reproduce and cease to exist, it is a damage to the ecosystem, well no, it is not, bulls and cows are not animals that are part of the ecosystem, more Well, they are animals that harm the ecosystem because they produce large emissions of methane and carbon dioxide, and where large hectares of forests and wild areas are destroyed to make pastures where these animals feed on the grass.

And other people would say, but what would happen to the animals that have already been born? Well, one solution is that those who have already been born be rescued from the bullfighting and livestock industry, sterilized and taken to shelters where they die of old, plus, if they're so worried about those animals

going extinct, they could be left to breed on their own in very minimal numbers in shelters.

In any case, I repeat again that veganism is out of respect for the life of animals of other species, not out of environmentalism or to conserve species.

Let's imagine the same thing about bullfighting, but, using cats and dogs as an example, let's imagine that for a long time a tradition had developed where cats and dogs were taken to bullrings where they were tortured and killed at the end, even if there were people who would justify it with the fact that these animals are bred for that, that if this is not done they will become extinct and that there are people who live from that, to many people like the one mentioned in this book it would seem an atrocity and something unacceptable, and That is where the hypocrisy and double standards of most people who do not reason are seen again.

I do think that freedom of expression should have a limit. For me, freedom of expression should be allowed and it exists when it does not harm human lives, when it does not harm the lives of animals of other species and when it does not harm the environment.

But, when someone's opinion, what they say or write causes harm to human lives, causes harm to animals of other species and causes harm to the environment, as happens with these people from the Right and Libertarians, for me it should be something prohibited, be legally sanctioned and considered a crime.

Dalas Review published a video called "Vegan humiliated by a KID Farmer on TikTok" although I have nothing to say about the criticism he made of that vegan, in that video he does not generalize to all vegans and makes it clear that not all Vegans act that way, a sentence that Dalas Review said in said video is "- animals are not good, in fact, they are quite evil, especially among themselves".

Video titled “Vegan humiliated by a KID Farmer on TikTok” from the Dalas Review channel. Capture recovered from:  
[https://www.youtube.com/watch?v=VCDH-Kx\\_p4E](https://www.youtube.com/watch?v=VCDH-Kx_p4E)

As I explained before, valuing and respecting the life of animals of other species is NOT humanizing them, but believing that they are evil or immoral as the Dalas Review does or as Christianity does is humanizing them.

According to science, the intelligence of many animals is the intelligence of a month-old child, and in the most intelligent animals, such as dogs, cats and pigs, intelligence is like that of a one-year-old child, two years and a maximum of three years, certain investigations say that moral conscience in humans begins to develop up to four years of age.

That is, animals of other species do feel physical pain because they have a central nervous system (brain) and nociceptors (nerve endings for pain), and if they suffer emotionally because they have a limbic system and it has been proven that even fish experience stress, but, they completely lack a moral conscience, and this means that they do not know what is good and what is bad, therefore, by not understanding what good means, or what bad means, they cannot be accused of being evil or evil. be kind because their conduct is not guided by a moral conscience that tells them what is good or what is bad.

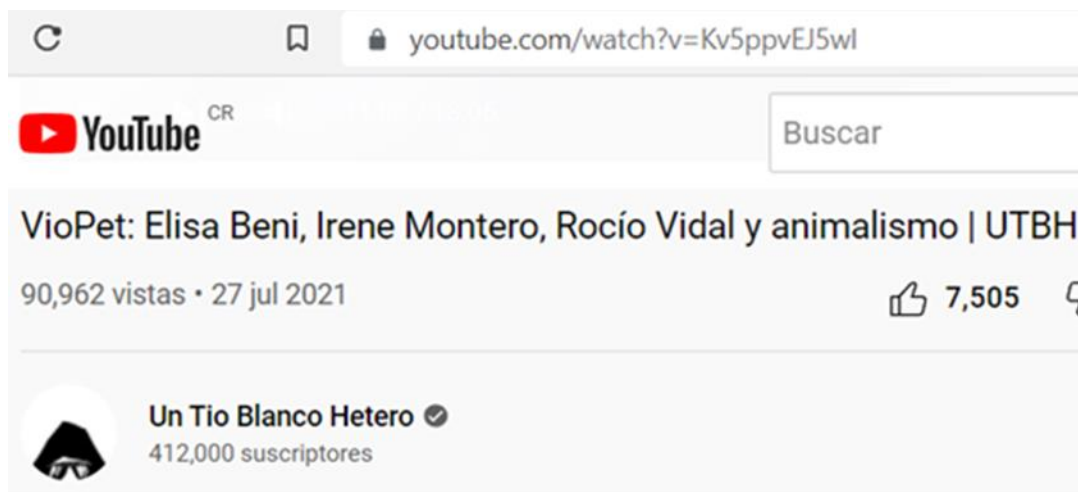

Therefore, they cannot be blamed for what they do, in any case, what we can talk about is kind behaviors and evil behaviors without blaming them, but not that animals of other species are good or bad.

And while there are evil behaviors in some species such as predation, cannibalism and infanticide for which we cannot blame them because I repeat again that those animals of other species do not know that this is bad, there are also species with kind behaviors where both males and females protect and care for their young, such as the emperor tamarin, the prairie voles and the owl monkey, animals that cooperate with each other to survive such as ants, animals that work as a team to protect themselves from predators such as the meerkat,

and animals of different species that cooperate with each other to survive such as the hermit crab and the anemone, but Christianity and the Dalas Review want us to believe that the behavior of animals of other species is only reduced to evil behavior.

In the video “Johnny Depp exposes ULTIMATE TEST vs Amber Heard. He could win his Judgment”, Dalas affirms the following: “- because in fact they canceled other Hollywood actors like Chris Pratt because it was discovered that he voted for Trump, oh my god, what a crime, he is a devil on earth (in a tone of teasing and sarcastic).

In the video “VioPet: Elisa Beni, Irene Montero, Rocío Vidal y animalismo” from Un Tio Blanco Hetero, the guy mentions the statements of Adela Cortina which are the following: “- animals are valuable, but only they have rights and dignity the humans. I believe that animals do have value, and there should be regulations for their good treatment, but they do not have dignity, because only humans have it, according to the 1948 Declaration.”

Video “VioPet: Elisa Beni, Irene Montero, Rocío Vidal and animalism” from “Un Tio Blanco Hetero”. Capture recovered from:  
<https://www.youtube.com/watch?v=Kv5ppvEJ5wl>

It seems that these people forget that humans are animals, that we belong to the kingdom animalia, to the subphylum of vertebrates, to the class of mammals and to the order of primates, therefore, to say that animals of other species they lack dignity, it is the same as saying that humans also lack dignity since biologically we are animals, it seems that they believe the Christian story that we are not animals.

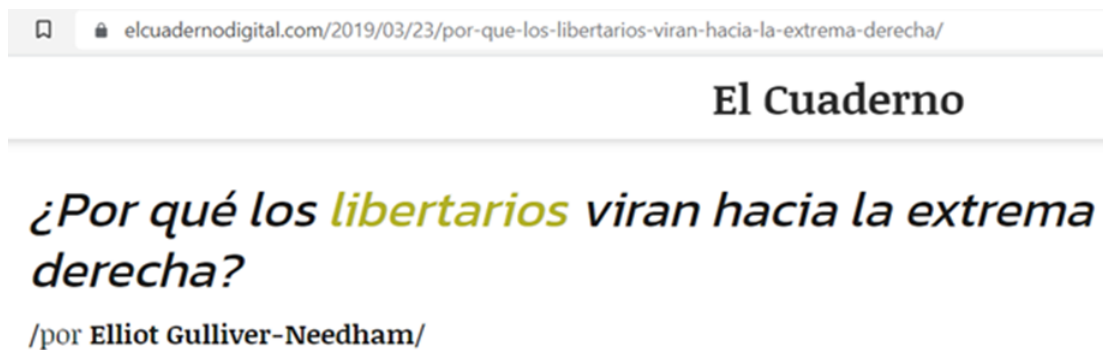

On the other hand, the "1948 Declaration" is an outdated statement made up by people who rely on the prejudices of monotheistic religions (Jewish, Christian and Islamic) and their books (Torah, Bible and Koran) to say that animals lack of dignity, because this statement that animals of other species lack

dignity stems from a religious belief that says that humans are created in the image and likeness of that evil god, and that only humans have a soul.

Regarding the fact that animals of other species do not have rights, we return to the same thing, humans are animals and to say that animals of other species do not have rights is the same as saying that humans do not have them either, since we are animals, but these people believe the evil of Christianity that says that we are not animals.

Other times, they say that animals do not have rights since to have rights you have to fulfill duties and animals of other species cannot fulfill duties, but they forget that newborns and very young children cannot fulfill duties either. and if they have rights, and that humans with a severe mental disability cannot fulfill their duties either and if they have rights.

And finally they say that they have no rights because rights are always legal, as if laws were always something "fair" and "good", they forget that before human slavery was legal, that before human slaves lacked legal rights and that before the law allowed to have human slaves.

Post titled "Why do libertarians turn to the extreme right?". Capture recovered from: <https://elcuadernodigital.com/2019/03/23/por-que-los-libertarios-viran-hacia-la-extrema-derecha/>

Publication entitled "Libertarianism and its relationship with the extreme right", Capture retrieves from: <https://aldescubierto.org/2022/01/07/libertarismo-y-su-relacion-con-la-extrema-derecha/>

Emmanuel Danann, whose real name is Jorge Gorostiaga and has a partner just as harmful to him called Lilia Lemoine, are one of those libertarians who have a lot to do with the Right, proof of this is the propaganda they give to the pro-lifers, the how they seek to favor the pro-lifers, being friends with the pro-lifer named Agustín Laje Arrigoni, among other things, such as saying many stupid things that those on the Right say and seeking to favor Christianity.

Video titled “Emmanuel Danann eats a hamburger in debate with 2 vegans | LIVE DEBATE” by Danann. Capture recovered from:  
<https://www.youtube.com/watch?v=MV6taKq4UIU>

There are vegans who lend themselves to debate with these libertarian and Right-wing people, which seems to me an atrocity, these speciesist people simply do not reason and it is best to attack them with videos revealing the kind of people they are, not to debate with people who first they don't reason and second they disrespect those of us who are vegans.

Many times, these people complain that we vegans seek to impose by considering that killing an animal of another species without being necessary to survive and without being necessary to defend oneself is the same as killing a human, and by saying that Eating animal carcasses, hunting for pleasure and bullfighting seem like crimes to us, that is, these people talk about freedom, but they want to impose their “morals”, and their concepts of “good” and “bad” that are the same of the majority to whom we have other ethical values different from the majority, in addition to wanting to censor our freedom of opinion and expression.

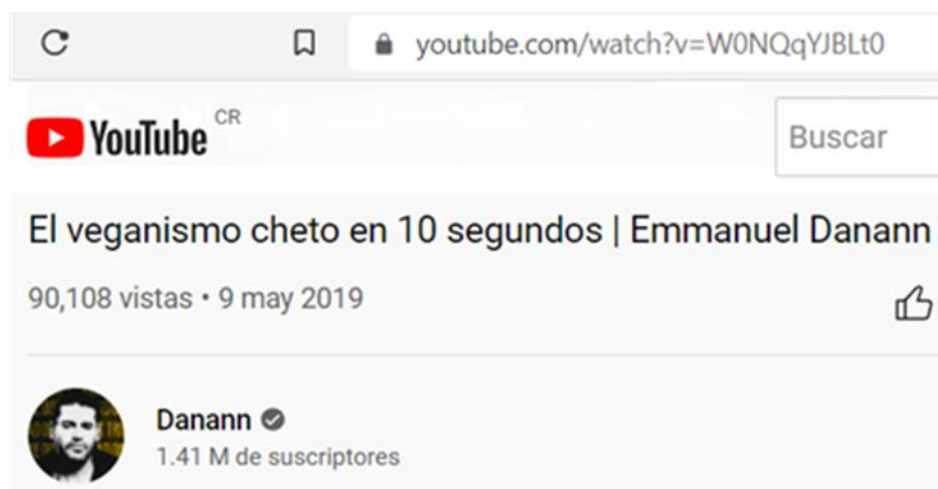

On the other hand, if these people plan to continue being speciesists, the least they should do is respect those of us who are not, what this guy who calls himself Emmanuel Danann did of eating a hamburger in a debate with vegans seems to me to be a mistake out of respect, if he wanted to eat that hamburger he could have done it off camera.

There are people who have disrespected me for being vegan, who have told me that a meal does not contain meat and then if it had it, and they laugh at me, that is as if I tricked these people into committing cannibalism putting human flesh in a meal and then I tell them, and I start laughing.

If these people want to continue in speciesism, the least they should do is respect those of us who are antispeciesists, if they don't think it's a crime to eat animal carcasses they should respect those who, if we consider it a crime and respect our freedom of expression, if they don't think speciesism is bad, they should respect the freedom of opinion of those of us who do consider it bad.

On the other hand, veganism is not the same as environmentalism, and veganism consists of respecting all sentient life as much as possible, because logically there will be occasions where it is not possible to respect all sentient life and there will be exceptions, but, veganism is to respect the life of animals of other species as far as possible and as far as possible, it is not about being fanatics.

In his video "Cheetah veganism in 10 seconds", Dannan says the following: "- veganism is a rich kid thing because you go tell a starving kid that eating meat is death or that eating meat is murder".

Video titled "Cheto veganism in 10 seconds | Emmanuel Danann" by Danann.  
Font: <https://www.youtube.com/watch?v=W0NQqYJBLt0>

I understand that people who live in extreme poverty, children who are starving, people like the Eskimos or like indigenous cultures who live in jungles where it is difficult to grow crops, and where there are few trees and plants that produce fruit because most trees and plants in a jungle do not do it and if they do it is only at certain times of the year, they cannot be vegans, and have to hunt and fish to survive, out of necessity and because they have no other choice, and never for pleasure, but, the vast majority of us are not in those situations, if we have the resources to be vegan, we can live perfectly well being vegan and therefore, there is no justification for our speciesism.

If they recognized their privileges, they would realize that many indigenous communities are expelled from their territories, they even shoot them as is happening in Brazil with Bolsonaro, they are invaded by loggers, ranchers or oil tankers who destroy the forests in which they live and who destroy their reserves through fires, many even today are killed and tortured.

And if they lived in a jungle or reserve they would realize that it can only be cultivated at certain times, in the growing seasons, the crops do not yield a harvest all year long, but many who live in fantasy think that a crop yields a harvest every year. the days of the year because it is very easy to go buy those foods in trays, and never have grown anything in life.

It is very easy to have access to seeds of a wide variety of crops, those of us who live in the countryside know that crops only yield crops at a certain time, but it is very easy to comment from the privilege where people can go to a store to buy vegetable food every day. every day and focused only on one's own reality, believing that it is everyone's reality.

That's right, as many of the privileged people think that their experiences and their reality is the same as everyone's when it is not, for example, if I recognize that I am privileged, and that it is very bad that other people from indigenous peoples are going through hunger, suffering needs, being expelled from their reserves or forests, invaded by loggers, miners and ranchers, where their homes are burned down as has happened in the Amazon, where the governments do nothing to protect their territories and justice is done against those who harm them.

Is it so difficult to recognize your own privileges and accept reality?

Photographs of fires in the Amazon. Photographs retrieved from:  
<https://cnnespanol.cnn.com/2020/09/11/decenas-de-miles-de-incendios-en-el-amazonas-estan-llevando-a-la-region-a-un-punto-donde-no-podra-producir-suficiente-lluvia-para-sostenerse/> and  
<https://stories.mightyearth.org/amazonfiresspanish/index.html>

Something important: it can only be grown in winter when it rains, in summer it cannot be grown because it does not rain. Thanks to imports, we have

vegetable foods all year round because the seasons are different in each country.

There are grains like rice that last a long time in storage, but their availability throughout the year depends on extensive agriculture, many cannot cultivate extensively, and only large companies can cultivate extensively, and buy land to cultivate extensively. extensive is very expensive, prices are very high.

Another way to have crops all year round is with a greenhouse, but the materials to build it are expensive, unfortunately everything is based on money and prices go up every day.

For this reason, the people in power consider the indigenous communities to be a nuisance because they don't buy as much, because they have to maintain their reserves and that is why they don't care about protecting them or punishing the crimes committed against these communities. For this reason, it is good to recognize our privileges, not to lock ourselves in a bubble and recognize that there are things that are very wrong.

A vegan who judges indigenous peoples for hunting for survival and fishing for survival, and not for pleasure, is simply a fanatic.

If we want the indigenous peoples to be vegans, the first thing we have to do is get them out of the extreme poverty in which they live, give them back half of the land that belongs to them in each country of America that the conquerors (Spanish, Portuguese, British, English) stole from them. and French), offer them many sources of employment so that they can buy vitamin B12 and go to supermarkets like us where they can get plant foods all year round, offer them transportation to the city and offer them ease of access to vitamin B12.

Give them seeds to grow these products: broccoli, almonds, beans, flaxseed, chia, walnuts, figs, chickpeas, oranges, lemons, papayas, strawberries, peanuts, macadamias, carrots, pumpkin, mangoes, bananas, tangerines, rice, lentils, ginger, anise, fennel, cumin, coriander, mint, pineapple, rosemary, thyme, chamomile and basil.

Teach the indigenous to accompany drinks and food with: lemon, ginger, anise, fennel, cumin, coriander, mint, pineapple, rosemary, thyme, chamomile and basil, and later I will explain the reason for this.

And give my printed books to indigenous people who know how to speak Spanish, Portuguese and English, especially my book "Paganism, Gods and Goddesses" where I explain how to do rituals to the gods without making sacrifices, which, although true, all indigenous cultures worship different gods and not all indigenous gods are in that book, any ritual to any indigenous goddess, indigenous god and spirit of nature can be adapted so that no sacrifices are made, and that the offerings consist of plant foods and drinks.

And after all this we can explain with great respect to the indigenous communities how to have vegan nutrition without suffering deficiencies and what veganism consists of, and I am sure that after they have our same privileges and

resources, and talking to them with a lot of respect as they deserve for having suffered so much, many of them will become vegans.

But, those of us who are not indigenous, if we have the ethical obligation to be vegans, in addition to the fact that we are 95% of the planet's population, while indigenous peoples are only 5% of the world's population and do not have our same resources.

I know that people like Danann can use this statement that many indigenous people cannot be vegans due to the extreme poverty in which they live and the conditions in which they live to attack veganism, however, these Right and Libertarian people who support the Right are those who most promote hatred of indigenous peoples and those who cause the murder of indigenous people, as I verified in my book "In defense of indigenous peoples and paganism."

And I know that there are vegans who mix veganism with being a naturalist, with being New Age, with being a hippie and with believing in conspiracy theories with which they do a lot of damage to veganism by mixing it with stupidity, and they say they are in against vaccines because they are tested on animals, the reality is that even if vaccines were never tested on animals they would always be anti-vaccines because they are naturalists, New Age (New Age), and also hippies who use the Naturalistic Fallacy in their ignorance believing that everything natural is "good" and that everything artificial is "bad".

If you really want to fight against animal experimentation, what you should do is propose alternatives and solutions as I have proposed in this book, such as "in silico" techniques or models developed by computer, Biochips and In Vitro techniques that use the cultivation of cells, that is, to fight so that vaccines are experimented with using these other alternatives and never with animals of other species, but this is not what they are looking for, what they are looking for is that people not be vaccinated, instead of making vaccines are not tested on animals.

Also, these ignorant vegans do not understand that thanks to the creation of transgenic bacteria that produce insulin, there are options for diabetics to have insulin, without it being obtained by killing animals to obtain insulin from the liver.

Before the insulin obtained through transgenics, insulin was obtained by killing animals to extract it from the liver of these animals, they also do not understand that if transgenics are created that are more resistant to pests, the use of pesticides that kill animals is reduced, in their ignorance, these vegans believe that a GMO is obtained by injecting poisons into plants, just as Right-wing clowns who invent conspiracy theories believe, when in reality a GMO is simply a mixture of parts of the genetics of different plants.

SALUD

## De la insulina del cerdo a 'la servilleta que cambió el mundo'

Publication entitled "From pig insulin to 'the napkin that changed the world'". Screenshot retrieved from: <https://buscandorespuestas.lne.es/salud/insulina-cerdo-cambio-mundo/>

## ¿Sabías que la insulina para diabéticos es transgénica?

En la actualidad se utilizan una serie de proteínas provenientes de organismos transgénicos (técnicamente proteínas recombinantes) para el tratamiento de distintas enfermedades.

Post titled "Did you know that insulin for diabetics is transgenic? ## Éxitos transgénicos: la insulina

Publication entitled "Transgenic successes: insulin". Screenshot retrieved from: <https://naukas.com/2012/01/05/exitos-transgenicos-la-insulina/>

The Naturalistic Fallacy or Fallacy of Appeal to Nature is not only applied in the moral or ethical field, this fallacy is also used in areas related to health when most people in their ignorance affirm that everything natural is good for the health and that everything artificial is harmful to health, or when in their great ignorance they affirm that everything chemical is harmful to health, when in reality,

everything that exists is made up of chemical elements, for example, water is a chemical compound called H<sub>2</sub>O.

At times, we see how these people do nothing to help indigenous people get out of poverty, do nothing to stop and condemn discrimination against indigenous people, and do nothing to stop further marginalization and stop further committing crimes against them, but these people like those who invent conspiracy theories and the New Age if they look for indigenous communities to put them against transgenics and put them against vaccines through deception.

On the other hand, there are natural plants such as Common Aconite and American Liquorice that are very poisonous to humans, and also, the poison of a black widow and a scorpion are something natural that can kill a person, not everything what is natural is good for health, not everything natural is bad for health, and in the same way, not everything artificial is bad for health, nor is everything artificial good for health.

Common Aconite and American Licorice are two examples of natural plants that can kill a human with their poison. Photographs retrieved from:

<https://www.caracteristicas.co/escorpion/>

A valid criticism that is sometimes made of GMOs is that they are sometimes produced by monopolies like Monsanto, and only people with a lot of money have access to their cultivation and production, in this case, the solution is that GMOs are of free access, and fight so that people with low economic resources have access to the cultivation and production of transgenics.

Biotechnology must be accessible to the majority without distinction of economic status, and it must be easily accessible to indigenous communities.

Although, I know that climate change is real because I believe in science and not what crazy believers in conspiracies say, or what Right-wing riffraff say, and for me it is very important to take care of the environment because environmental pollution environment causes diseases to humans and animals of other species, for me many environmental organizations such as Greenpeace and WWF are a farce because even WWF had King Juan Carlos as president who was going to hunt elephants in Africa.

This farce that are environmental organizations like Greenpeace and WWF as well as those who invent conspiracy theories spread big lies about GMOs, organize marches against GMOs and even have them banned in many countries, are an obstacle to progress with the development of biotechnology, but, with regard to the livestock industry that causes large emissions of carbon dioxide and methane, they never organize marches against them or have them banned, it is the same, with the oil industry that is causing the destruction of the planet never make marches against nor do they ban the use of oil as they do with transgenics.

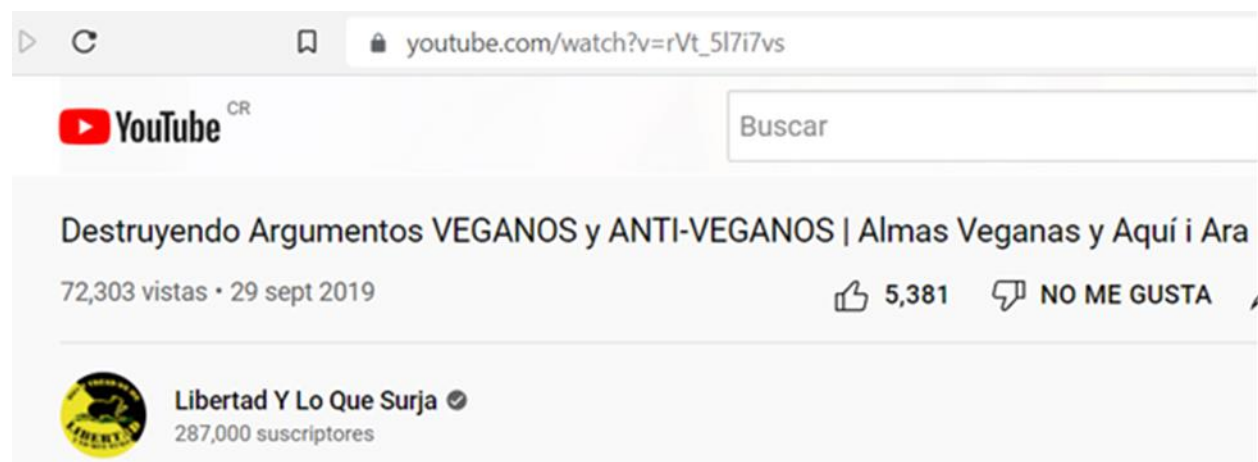

On the other hand, biotechnology, of which transgenics are a part, can help create plant-based products that mimic the taste of meat, the taste of milk and dairy products, and that have the same nutritional properties, vitamin B12

and protein to put an end to the speciesist industry, but these ignorant vegans harm animals of other species by opposing GMOs.

In addition, the crazy people do not understand that the more opposition there is to GMOs, the more animal experimentation there is to test their safety, the crazy people confuse GMOs with pesticides, when they are not the same, and while in all countries pesticides are legal if they harm human health and the health of animals of other species, in those same countries transgenics are illegal, there is no proof that they are harmful to health and that they are harmful is an invention of the crazy people who they invent conspiracy theories, such as the lie they invented that the rats that according to them eat transgenics develop tumors when in fact those rats developed tumors because they were domesticated for experimentation looking for a cure for cancer, and in that experimentation they were inoculated with cells with cancer and then try drugs.

In conclusion, vegans who oppose GMOs are a farce and in their case, if they are part of the New Age and conspiracy theories, as well as fraudulent "environmental" organizations such as GreenPeace and WWF, they are not Vegans really, in reality, are enemies of animals of other species for opposing a technology that can help animals of other species such as transgenics and therefore they are false vegans.

In the video "Destroying VEGAN and ANTI-VEGAN Arguments" from "Libertad Y Lo Que Surja", Adriá Nuñez says the following: "- Hunting is a pest control" and "If you eliminate hunting there can really be an overpopulation".

Video titled "Destroying VEGAN and ANTI-VEGAN Arguments" from "Libertad Y Lo Que Aris". Capture recovered from:

[https://www.youtube.com/watch?v=rVt\\_5l7i7vs](https://www.youtube.com/watch?v=rVt_5l7i7vs)

One of the species that has overpopulated the earth the most, generated pollution and causes destruction to the environment is the human species, we have almost reached eight billion humans and we do not see Adriá Nuñez and

those who think like him, propose that they exterminate humans to control their overpopulation.

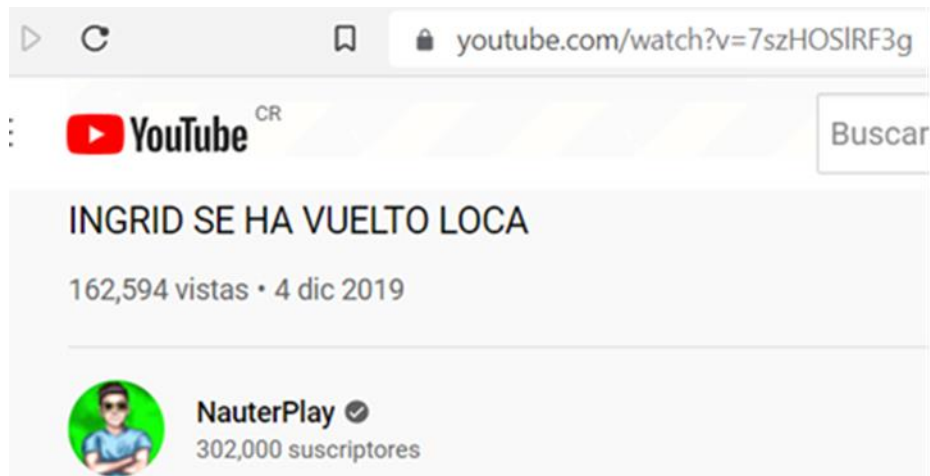

As I have already explained in this book, if there is an invasive species, the solution may be to capture it and take it to a shelter or sterilize it, in the same way, the same thing happens when there is an overpopulation of animals of other species, they can be sterilized, their murder Never must be the solution.

If we talk about invasive species, the white European humans (Spanish, Portuguese, French, English and British) in the conquest were an invasive species, who came to steal land from the indigenous people, to exterminate and harm them, and that is why in the present the indigenous peoples are only 5% and continue to suffer the consequences of the conquest, a conquest that only benefited white men and mestizos, in fact miscegenation in the case of the Spanish and Portuguese, was part of the plan so that white genetics would prevail over of indigenous genetics, the following generations were increasingly white, and to impose Christianity on the following generations, the mestizos were always taught to see the indigenous as inferior and even today there are mestizos who see the indigenous as inferior.

Another nonsense that Adriá Nuñez says is: “- you cannot treat animals as people, in fact, normally those who want to treat animals as people, what they basically seek is to treat people as animals”.

In the speciesist and Christian mentality of these people, treating as "people" means respecting and valuing, and treating as "animals" means mistreating, torturing and murdering, but beyond this it is that humans are also animals, and, therefore, Therefore, by respecting and valuing the life of animals of other species for the fact of feeling, human life is also respected and valued because we are animals and we also feel.

Another disastrous YouTuber is NauterPlay who in a video agrees with “Libertad Y Lo Que Arija” that hunting is necessary to control overpopulations, many people think that the people of before and the people of now are totally different, but, The reality is that it is not like that, many young people today are brainwashed and full of garbage by these YouTubers who should have a high, no subscription and no visits to their videos.

In the video “INGRID SE HA VUELTO LOCA” by NauterPlay, in one part of the video, she agrees with “Libertad Y Lo Que Surja”. Screenshot retrieved from: <https://www.youtube.com/watch?v=7szHOSIRF3g>

However, these same nefarious Youtubers all and who unfortunately have become an example to follow by many young people who are already brainwashed by the Right, are the same ones who call sick, excrement with legs, madman, murderer, animal abuser, damn psychopath, vomiting, disgusting and mentally ill Peluchin for torturing, mistreating and murdering cats.

Another guy of the same ilk is Jordi Wild who has channels like "El Rincón De Giorgio" and "The Wild Project" who is a guy who has attacked veganism and animalism in his videos, and who has made video collaborations with Frank It costs, where in said videos, he justifies and supports hunting for pleasure and bullfighting. Jordi Wild also calls Peluchin a son of a bitch, miserable, a bad person, cruel and a psychopath.

Although it is true that Peluchin is a criminal and murderer who should and deserves to be punished, the double standard and hypocrisy of these youtubers is that they only care about the pain and suffering of animals of other species when it comes only to dogs. and of cats, as if only dogs and cats felt, when other animals also feel.

If someone tortures, mistreats or kills a cat or a dog for these YouTubers, they are a murderer, criminal and bad person, but if someone tortures and kills a bull as in the case of bullfighting, or tortures and kills animals of other wild species as in the case of hunting for pleasure, these Youtubers do not think that he is a murderer, nor that he is a criminal, nor that he is a bad person.

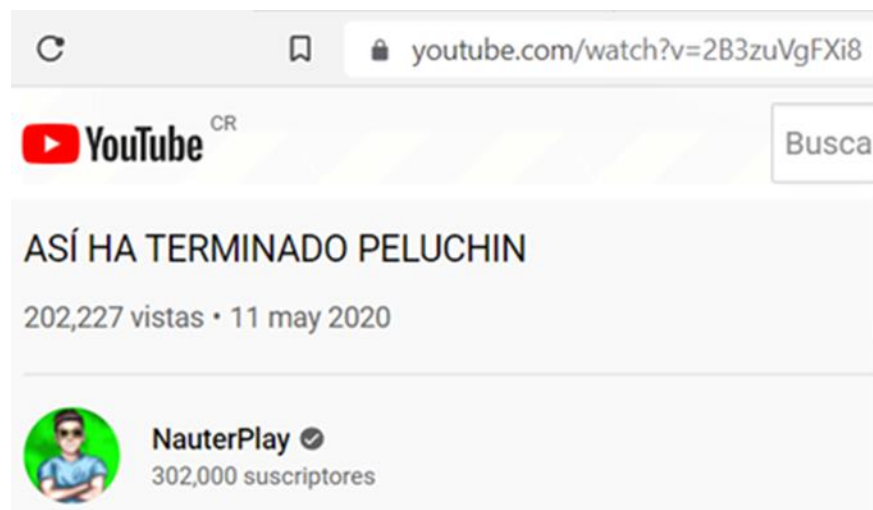

When it is exactly the same for someone to torture, mistreat or kill a cat or a dog as for someone to torture, mistreat or kill a bull in bullfighting or wild animals of other species in hunting for pleasure, but for these YouTubers it is not the same, demonstrating its speciesism and therefore its evil.

And they even consider bullfighting and hunting for pleasure as something respectable, these YouTubers are cancer and their content is carcinogenic.

Do you realize how hypocritical and double-standard these Youtubers are, because they shouldn't be an example for anyone to follow and they shouldn't even have views on their channel videos, or subscriptions on their channels?

<https://www.youtube.com/watch?v=f3ZneN6h9LQ>

The YouTube channel "Lada Amores" who also has another channel called "Lada Opina" is another pathetic and unfortunate channel that seeks to favor Right-wing parties like VOX, and I recommend everyone to unsubscribe from those channels and never watch again your videos.

In a video of the girl entitled “FRANK CUESTA CANCELED for VOTING for VOX” on her channel “Lada Opina” this girl defends VOX and those who vote for him, but, in addition, we see screenshots of ignorant people on her channel who believe that Frank Cuesta is against bullfighting and against hunting for pleasure just for having a wildlife refuge, being an expert in wildlife and liking animals.

Many people in their ignorance think that the fact that someone has a shelter to help wild animals, that they are a biologist, an expert in wild animals and like animals makes them vegans and animalists, when there is nothing further from the reality; Many biologists, experts in wildlife and who like animals are also speciesist people, some of them are also bullfighters and hunters.

The truth is, it is better that someone does not like animals of other species, but respect and value their life, without distinction of species, than someone who likes animals, but is a speciesist, considers that their life has no value or dignity, considers that only some species deserve respect for their lives and that other species do not deserve respect for their lives, demonstrating speciesism, and supports hunting or bullfighting.

Video titled “FRANK CUESTA CANCELED for VOTING for VOX” from the “Lada Opina” channel. Screenshot of:  
<https://www.youtube.com/watch?v=NTQbgYSnT4I>

Another unfortunate Youtuber who defends Frank Cuesta is WildHater, he is another Youtuber who calls Peluchin a son of a bitch and a murderer, but he thinks it is very good that Frank Cuesta justifies bullfighting and hunting, and it seems somewhat respectable, when those animals of other species that are not cats or dogs also feel by having a nervous system.

If they consider Peluchin a murderer, son of a bitch, garbage and scum for torturing and killing cats, in the same way, they should consider those who torture, mistreat and kill animals of other species that are not cats or dogs, and those who they defend or justify like Frank Cuesta, and not be speciesists where only the life of dogs and cats is valid for them, but not the life of animals of other species.

Video “Frank Cuesta humiliates Animalista, Natalia Ferviu” by WildHater.

Video “Peluchin Entertainment, the Youtuber cat abuser” by WildHater.  
 Screenshot retrieved from: <https://www.youtube.com/watch?v=ncda15cboA4>

Another character similar to WildHater is Javi Oliveira who also has another channel called "Javi el Canijo" who also has videos where he justifies VOX, where he attacks Peluchin while he thinks it's good that the people he supports from the Right say that he hunts her and bullfighting are respectable or justify them, when those animals that are killed in hunting and bullfighting feel pain and suffer just like cats and dogs, so they should equally condemn all this, and not only when the victims are cats and dogs.

Since ever; the media such as television, and the entertainment industry such as movies and series, have been part of the brainwashing of the majority as well as the Youtubers that are denounced in this chapter, only that unlike these Youtubers they have done in a more subtle or disguised way, however, it must

be recognized that these YouTubers are more honest, either consciously or unconsciously, with their intentions.

An example of brainwashing where double standards and contradictions are also seen in the media is the program "Caso Cerrado" by Ana María Polo produced by the television station called Telemundo, which is the same garbage as Televisa.

I know that most of the cases in "Case Closed" are acted out, but the fact that they are acted out does not mean that they generate an impact on a social level, it does not mean that they serve as an example, it does not mean that they shape the minds of the youngest just as they do YouTubers, movies, series and other television programs, even if they are acted, these programs do have consequences on a social level and are part of the same brainwashing that we have always had.

There was a chapter of "Case Closed" on the case of the murder of a baby dolphin for taking it out of the water to take a picture, the plaintiff denounced a woman in charge of the place who allowed this to happen, in the end Ana María Polo granted the demand to the plaintiff.

Ana María Polo said: "-I grant you the claim because that was your business, also because it was cruel, because it was bad, because you did nothing to avoid that, animals with whom you worked, you know what the animal was, and in the name of the dolphins you pay twenty thousand dollars."

Although the decision in this case was very good since the life of the murdered animal was defended, and justice was sought for the death of the dolphin, Ana María Polo in her program has attacked veganism, has defended bullfighting and has justified it with what they are traditions, it has defended hunters and in a hypocritical way PETA that says "defend" animals of other species has used it for campaigns.

Ana María Polo is the same example of the Youtubers that I have denounced in this book, to whom it seems unacceptable that animals of some species are mistreated, tortured and killed when they are dogs and cats, but, as part of their double standards, which is the same double standard as most of the people who have been brainwashed, they think it is good that they mistreat, torture and kill animals of other species through hunting or bullfighting, with which they demonstrate speciesism and promote it as it has always been done.

Screenshot of the “Case Closed” chapter where the issue of the baby dolphin that was killed when being pulled out of the water for a Selfie was discussed.

Video titled "The New World Order, Defeated" from the Catholic channel called "Magnificat TV - Franciscans of Mary." Screenshot retrieved from:  
[https://www.youtube.com/watch?v=rBB\\_t5eC8sY](https://www.youtube.com/watch?v=rBB_t5eC8sY)

In said video titled "The New World Order, Defeated" from the garbage catholic channel called "Magnificat TV - Franciscans of Mary", the speaking priest says the following: "- abortions are prohibited after the heartbeat begins".

This is another proof of how ignorant people of Christian and Right-wing religions are, who, furthermore, are crazy people who believe in conspiracy theories, because they do not know that the heart is part of the circulatory system and not part of the nervous system, the circulatory system has nothing to do with pain or with the ability to suffer emotionally, what has to do with the ability to feel physical pain and suffer emotionally is the nervous system.

When someone feels pain in their heart, it is because there are nociceptors (nerve endings for pain) throughout our body, including in our heart. The person feels pain in their heart because of these nerve endings located there, but not because of the heart.

Video titled "NEW WORLD ORDER IN THE CATHOLIC CHURCH" from the channel of the Catholic priest named Father Raul Sanchez. Capture recovered from: <https://www.youtube.com/watch?v=ztTuuRyxVLC>

These right-wing conservative people affirm that teaching equal rights, veganism, defending the indigenous peoples of the present, protection of the environment and teaching that physically mistreating a child is NEVER "educating", according to them, it is indoctrinating, but, in their inconsistency, for them to teach religion, speciesism, machismo, hatred of indigenous peoples, conspiracy theories and nationalism in schools, for them, that is not indoctrination, when clearly it is.

On the other hand, they care about zygotes and embryos that scientifically do not feel, but they support the mistreatment, torture and murder of animals of other species that, if they feel because they have a formed nervous system, that is why, for me, the "vegans" who are catholic or evangelical are false vegans for me, they are fakers who must be unmasked and exposed by those who are true vegans.

Pope Francis with the bullfighter Juan José Padilla, photo recovered from:  
<https://alfayomega.es/juan-jose-padilla-torero-conocer-al-papa-es-un-regalo-de-dios/>

Juan José Padilla who is a bullfighter said: «- Meeting the Pope is a gift from God»

The bullfighter also said: “- The Pope had reference to my career; I know that, in some meeting with a Spanish bishop, he had even worried about my condition after the mishap I had in Zaragoza. When I had the opportunity to address him, I thanked him. At that time, he told me that he admired my history, the improvement and, what else, the union of my family.”

Publication recovered from a Facebook group where bullfighters are shown in a Catholic church with the phrase: "Meeting of psychopaths in the temple of pedophiles."

Such are the monotheistic religions (Jewish, Christian and Islamic) and their books (Torah, Bible and Koran), always causing harm to animals that cannot defend themselves or harm them, always causing harm to other humans who neither harm nor You can defend, for example, indigenous people and children who are abused or raped by Catholic priests and evangelical pastors, and always causing damage to the environment.

But, always defending those who do harm, saying that we have to love our enemies, that we have to turn the other cheek, that we have to forgive everything, and that revenge against those who do harm and can defend themselves according to these religions is bad.

Also, it is from these religions that the crazy people who invent conspiracy theories that deny climate change and believe in a flat earth come from, and where the Christian parties of the Right and Christian presidents of the Right come from, such as the genocidal murderer of Jair Bolsonaro who he hates indigenous people and gave weapons to landowners to invade them, VOX and crazy Donald Trump.

The diet consumed by the Vikings was based on red meat and dairy, so in this culture hunting was something very important, just as in the Persians, the Persian King must have been the best hunter and warrior, that is why viking paganism to this day is speciesist, in all forms of viking paganism, be it Odinism, Asatru and any other, great importance is attached to the consumption of red meat and it is considered that consuming meat from animals hunted by itself is a way to relate spiritually with these gods.

Although it is true that speciesism and hunting for pleasure have also existed in the Celts, in the Egyptians, in the Greeks, and in very few indigenous cultures of America because most of the indigenous cultures of America only hunted to survive, the The Vikings were the culture where hunting for pleasure was given the most importance and that is why they are so admired by the Right, because hunting for pleasure is also related to Social Darwinism by subduing, damaging and eliminating the weakest that in this case are animals of other species.

It is true that hunting for pleasure existed in the Greek and Roman cultures, that the Greeks had a goddess of the hunt named Artemis and that the Romans had a goddess of the hunt named Diana.

However, there were also Greek philosophers who defended the life of animals of other species and who promoted vegetarianism such as Pythagoras and Porphyry, it must be remembered that at that time the word vegan did not exist and neither did the concept of veganism, and there are also gods Greeks and Greek goddesses who have nothing to do with hunting.

In Norse mythology, Sehrimnir was a cosmic boar that was the favorite food of all the gods and goddesses of Viking mythology, this animal was revived every day, grew during, and was devoured every night by these Viking gods .

In addition, there have never been records that there were Vikings against hunting, or against cruelty to animals of other species, or that they were vegetarians, unlike what happens with some Greeks.

Porphyry, another Greek philosopher who must be remembered and honored.

# Cómo los vikingos acabaron con las morsas en Islandia

Post titled "How the Vikings Killed the Walruses in Iceland". Screenshot retrieved from: [https://www.nationalgeographic.com.es/naturaleza/como-vikingos-acabaron-morsas-islandia\\_14926](https://www.nationalgeographic.com.es/naturaleza/como-vikingos-acabaron-morsas-islandia_14926)

The crazy people who invent conspiracy theories in their evil claim that veganism is satanic, because they are speciesists who support the mistreatment, torture and murder of other beings who also feel, and because they are religious fanatics, veganism contradicts parts of the book religious called bible where his evil god says that he created beings with a nervous system that allows them to feel so that they eat them and use them as objects, because only an evil god does that of creating beings that feel so that they mistreat, torture and kill them .

And if some vegans cause harm then they put everyone in the same bag and generalize, among the accomplices of these criminals there are even "professionals" in psychology who claim to combat mistreatment in schools and colleges caused by children to other children, but that promote child abuse of vegan children by saying that all vegans are the same and that they are all bad, and that they graduated from religious universities that should not exist and their Christian religions is where their prejudice against them comes from of veganism.

Screenshots that prove the true origin of my problem with the criminal who invents Christian and conspiracy theories since she always links veganism with pedophilia, porn and drugs, with which she is defaming, since she insinuates that all vegans they are pedophiles, they dedicate themselves to doing porn and they use drugs, just because veganism contradicts the belief that their evil god created animals of other species with a nervous system that allows them to feel so that we would eat and use them, that is, so that we mistreated, tortured and killed them.

But for the cases of speciesists who commit rape and murder, they NEVER put all speciesists in the same bag, nor generalize them all.

## El simbolismo de La tauromaquia Samael Aun Weor GNOSIS

204 visualizaciones

jesusagrario GNOSTICOS

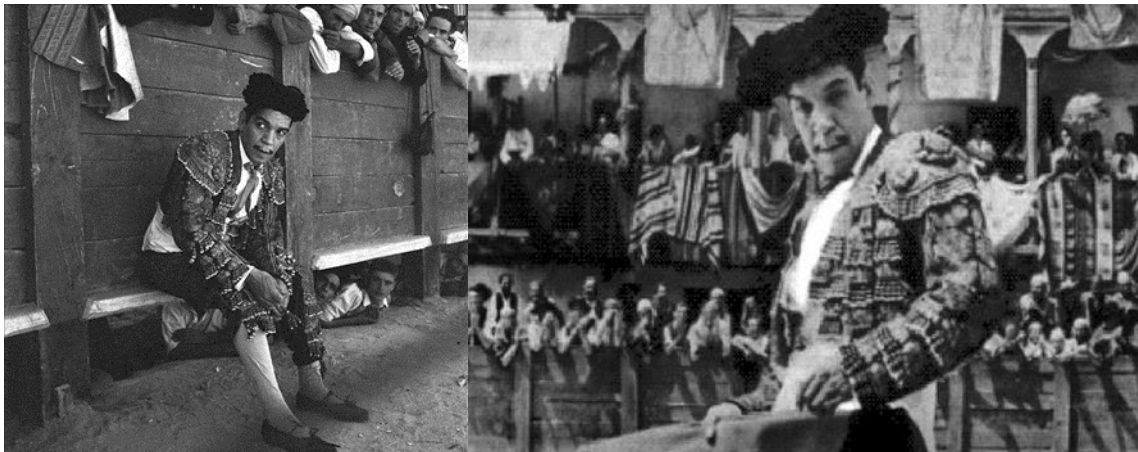

Publicado el 2 feb. 2018

The Gnosis sect founded by a sectarian leader who claimed to be a messiah or a Christ like many other founders of UFO sects, metaphysical sects or esoteric sects, supports bullfighting; on the internet you can find videos of this sectarian leader who called himself Samael Aun Weor where he supports bullfighting (the murder of bulls) affirming that it has a spiritual and esoteric meaning that comes from Atlantis, all this serves to refute religious fanatics and to the crazy people who invent conspiracy theories that claim that veganism or sensocentrism is always a topic that is related to New Age sects or New Age practices, screenshots retrieved from: <https://www.youtube.com/watch?v=Nv1vc0jA5l8> and <https://www.youtube.com/watch?v=e8BikeJjj7k>

Mario Moreno (Cantinflas) supported the esoteric and New Age sect called Gnosis founded by Samael Aun Weor; that someone is famous as an actor, actress or singer never means that he is free from suffering from mental disorders, hallucinations, or delusions of grandeur or superiority for belonging to a sect or a harmful religion, in both photographs Mario Moreno is seen with Samael Aun Weor, photographs retrieved from:

<http://sectasargentinachileperu.blogspot.com/2015/05/cantinflas-mario-moreno-y-samael-aun.html>

Mario Moreno (Cantinflas) also practiced Tauromaquia (the murder of bulls), photographs retrieved from: <https://laopinion.com/2013/04/20/mexico-recuerda-a-cantinflas-a-20-anos-de-su-muerte/> and <https://deportes.televisa.com/toros/videos-toros/cantinflas-amor-a-la-tauromaquia/>

A belief that does a lot of damage and that has been spread by people on the Right, religious fanatics who attack veganism, by crazy people who invent conspiracy theories and New Age people is that Hitler was a vegan, this is completely false, Hitler consumed pigeon meat and it was his favorite dish.

If you look closely at the photograph below, Hitler is shown holding a pigeon, you can see the tail feather and the beak, a cloth and a blade in his hand

to peel it. Hitler was NEVER vegan, for Hitler compassion was "weakness" and cruelty was "strength".

Hitler holding a pigeon, you can see the tail feather and the beak, a cloth and a blade in his hand to peel it. Photo retrieved from:

[https://www.clarin.com/mundo/hitler-musolini-kaddafi-comian-dictadores\\_0\\_ByvrrdPcPQI.html](https://www.clarin.com/mundo/hitler-musolini-kaddafi-comian-dictadores_0_ByvrrdPcPQI.html)

"I do not wish to spoil your appetite for stuffed pigeon meat, but you might be interested to know that it was a great favorite of Mr. Hitler, who often dined at the hotel." (Dione Lucas)

Only the fact that Hitler did not smoke or drink was true, there are photos where he is clearly seen eating pigeon meat in a hotel, in those days there were no imitations of meat that we have now.

Photograph where Hitler is clearly seen eating pigeon stew.

"Hitler's asceticism played an important role in the image he projected on Germany. According to widely believed legend, he never smoked or drank, nor did he eat meat or have anything to do with women. Only the former was true. " (Robert Payne)

Deepak Chopra was the spiritual teacher of the singer Lady Gaga and Lady Gaga made a dress with animal carcasses, that is to say with meat, now you will understand why I say that the New Age "vegans" are hypocrites and it is because these "vegans" support characters like these who promote speciesism and harm animals.

Lady Gaga with her spiritual teacher the New Age guru named Deepak Chopra and Lady Gaga wearing a meat dress. Photographs retrieved from:  
[https://ladygaga.fandom.com/wiki/Deepak\\_Chopra](https://ladygaga.fandom.com/wiki/Deepak_Chopra) and  
<https://www.joya.life/blog/vestido-carne-lady-gaga/>

In Latin America, the entertainment industry, the cinema and television stations continue to promote Christianity and support it, that is how during Holy Week we have Christian films in most television companies, programs such as "La Rosa De Guadalupe" on Televisa and "A Cada qué su santo" on TV Azteca, soap operas that promote Catholicism and machismo at the same time, hosts of trashy shows like Laura Bozzo, who promotes the cult of the Virgin of Guadalupe, and Ana María Polo, who in several of her trashy shows called "Caso Cerrado" from Telemundo invites priests, while ridiculing and attacking veganism by bringing a supposed "vegan" to one of its programs painted like a cow, and by defending bullfighting and hunting.

La Rosa De Guadalupe on Televisa and A Cada Quien Su Santo on TV Azteca are just a few examples of how the entertainment industry such as television stations also promote Christianity in Latin America, and a photo of Laura Bozzo promoting the cult of the Virgin of Guadalupe. Photographs retrieved from: <https://www.vix.com/es/series/231925/descubrimos-como-graban-el-airecito-de-la-rosa-de-guadalupe-y-es-mas-divertido-de-lo-que-crees> , <https://www.thedailytelevision.com/articulo/distribucion/seriesfilmes/azteca-intl-coloca-su-serie-icada-quien-su-santoi-en-la-tv> and <https://twitter.com/laurabozzo/status/879103870101835777>

The priests José De Jesús Aguilar and Pedro Martínez have been invited to the garbage program called “Caso Cerrado” on Telemundo. Photographs retrieved from: <https://www.youtube.com/watch?v=a6G6ivikHmE>

Capture of a chapter of the garbage program "Case Closed" where veganism is ridiculed by wearing a woman painted as a cow claiming to be "vegan", Ana María Polo attacks veganism and says things like that they are not of our species or that their god put them so that we use them and eat them, in addition, the PETA organization in its hypocrisy has used this person for several of its campaigns. Photographs retrieved from:  
<https://www.youtube.com/watch?v=JoWBbQgMp4s> and  
<https://larepublica.pe/espectaculos/2020/03/30/coronavirus-ana-maria-polo-de-caso-cerrado-hace-campana-para-adoptar-animales-durante-crisis-sanitaria-video-eint/>

In a program, also, this person named Ana María Polo defended a bullfighter stating the following: "I'm going to tell you something, your husband is more peaceful and more lover of animals, more lover of animals than you are" .

The truth is that it is a shame that PETA, an organization that claims to defend the lives of animals, uses speciesist people for its campaigns, this is proof of how there are also organizations that claim to "promote" veganism that are actually a fraud.

Just because someone is a biologist, an expert in flora and fauna, like the guest on that program, does not mean that they stop being a speciesist. If they did the same to cats and dogs as they do to bulls in bullfighting, this lady named Ana María Polo would see it as a crime, and many people would also see it as a crime, but since they are other species of animals, they would it seems fine and somewhat respectable, which is speciesism.

On the other hand, the fact that something is a tradition that has been going on for years and years does not make it respectable, good, or justifiable, so whoever likes the "Case Closed" program and defends Ana María Polo, and at the same time claims to be "vegan" is just a false "vegan" just like the "vegans" of the Right.

That someone loves animals does NOT mean that they respect their life and it is somewhat irrelevant, it is better that someone does not like animals and

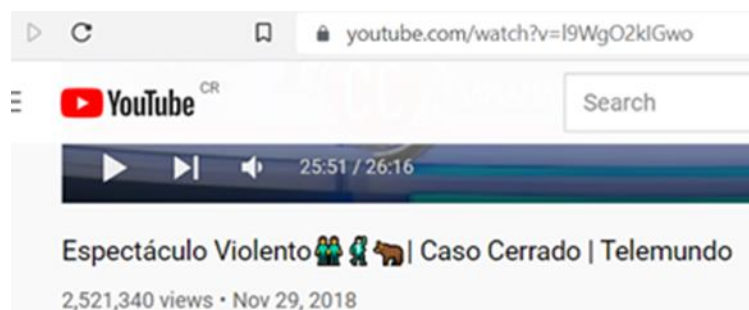

respects their life than that they like animals, see them as things, do not care what they feel when having nervous system and do not respect his life either.

Screenshot of the garbage program “Caso Cerrado” from the garbage television station Telemundo where Ana María Polo defends a bullfighter and justifies bullfighting by stating that it is a tradition as if traditions were always something “good” and “respectable”. Recovered from:  
[https://www.youtube.com/watch?v=RQKMT\\_Q8uno](https://www.youtube.com/watch?v=RQKMT_Q8uno)

In another chapter of her garbage program called “Case Closed” where this lady also defends and justifies bullfighting, she states the following: “we are not going to say that all bullfighters are psychopaths.”

This is due to speciesism where it is made to believe that human life is worth more than the life of animals of other species for the fact of being human, reasoning or being more intelligent, when in reality it is worth the same because they feel having a nervous system, and the only thing that should matter to value and respect a life is the fact that it can feel.

Another screenshot where Ana María Polo justifies bullfighting in one of her junk shows. Recovered from: <https://www.youtube.com/watch?v=I9WgO2klGwo>

False “vegans” from the Right such as UmyRoxy RM who for being Right defend the Catholic Church, when the Catholic religion has always been against veganism and qualifies it as a sect, the Catholic religion defends and supports

bullfighting, organizes masses in bullrings to bless bullfighting, have patron saints of bullfighting, patron saints of bullfighting and the Spanish Catholic priest Jesús Calvo stated the following: "The life of any bullfighter is worth more than that of all reds together."

Rafael Palacios López also known as Rafa Pal in his video "Understanding the Animalists" criticizes respect for the life of animals of other species stating that being vegan or animalist according to him is the same as humanizing animals, and respecting life of animals according to him is to dehumanize and disrespect human life, like every criminal who invents conspiracy theories says nonsense, because respecting the life of animals of other species NEVER means the same as humanizing them and neither disrespecting the human life.

Screenshot of the video "Understanding the Animalists" of the criminal who invents conspiracy theories who calls himself Rafa Pal where he states that veganism and animalism according to him is to humanize animals, and that according to him is to degrade human beings:  
[https://www.youtube.com/watch?v=JIE0VW4\\_6pw](https://www.youtube.com/watch?v=JIE0VW4_6pw)

Also, question why we care about the animals of other species while many children disappear daily, to begin with the animals of other species are NEVER to blame for the children who disappear daily, nor are they to blame for the children who die of hunger, the The fault of both the children who disappear and the children who die of hunger lies with other humans, not with animals of other species, and secondly, the pain that humans cause to animals of other species is just as serious as the pain of the children who disappear and die of hunger, one thing does not take away the other.

LOS40 CLASSIC - MADONNA

## EL VIDEOCLIP QUE MADONNA GRABÓ EN UNA PLAZA DE TOROS MALAGUEÑA

THE VIDEOCLIP THAT MADONNA RECORDED IN A MALAGUEÑA  
BULLRING. Recovered from:

[https://los40.com/los40/2020/11/04/los40classic/1604501442\\_035545.html](https://los40.com/los40/2020/11/04/los40classic/1604501442_035545.html)

## VEGAN NUTRITION

So that a vegan does not suffer from deficiencies, it is important that they consume vitamin B12, calcium, vitamin D, iodine, Omega 3, iron, vitamin C, Zinc (Zinc), Selenium, Vitamin A and Proteins.

Vitamin A is very important in the development of children and adolescents, as are vitamin B12, calcium, vitamin D, iodine, Omega 3, iron, vitamin C, zinc, Selenium and proteins, and if possible consume them every day.

For vitamin B12 we must supplement with B12 pills, the source of vitamin B12 is Cyanocobalamin, but, in the case of vegans who suffer from kidney failure or consume large amounts of cassava (also called tapioca) the source of vitamin B12 It must be Methylcobalamin.

It should be clear that vitamin B12 is NOT a medicine, it is a supplement, and medicines are not the same as supplements, since there are ignorant people who also attack veganism for this.

Vegetable sources of calcium: broccoli, kale (also called collard greens), almonds, and navy beans.

Sources of Vitamin D: 15 to 30 minutes daily in the sun at a time when sunlight is not very harmful to the skin, and fungi (also called mushrooms) exposed to the sun.

Sources of Omega 3: ground flaxseeds (also known as ground flaxseeds) that in the case of pregnant women and very young children, the consumption of flaxseed should be avoided, canola oil (also called rapeseed oil), chia seeds and walnuts.

Iodine sources: iodized salt, Nori seaweed and Wakame seaweed.

Iron Sources: Beans (also known as kidney beans), chickpeas, peas (also called split peas), almonds, pistachios, sesame seeds, raisins, and figs.

Sources of vitamin C: orange juice, lemons, papayas, strawberries, kiwis, peppers (also called sweet chilis, paprika or bell peppers), cauliflower and broccoli.

Sources of Zinc (Zinc): Peanuts, navy beans, cashews, almonds, walnuts, pistachios, macadamias, chia seeds, cacao (also known as cocoa), and flaxseeds.

Selenium sources: Brazil nuts, almonds, hazelnuts, whole grains, coconuts and macadamias.

Sources of vitamin A: carrots, pumpkin (also known as auyama), papayas, mangoes, tangerines and large bananas (also known as plantains).

Protein sources: chickpeas, lentils and beans. In the case of these vegetable proteins, to be complete they must be consumed together with a carbohydrate such as rice, tortillas, bread or potatoes.

This does not mean that we are going to eat all the sources of each thing we need in one day or in one week, we can consume one source of each nutrient on one day and the next day consume another different source of each nutrient,

or during all the days of a week consume a source of each nutrient that we need and during the days of another week consume a source of each nutrient that we need.

For example, if for every day of a week we eat chickpeas accompanied by some carbohydrate such as rice, potatoes, bread or tortillas, as chickpeas contain protein and iron, we would have to look for a source of vitamin B12, a source of calcium, a of vitamin D, one of iodine, one of omega 3, one of vitamin C, one of zinc, one of selenium and another of vitamin A to consume during every day of that week.

If for a week we consume broccoli, as broccoli contains calcium and vitamin C, we would have to look for a source of vitamin B12, one of vitamin D, one of iodine, one of omega 3, one of iron, one of zinc, one of selenium , one of vitamin A and one of protein accompanied by some carbohydrate to consume throughout that week.

If for a whole week we eat almonds, since almonds contain calcium, iron, zinc and selenium, we would have to look for a source of vitamin B12, one of vitamin D, one of iodine, one of omega 3, one of vitamin C, one of vitamin A and one of proteins accompanied by some carbohydrate to consume during that whole week.

If for a week we consume chia seeds, as chia seeds contain omega 3 and zinc, we would have to look for a source of vitamin B12, one of calcium, one of vitamin D, one of iodine, one of iron, one of vitamin C , one of Selenium, one of vitamin A and one of proteins accompanied with some carbohydrate to eat throughout the week.

If for a week we eat lentils accompanied by some carbohydrate, as lentils contain Iron, Zinc and Protein, we would have to look for a source of vitamin B12, a source of Calcium, one of vitamin D, one of Iodine, one of omega 3, one of vitamin C, one of Selenium and one of vitamin A to consume throughout that week.

If during every day of a week we eat peanuts, as peanuts contain Iron and Zinc, you should look for a source of vitamin B12, a source of Calcium, a source of vitamin D, one of Iodine, one of Omega 3, one of vitamin C, one of Selenium, one of vitamin A and one of proteins accompanied by some carbohydrate to consume during every day of that week.

And if for a week we consume papaya every day, since papaya contains vitamin A and vitamin C, we would have to look for a source of vitamin B12, one of Calcium, one of vitamin D, one of Iodine, one of Omega 3, one of Iron, one of Zinc, one of Selenium and one of Proteins accompanied by some carbohydrate to be consumed during every day of that week.

The majority demands that their right to educate their children with their "values" be respected, but they disrespect those of us who are minorities if we have children and try to educate them with our values.

It is true that a vegan father or vegan mother if they raise a child with a poor diet can cause deficiencies, illnesses and even death, this is the fault of the fathers or mothers and never of veganism, but if a vegan father or vegan mother informs well with scientific sources without appealing to fallacies such as the naturalist and with nutritionists you can raise your child with a vegan diet without deficiencies, healthy and never have health problems due to poor nutrition.

It seems to me that the majority demand respect for themselves, but there is always a lack of respect for those of us who are a minority. The consumption of healthy vegetable fats such as olives, avocado, coconut and sweet corn is also important.

An example of a vegetable product with which we can create delicious vegan desserts is Agar-agar, which consists of a vegetable gelatin to which we can add a variety of flavors and that provides great nutritional benefits, since among some of its benefits is that strengthens cartilage and bones by providing collagen of plant origin.

Intestinal gas produces methane which also causes pollution, so it is important to look for ways to decrease the production of intestinal gas.

For this it is important that we flavor or season most of our meals during the day and most drinks during the day with the following foods: ginger, apple cider vinegar, lemon, anise, fennel, cumin, coriander, mint, pineapple, rosemary, thyme, chamomile and basil.

All of the above foods help reduce intestinal gas.

## **SENSOCENTRISM**

Biocentrism is the belief that all forms of life should be respected regardless of whether they feel or lack the ability to feel, anthropocentrism is the belief that only human life should be respected, and sensocentrism is the value of respecting life and the well-being of all sentient beings.

Speciesism means when someone discriminates against a being with the ability to feel only for being of another species, for example, humans who believe that only human life should be respected, but that other sentient animals can be killed, or humans who They believe that only the lives of dogs and cats should be respected, but that other animals can be mistreated, tortured or killed.

Every sentient being is someone and not something. Although we do not have the same intelligence or the same ability to reason, the fact of feeling gives us the same right to life and well-being. From my sensocentric ethics, the life of beings who only feel physical pain matters, as well as beings who only feel emotional suffering and beings who feel both physical pain and emotional suffering.

Even if robots or artificial intelligences were created with artificial nerve endings that allow them to feel physical pain, or with an artificial brain that allows them to feel emotional pain, or with the ability to feel both physical pain and emotional pain, they would deserve the same respect. to your life and well-being by experiencing physical pain, emotional distress, or both.

From sensocentrism (respect only beings with the ability to feel physical pain, emotional suffering or both), it is only murder to kill beings with the ability to feel. Any being with nociceptors (nerve endings for pain) and a central nervous system (brain) that sends pain signals to those endings feels physical pain. And every being with a central nervous system (brain) that contains a limbic system in charge of emotions, feels emotional suffering.

If veganism meant respecting all forms of life (Biocentrism) then we could never eat vegetables like broccoli or lettuce because vegetables are living beings, nor could we heal ourselves when we have an infection since bacteria are living beings.

Furthermore, if veganism were to be based on biocentrism (respect for all forms of life) then it would be easily refuted on the grounds that vegetables and plants that must be cut for products like potatoes and others from their roots, too, they are living beings.

That is why veganism must be based on sensocentrism (Respect only for the life of beings with the ability to feel, who are those with a formed nervous system) and never on biocentrism, which is respect for all life.

From sensocentrism, it can only be considered murder when a being with the ability to feel is killed, and speciesism only exists when beings that can feel are disrespected because they are of another species, since beings that lack the

ability to feel at lacking that ability can never feel affected, suffer, or experience pain, for example, human embryos before two months of gestation.

To say that cutting down an embryo that lacks sentience is murder is like saying that cutting down a plant is murder. And to care for and protect the environment, and to know that plants and trees must be conserved and cared for because they produce oxygen, fruits and help conserve water, you NEVER need to be biocentric.

In addition, the "pro-life" vegans, the only thing they cause is that there are more speciesists, sexists, child abusers and fanatics in the world, because the majority of people who are born follow the example of their parents and society, and they become like this. And unfortunately it is the people who reproduce the most, but those "vegans" support that.

One thing is physical pain and another is emotional suffering, physical pain is a physiological and automatic reaction product of brain signals sent to nociceptors, while emotional suffering is a reaction that is experienced directly in the brain, specifically in the limbic system as a consequence of emotions such as sadness and others.

If a being can feel physical pain, but lacks the capacity to feel emotional suffering, he deserves respect for his life and well-being for feeling physical pain; while if a being can feel emotional suffering, but lacks the ability to feel physical pain, he deserves respect for his life and well-being for feeling emotional suffering; and if a being feels both physical pain and emotional suffering, he deserves respect for his life and well-being for feeling both physical pain and emotional suffering.

Nor is it that one has to like a sentient being to respect their life and well-being, that one finds a sentient being pleasant or unpleasant is irrelevant, it is completely unimportant, what is truly important is to respect their life and well-being. his well-being by the fact of feeling, regardless of whether his appearance seems pleasant or unpleasant to us, regardless of whether we like it or dislike it.

In the current anthropocentric society (where only human life matters) in which we live, the word murder is defined as the intentional killing of a human being.

On the other hand, in this book, the word murder is defined more according to sensocentrism (the ability to feel as the center of ethics), here the word murder is defined as killing intentionally (never accidentally) and unnecessarily any being capable of feeling physical pain, emotional suffering, or both.

However, I must clarify that I have never been 100% sensocentrist, since for me there are exceptions. Only a sadistic and cruel would enjoy and see as entertaining: mistreating, torturing or murdering another being with the ability to feel that he has never hurt us nor can defend himself.

Only a psychopath can enjoy causing pain or suffering to other sentient beings (whether of the same species or of other species), however, as most concepts are social constructions, it should be clarified that the concept of

psychopath does not escape the definition given by the anthropocentric society, since today's society and most of the professionals that make it up define the word psychopath only to refer to that individual who lacks empathy and enjoys causing pain or suffering only towards the human being.

Others believe that sensocentrism is when animals of other species are asked to be killed with less pain or without any pain in slaughterhouses, since they confuse the word sensocentrism with welfarism.

In reality, the true meaning of sensocentrism consists in treating every sentient being in an ethical or moral way, never in killing it with less pain or without pain, nor in improving the conditions of animals that are going to be mistreated, tortured or killed. .

The definition of sensocentrism in this book is to do as much as possible to eliminate all forms of mistreatment, torture or murder of sentient beings, regardless of whether they are of the same species or of other species. Looking for ways to kill animals with less pain or without pain to obtain meat or leather, or to improve the conditions of animals that are going to be mistreated, tortured or killed is welfarism, never sensocentrism.

Others who say they are vegans believe that being sensocentrist means eating shellfish because there are people who say they are sensocentrist who eat them, first of all, the definition of sensocentrism never means eating mollusks and secondly in those of us who call ourselves sensocentrists there can be many differences of opinion, I myself have never considered myself a 100% sensocentrist, nor a fanatical sensocentrist.

## ENVIRONMENT

The Greek philosopher Thales of Miletus affirmed that water is the principle of universal life. Caring for the environment benefits us all; if we value the diversity of colors, shapes and sizes that exist in nature we can find a meaning of life.

As plants, shrubs and trees purify the air, we can organize walks to natural places, admire the variety of plant and tree species, and take deep breaths in these places to feel better, nature is healing.

However, there are people close to the Right who justify not planting trees and destroying them because trees produce more oxygen when they are growing and when they die they release all the carbon dioxide they stored inside.

But that is what is important, planting trees so that when some die and release the carbon dioxide they stored inside, there are new trees that absorb the carbon dioxide released by the trees that died.

In addition, it is not just about planting trees because they produce oxygen, it is about the fact that they provide us with many more benefits such as: providing shade that protects us from the heat, protecting the soil from droughts by preventing it from eroding and losing fertility, providing us with fruit to eat, serve as a home for many animals that build their nests in them and need them to survive like wild animals, give us wood, and its leaves when they fall to the ground to rot serve as fertilizer for the earth, and maintain soil moisture preventing the earth from drying out, preventing droughts that kill both humans and animals of other species.

Others also related to the Political Right affirm that one should not be in favor of the use of technologies such as solar panels and wind turbines because they also pollute, however, although it is true that they also pollute because there is nothing that does not, they pollute much less than the use of energy based on the oil tanker, therefore polluting much less than oil; the use of solar panels and wind turbines does help the environment.

We are part of nature and it is important to spend time with it to value everything it gives us, such as the air we breathe, the water, the shade trees give us and the variety of life forms. The destruction of the environment is the destruction of human life.

Air and water pollution causes diseases that affect our health, this is what the crazy conspiracy theorists, right-wingers and religious fanatics do not understand.

Among what we can do to help the environment is recycling, reducing the use of disposable products, reducing the use of plastic bags, avoiding the use of pesticides, using reusable products, collecting garbage, avoiding wasting water, plant trees and plants, among others.

It is important to conserve the environment because we need the oxygen produced by trees and plants to be able to live, and other species of animals also

need oxygen to survive, and also because we need clean and drinkable water to live as much as they need it. the rest of the animals of other species, in addition to the trees and plants help maintain soil moisture, thus preventing droughts that kill both human beings and animals of other species.

Without plants and without trees we would never have fruits or seeds or vegetables, which would cause world famine and both humans and animals of other species to die, and all humans and animals of other species would be forced to eat meat or being cannibals to survive, for example, the Eskimos are forced to eat meat because in those places there are never plants or trees, the Eskimos are forced to live off the death of other sentient beings, in this case it is a case of survival.

Both humans and animals of other species need clean air and clean water, since both air pollution and water pollution cause diseases that kill humans and animals of other species; this is what many religious fanatics, anthropocentrists and those who invent conspiracy theories never understand, nor reason.

Since it is never about caring for the environment above human life, it is about caring for it because we need the environment for human life to exist and for the life of animals of other species to exist.

The destruction of the environment is the destruction of human life, we must take care of the environment because sentient beings need it to live, so I can never understand how many who call themselves "pro-lifers" " They support pollution and the destruction of the environment when with that they are causing the death of humans from diseases caused by pollution, droughts, intense heat waves and intense cold waves.

It is about caring for and protecting the environment because an environment that is polluted and destroyed causes the death of human beings and animals of other species.

Progress is NEVER what is polluting and destroying the world, because:

1. Long ago: all cars could be electric, and all sources of electrical energy obtained through solar panels and wind turbines.

2. Long ago: all the houses and buildings could be surrounded by trees, plants and bushes around them, with parts of the green roof and some garden inside.

That's right, if scientific and technological progress is possible with the least possible pollution and with the least possible destruction.

Photograph of Tesla brand X Ultra White electric car with synthetic leather seats, photo of solar panels and photo of wind turbines, retrieved from: <http://365sustentable.com/tesla-model-x-ultra-white-el-primer-auto-electrico-y-100-vegano-del-mundo/> , <https://www.porquecomoydonde.net/2017/02/que-es-un-panel-solar.html> and <https://www.vix.com/es/mundo/169547/esta-es-la-cantidad-de-aerogeneradores-que-necesitamos-para-darle-energia-a-todo-el-planeta>

Design of houses surrounded by trees and bushes, building with a green roof and an example of an internal garden, images retrieved from:

<https://www.jolitakelias.com/the-venus-project-resource-based-economy/> ,  
<https://www.enlight.mx/blog/techos-verdes-comunes-mundo/> and [https://casa-web.com.ar/construccion-y-decoracion-de-un-jardin-de-invierno\\_7637](https://casa-web.com.ar/construccion-y-decoracion-de-un-jardin-de-invierno_7637)

What is destroying and polluting the world are the following three things:

1. Each house, premises or building must be surrounded by trees, bushes and plants around it.

2. Electric power sources must be obtained solar by means of solar panels or wind by means of wind turbines. Since, although all technology generates some pollution, those technologies to obtain electricity: pollute less and are cleaner.

3. All cars must run on electricity and inside the seats will never use leather or animal skins.

4. It must be recycled, and it is forbidden to throw garbage or waste into rivers, lakes or the sea.

5. The lighting in houses, premises and buildings must be by means of LED lights.

6. The houses, buildings and premises must have green roofs or a part of the roof planted, and have an internal garden or more internal gardens.

With hemp (marijuana) you can produce paper, plastic, ropes and fibers. That the cultivation of hemp is illegal, only favors the oil companies that produce

plastic with oil, the felling of trees (deforestation) to produce paper, pollution and unemployment.

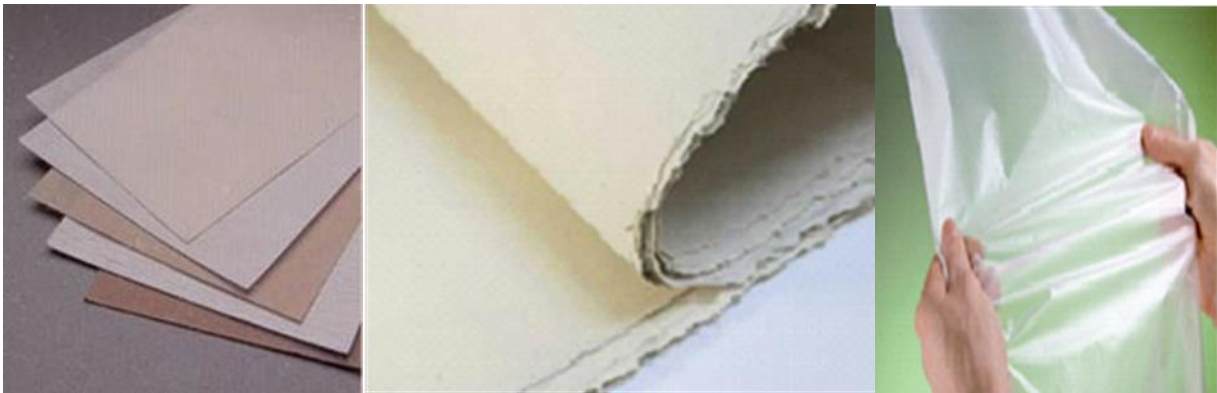

A hemp plant takes about three months to grow, while a tree takes many years to believe, the damage done by cutting down a tree to produce paper is very serious for the environment, if paper were produced from hemp the problem of cutting down trees to make paper would be solved.

People should understand that one thing is legalizing marijuana for people to consume as a drug and another thing is legalizing it to make paper, plastic, fabrics, ropes and fibers. And that paper, plastic, fabrics, ropes and fibers made from hemp can never be used as a drug because the way they are processed makes them impossible to use.

In any case, the people on the Right who are so opposed to the legalization of drugs are hypocrites with double standards because they also consume drugs such as caffeine, alcoholic beverages and cigarettes.

The consumption of alcoholic beverages is legal throughout the world and often causes accidents, destroys families and causes many deaths. The same is tobacco, tobacco consumption causes lung cancer, and it not only affects those who consume it, it also affects those who do not consume it by breathing that smoke.

If according to the people of the Right, all drugs should be illegal, then so are caffeine, tobacco and alcoholic beverages. When someone proposes that caffeine, tobacco and alcoholic beverages be illegal, these Right-wing people are going to oppose it.

By this year 2022, in which I find myself writing this chapter of this book, there will be almost eight billion humans in the world, many people from the Right such as those who invent conspiracy theories and atheists related to the Right such as Dalas, say that overpopulation does not exist because in developed countries many people prefer not to have children and that those who decide to have children only have one or two children at most.

But, although in developed countries, many people prefer not to have children and those who have children only have one or two children, the world's human population continues to increase, furthermore, it is almost utopian to think that all countries will be developed countries, and that In all countries, many humans will not have children or will only have one or two children.

Humans are the only animal that when we eat we generate inorganic garbage such as non-biodegradable plastic, most of the plastic we use comes from petroleum and therefore is not biodegradable, and although there is biodegradable plastic made from plant matter, most of it does not uses biodegradable plastic, humans are the only animals that dump most of their excrement and inorganic garbage into drinking water sources and the sea.

Humans are the only animals that use artificial insemination (rape) with other animals such as cows, causing an overpopulation of these animals on farms because they are constantly reproducing these animals to be consumed by humans.

Humans only generate 3% of biomass, while a cow can generate 40% or 60% of biomass, a cow having a larger intestine than other animals generates an excess of excrement, carbon dioxide and more methane. than humans and more than other animals, so as long as cows and bulls continue to reproduce for human consumption, air pollution will continue to be just as excessive as it has been until now.

So as long as the human population continues to increase causing excess human population to increase, excess air pollution and water pollution to increase, and since most humans are speciesists, they also cause excess cow and pig population. In order to consume their carcasses (meat), milk and dairy products, cause a lot of contamination of the land and water with the excess of excrement produced by these animals and with the blood of these animals, and air pollution with the amount excess of gases such as methane and carbon dioxide that these animals expel in their gases and excrement.

The crazy people who come up with conspiracy theories are religious fanatics and right wing people who come up with conspiracy theories based on the bible, some of them say that human overpopulation is something to celebrate, when human overpopulation also causes poverty, famine, droughts due to pollution that kills humans themselves, increased crime and unemployment.

These people fill their mouths saying that they respect human life, and that according to them those of us who respect the life of animals of other species and care about the environment disrespect human life, but the very ignorant do not realize that by supporting the excess of human population they are supporting that the air becomes excessively polluted and this excessive air pollution causes illnesses to human beings and even the death of humans due to pollution, the very ignorant do not realize that supporting the excess of human population is to support that all the water on the planet is contaminated, and when humans drink contaminated water they get sick and even die.

They believe they are defenders of human life and in reality they are against human life, because we need clean air and clean water to be healthy, to never get sick and never die from pollution or from droughts caused by pollution.

The human population should never be greater than two billion and also half of these two billion, that is, a billion should be indigenous, too, these people say that the elite according to them wants to reduce the population when until now the human population continues to increase and no one has done anything to reduce it.

The only humans that the elite or people in power do want to exterminate are the Native Americans in the United States and Canada, and the indigenous peoples in Brazil and in American countries that speak Spanish, as I found in my book "In defense of indigenous peoples and paganism" and I will check it in my next free book entitled "Rights of Minors and Equal Rights",

The ignorant also quote "The Guide Stones of Georgia" to affirm that there is an elite plan to reduce the population because in a part of the writing on those stones it says that the human population must be maintained at five hundred million, but there only it speaks of an ideal and not of a plan to reduce the human population.

In addition, it is not convenient for the elites such as presidents and royalty such as kings to reduce the human population that is white and mestizo, because

the elites live off taxes and the more white and mestizo humans there are on the planet, the more money is spent. It generates taxes, in addition, they need an excess of the human population of whites and mestizos so that their oil and livestock companies become even richer with the excessive money paid by the excess of humans who buy products derived from petroleum, meat, milk and dairy products. .

Also these crazy people who invent conspiracy theories, say that according to them if someone tried to reduce the population it is the same as genocide.

And it would not be the same as a genocide, because the majority can live well being sterile without having children and if they want children they can adopt so many children who are abandoned or orphaned because their parents died or abandoned them, besides, for me having children is not a right because many people only have children to bring them into the world to suffer and because a child is not an object that can be considered property.

The human overpopulation that generates so much air and water pollution is also a mandate of that god in the bible, and from there we can begin to see him because the crazy people who invent conspiracy theories to support human overpopulation invent conspiracy theories that They say that an elite wants to reduce the human population, although it is not true, because the human population continues to increase and nobody does anything to stop this.

Genesis chapter 1, verse 28: "And God blessed them, and said to them, Be fruitful and multiply; fill the earth."

Genesis chapter 9, verse 1: "God blessed Noah and his sons, and said to them, Be fruitful and multiply, and fill the earth."

Genesis chapter 9, verse 7: "But ye be fruitful and multiply; procreate abundantly in the land, and multiply in it."

Genesis chapter 26, verse 4: "I will multiply your descendants as the stars of heaven, and I will give your descendants all these lands; and all the nations of the earth will be blessed in your seed."

Right-wing politicians like Donald Trump are also the ones who promote conspiracy theories that deny climate change, or like VOX that, although they do not deny it, do downplay climate change, they affirm that the responsibility lies only with the governments and the companies, and take responsibility away from other humans.

# Trump vuelve a negar el cambio climático. Y los científicos le responden

National Geographic publication entitled: "Trump denies climate change again. And the scientists answer him." Screenshot retrieved from:

[https://www.nationalgeographic.com.es/ciencia/actualidad/trump-vuelve-a-negar-cambio-climatico-y-cientificos-le-responden\\_13534](https://www.nationalgeographic.com.es/ciencia/actualidad/trump-vuelve-a-negar-cambio-climatico-y-cientificos-le-responden_13534)

The YouTuber Dalas Review, who on several occasions has defended Right-wing politicians like Donald Trump and Right-wing parties like VOX, made a video entitled "The truth about Climate Change: They LIED to you at School" where he states that our individual actions do not count. to stop climate change.

Although it is true that the greatest responsibility for climate change lies with governments and large companies, this does not take responsibility away from the rest of humans, if most humans stopped eating meat, emissions would be greatly reduced. of gases such as carbon dioxide and methane that are the cause of climate change, since those animals would stop reproducing because they have larger intestines than humans and other animals generate large emissions of methane and carbon dioxide with their gases and excrement.

That clown from Dallas has said that our individual actions do not count towards stopping climate change. It is true that if a single person changes, they cannot stop climate change, but millions of people in the world change their lifestyle if carbon dioxide and methane emissions can be significantly reduced.

In addition, this Dalas clown believes that fighting climate change means reducing methane and carbon dioxide emissions by 100%, it is impossible to reduce these emissions by 100%. What it is about is cutting methane and carbon dioxide emissions in half.

And all technology pollutes in one way or another, but it is obvious that solar panels and wind turbines pollute less than oil-based technologies, and by polluting less, they do benefit the environment. In addition, Dalas does the same as those who try conspiracy theories to say that the fault of what happens is only the governments and large companies.

While governments and large companies bear most of the responsibility, we also have a responsibility to fight climate change, it is the responsibility of

governments, it is the responsibility of large companies and it is our responsibility.

These people from the Right or who justify the Right as the garbage of Dalas, is the same one who attacks the environmental activist named Greta Thunberg, because for them the good thing is to be conservative, when in reality, being conservative is evil in its maximum expression.

The Dalas Review video was denied by another YouTube channel called "EcoDiuku" with a video titled "DALAS REVIEW VIDEO RESPONSE: "The truth about Climate Change: They lied to you at school", unfortunately, the Dalas Review video has 794,054 views by the time I write this, while EcoDiuku's video response to him only has 5,720 views.

Youtubers from the Right or those who support the Right such as Dalas and many others that I mention in this book, by harming human lives, the lives of animals of other species or harming the environment by promoting the Right, should not have subscribers to their channels, or visits to their videos, so they would have to go out looking for work and would not be making videos on YouTube that cause harm for the nonsense they say in order to defend or justify the Right.

Dalas Review made the video that I already commented on where he states that our individual actions are irrelevant in the fight against climate change and that we can do nothing to stop it, this same character says that he would like to be able to dedicate himself to investigating how to extend our life or be immortal through science, something with which I totally agree, since I believe that people should respect those of us who want to extend our lives or be immortal, and they should never prevent this progress, even if someone does not want to extend their life or be Immortal is also respectable as long as it does not try to prevent it to those who do want that.

However, what is the use of looking for how to stop aging, extend our life or be immortal if at the same time this person affirms that our individual actions do not count to stop climate change, that is, that life on earth anyway is it going to end and we are all going to die?

If in any case, we are going to die from climate change, what we can do individually is useless for Dalas Review, and this is what he says, because he knows that he gives publicity to Right-wing parties like VOX or Right-wing politicians like Donald Trump that promote conspiracy theories that deny climate change or play down its importance, then it is useless to seek to stop aging, extend life or be immortal because we will still die from climate change and pollution.

I think that the first thing is to make sure that our planet can continue to host life, that we can stop climate change, it is true, that the greatest responsibility for this lies with governments and companies, but we also have it because if the majority stop eating meat will reduce methane and carbon dioxide emissions by a large percentage, and after stopping climate change and ensuring that life on earth can continue, we can look for ways to stop aging, live longer or to be immortal and finance research in this regard, but the first thing is to save our planet and then achieve that.

In addition, these criminals who invent conspiracy theories, promote conspiracy theories where they deny that climate change exists, and if they accept that it exists, they affirm that it is not the fault of the human being and downplay it, they also deny that overpopulation exists, all this based on the fact that his evil god left written in his word (The Bible) that he told the human being that he will dominate or rule the world and that they will fill the world with children.

The more humans there are on the planet, the more air and water pollution, and the more humans who get sick or die from diseases caused by air pollution and water pollution, in addition, these conspiracy theories by denying that climate change exists And by denying that overpopulation exists, they are not only a crime against human lives, these conspiracy theories are also a crime against the environment.

So much so that the clowns boast that they respect human life and that according to them human life is the most important thing, and they recriminate those of us who are vegans and care about the environment that according to them we are against human life, and these clowns do not they care that the air pollution and water pollution they support with their silly theories cause human illness and death.

Another stupidity they say is that the HAARP antennas located in Alaska modify the climate of the entire planet, which is absurd, some antennas located in one place do not have the power to modify the climate of the entire planet, these criminals simply they are crazy, in addition, the facilities of the HAARP project are publicly accessible, anyone can visit them, and verify that the garbage that those who invent conspiracy theories about HAARP write and say is just a vile lie.

The criminal who invents conspiracy theories, Christian and New Age who calls Parafantastic said in a video called "GLOBAL WARMING - The Hidden TRUTH" the following stupid things:

- "- That is a real censorship, not what is happening with Global Warming".
- "- This is what many of us refer to as the New World Order"
- "- For the awakened ones of this channel".
- "- They make us feel guilty for problems that we did not generate, such as Global Warming."
- "- The reduction of the world population, something that is already being done in a very discreet way".

- “- how everything leads to blaming us as individuals”
- “- If climate change is caused by humans or by solar activity”.
- “- Agenda 2030”.

Parafantastic is an example of how perverse conspiracy theories are, on the other hand, these criminals refer to the protection of the environment as an agenda, but they never talk about the agenda that they have to end life on this planet. which also means the end of human life due to the theories in favor of air pollution and water pollution that they promote based on the bible.

It is curious that they complain that humans are blamed for climate change that is clearly caused in large part by humans, but never talk about the guilt that Christianity has placed on human beings by talking about that stupidity of a hell and a tyrannical god who punishes people with a hell for the mere fact of questioning it or not worshiping it.

It is a relief that the UN does not pay attention to these clowns and that it promotes the protection of the environment and equal rights with the 2030 Agenda, but, imagine for a moment that the UN were the opposite, denying climate change, promoted Christianity, considered that minorities lack rights, did not care about the environment, supported homosexuals being stoned to death as is written in the bible and supported the genocide of indigenous peoples, believe me, these clowns will never they would invent conspiracy theories against the UN, and they would talk wonders about the UN, fortunately, the UN is not what these criminals want it to be and I hope it never will be.

When the clowns say that they are awake and that those of us who do not believe their stupidities are asleep, it is the same as when Christianity says that they are saved and that the others according to them are condemned to the punishment of eternal fire.

Do you realize why conspiracy theories have always been a form of covert or subtle advertising used by Christian religions and Right wing political ideologies?

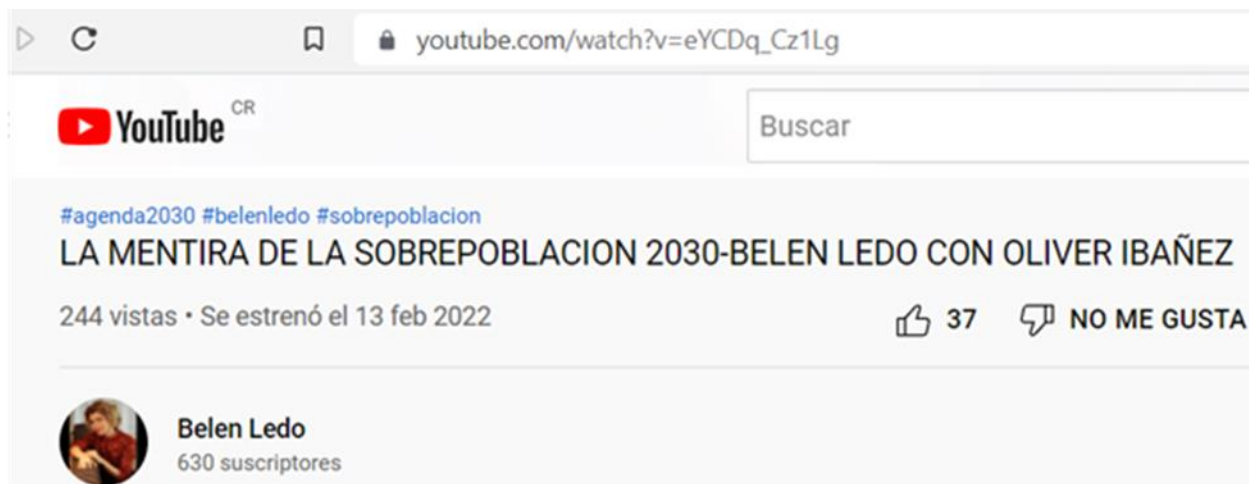

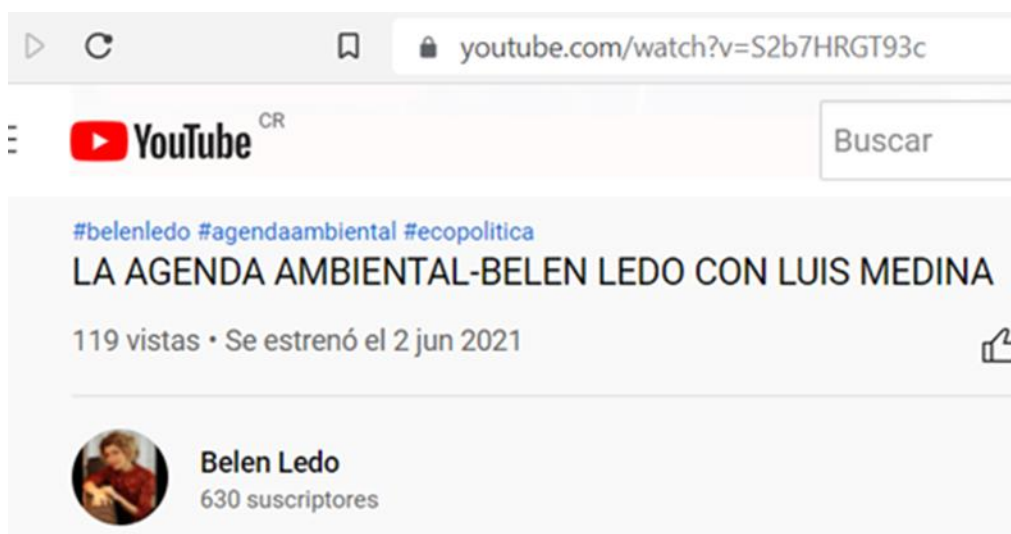

Video titled "DON'T BELIEVE UN Lies - DINOSAUR Warns About CLIMATE CHANGE" from the channel of the criminal who invents conspiracy theories called Parafantástico who is the same as the criminal, Christian and Right who also invents conspiracy theories called Alex Jones. ## CONCLUSION

My goal with this book is to help promote veganism out of respect for the life of animals and explain how you can have a vegan diet at any stage of life without suffering from nutritional deficiencies, for which I base myself on scientific sources and not on pseudosciences, make it clear why veganism has never been a sect, nor a religion and provide answers regarding this topic.

It is also important that political parties be created around the world based on the values promoted in this book.

I seek to promote sensocentrism that consists of respect for lives that they feel for the fact of feeling that they exist in the present as well as that they may come to exist in the future.

Another objective with this book is to promote the conservation and protection of the environment.

I hope that it will serve many people to reflect and make the change that is needed, I appreciate all the publicity that you make of this book by all possible means.

Those who read this book together with my other books "In defense of indigenous peoples and paganism" and "Paganism, gods and goddesses", and can, it is important that they print them, spread them by all possible means, both digitally as well as in print, and to disclose them in videos on YouTube and other platforms, on Facebook, on Twitter, on TikTok, on Instagram and on any other social network.

These books are hope to change the world, to eliminate the evil monotheistic religions and their evil books, to eliminate the Right-wing political parties and have them banned worldwide as the same as Nazism, to eliminate royalty, to harshly punish those who support and justify Right-wing parties, so that YouTubers who support or justify the Right lose their YouTube channels and be banned from YouTube forever, and so that people will never believe in the lies of those who invent conspiracy theories, who only promote hatred of minorities, are part of the Right and religious fanatics.

It is advisable to make many copies of my books, and distribute them outside Catholic churches, outside evangelical or protestant churches, and to Jehovah's Witnesses who spend Sundays disturbing houses.

My books should be taught in all schools (primary) and colleges (secondary) in the world, and replace religion classes and replace catechism, which in itself, religion classes in schools and colleges are a lack of respect for supporting a criminal institution like Christianity and a lack of respect for the victims of crimes committed by Christianity.

For the effort and time dedicated to writing this book, and for the maintenance of my website <https://hermes78.com>, you can make voluntary donations by PayPal to my email: [hermes72018@gmail.com](mailto:hermes72018@gmail.com)
